WINNIPEG GRAIN MARKET.
Winnipeg, Nov. 24.—Wheat closed 2½¢ lower for November, 80¢ down for December and 1½¢ down for May. Oats were ½¢ lower in December and ½¢ in May. Barley was 1¢ lower in December and 1½¢ in November, 6½¢ in December and 7¢ in May.
The morning burst of trade the wheat market got into a rut. The aggressive selling which caused the break did not cover the short side. Then prices were driven up on a narrow margin for the rest of the day. The market was then picked up on the break by strong interests. The bulk of the trade was in the hands of the profession on elements of a full appearance with number 1 at ½¢ over November.

BRITISH TREASURY BILLS TO BE SOLD IN NEW YORK.
New York, Nov. 24.—J. P. Morgan & Co. today announced that the British and French Government treasuries have authorized the sale in this market of a new class of short term bills, running at various maturities from 30 days to six months. This is a novel form of financing by Great Britain, and is the first of its kind placed for fixed amounts. The treasury bills will be payable in dollars and are to be sold in New York at a rate of 4½ per cent. It is understood, however, that the rate at which the bills will be comparatively small.

MINING MARKET BROADENING.
R. E. Kemmerer in his weekly market letter has the following: There has been a noticeable increase in the activity of the metal producing companies and signs are not wanting to indicate that the public has at last advanced to the significance of the advance in the price of the metals and to the fact that there must be a tremendous advance in these shares in order that market prices and enhanced values be harmonized. There can be of course, no question but that the metal stocks have fallen most signally to keep pace with improving conditions and a most curious comparison of the shares of the other industrial producers with the issues of the metal producing companies immediately reveals the fact that these latter issues have been boomed out of all proportion to their mining stocks value. It is a matter of fact that the public may look for an adjustment of this condition, not necessarily by reason of declines in the industrial mentioned, but by advances in the metal issues.

NEW YORK COTTON.
LONDON STOCK MARKET.
London, Nov. 24.—The stock market developed a better tendency today. The railroads section having a slight advance, but a few bills were sufficient to bring the market to a standstill. Work on the crop outlook but rubber stocks were firm with the commodity. The market was active in the afternoon. American securities were reactionary on the decline in Wall Street yesterday. Money was dull. Money market strong demand and discount rates were harder.

PRICE OF SILVER.
London, Nov. 24.—Bar silver, 34 1/2.
New York, Nov. 24.—Bar silver, 73 1/2.

BULLION SHIPMENT.
A shipment of 53 bars of bullion containing 58,889.96 fine ounces of silver and 688.02 oz. was sent out by the Mining Corporation of Canada a couple of days ago. The bullion went to London, England.

WHEAT FALLS OFF ON EMBARGO TALK

Buyers Become Intimidated by Move Among U. S. Congressmen.

EXPORT CALL REVIVES RAINS IN ARGENTINA IMPROVE CROP OUTLOOK IN ANTIPODES.

Chicago, Nov. 24.—Embargo prospects gave such an advantage today to the bears in wheat that rallies, due to European buying, failed to hold. The market closed weak 1¼¢ to 2¼¢ net lower, with December at \$1.78½ to \$1.79½, and May at \$1.85½ to \$1.85½. Other leading staples, too, all showed setbacks—corn ¼¢ to ½¢, oats ¼¢ to ½¢, and provisions 2¼¢ to 3¼¢.

Increased attention to the chances of an embargo seemed to be evident throughout the day in the wheat pit. Some of the bull leaders took the position that the proposed amendment would prove to be a bluff, but a majority of traders appeared to evince concern over an opinion current that the delay and that, as an emergency measure to protect the domestic crop, the government would buyers were foreign government would prevent the enforcement of the statute. Likelihood of another increase of the U. S. viable supply took on Monday counted also against the bears, and so, too, did the fact that the Argentine level has been on the rise for some time. Something of a revival of export business led at one time to a pronounced improvement in the market, but the Argentine level has been on the rise for some time. Success of Davidson To Stimulate Section.
Owing to the remarkable success which has attended the operations at the Davidson section operations were resumed last week according to F. C. Sutherland & Co., it is probable that several other properties in the northwestern section of Tisdale Township will be reopened in the near future. It has been known for some time that the Davidson section had identified the Hollinger Consolidated, but owing to lack of sufficient capital development was not prosecuted to an extent sufficient to put any of the mines in the producing class. It is expected that the Davidson will put up a tentative mill and join the list of producing companies early in 1917, and everything points to the fact that it will eventually be one of the big mines of the camp.

INSPIRATION GOLD FORMATION IS FAVORABLE.
H. B. Willis in his weekly letter says: Seldom does a totally undeveloped property enjoy such universal endorsement by engineers as that already given to Inspiration Gold, but the best of all came this week in the third report on the Porcupine gold area by Mr. A. G. Burrows, engineer and geologist for the Ontario Government, and at once attracted attention. This well located property is situated within the "Meridian" area, and under scientific testing likely will make good in a big way.

RECOGNIZED AS IN THE FOREMOST RANKS OF HIS PROFESSION, Mr. Burrows' capabilities as a geologist are at once proven by the fact that already in the drill core intrusions of basaltic silt have made their appearance and at very much less length than even Engineer Darwin believed would be the case. The first 150 feet of drilling passed thru a badly shattered formation but from that point down to a depth of 200 feet the diamond drillers are optimistic in view of what has already occurred.

The first 150 feet of drilling passed thru a badly shattered formation but from that point down to a depth of 200 feet the diamond drillers are optimistic in view of what has already occurred.

RECOGNIZED AS IN THE FOREMOST RANKS OF HIS PROFESSION, Mr. Burrows' capabilities as a geologist are at once proven by the fact that already in the drill core intrusions of basaltic silt have made their appearance and at very much less length than even Engineer Darwin believed would be the case.
