THAW IS NOT AFRAID OF A LUNACY COMMISSION.

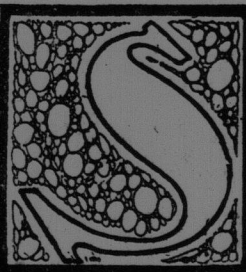

NEW YORK, March 22.—The status of the Thaw case, now that the District Attorney Jerome has furnished Justice Fitzgerald with the affidavits of seven alienists who substantiate his expressed opinion that the prisoner is insane and incapable of consulting his counsel as to his defense against the charge of having murdered Stanford White, is this: By two o'clock tomorrow the attorneys for the defense must file affidavits answering Jerome's assertion and combating his affidavit.

The district attorney has not formally asked for a commission to inquire into Thaw's mental condition, but has left it to the "conscience of the court," as he expressed it on Wednesday. Justice Fitzgerald will consider the affidavits submitted by each side and inform all the counsel when to appear in court to hear his decision. He may defer the weighing of the affidavits, for he may call for more evidence before he makes up his mind what procedure is advisable. In particular he may seek the opinion of Dr. Allan McLane Hamilton, the alienist, who, when called to the stand by the defense on Wednesday, evoked District Attorney Jerome's statement as to Thaw's mental state and brought about the present condition of the case. Should Justice Fitzgerald do this, the defense, it is certain, will strive to bar Dr. Hamilton's testimony on the ground of professional privilege, inasmuch as he was engaged by the defense to examine Thaw. In all this the jury will have no part, although it was excused yesterday to appear in court this morning. This, however, will be a formality, and they will be again excused until it has been decided whether Thaw must undergo an examination as to his sanity.

Notwithstanding District Attorney Jerome's belief that Thaw is a paranoiac and the corroborative opinions of the state's experts that he is practically insane, the defense will make a determined effort to combat the appointment of a lunacy commission or his going to an asylum. His five lawyers met at the office of Delphin M.

USED THE WRONG DYE.

LONDON, March 21.—A woman who was sued by a hairdresser in the Brompton Court yesterday explained that she had to give up employing him because the wrong dye was used six years ago. "They gave me dye," she said, "which turned my hair black, blue and green. It cost me \$50 to get it right again."

Robb Engineering Co. Held Annual Meeting. Years Business Was Good and the Prospects for the Future are Excellent.

The annual meeting of the Robb Engineering Co., Ltd., was held at the Parish House Hall, at three o'clock on Tuesday, the 19th inst.

The president, D. W. Robb, presented the report of the business for the year, 1906, which was adopted unanimously.

We are advised that the statement of the year's business was very satisfactory to the shareholders and all concerned. The output for the year reached about \$300,000 of business at the stock of the Robb Engineering Co. and Newfoundland during the year, many thousands of them among the polyglot immigrants in their many tongues at Quebec, St. John and Halifax as they arrived, and at Winnipeg before they scattered over the prairies.

The Society has forty colporteurs and Biblewomen, Rev. R. J. Bowen, (Church of England.) Ladysmith, C. D., Rev. W. S. Hassard, B. D., (Methodist.) Toronto, and Rev. Thomas Bennett, (Presbyterian) Montreal, were appointed District Secretaries for British Columbia, Alberta, Ontario and Quebec, in addition to other agents in the field.

The General Board consists of 42 representatives of all the Auxiliaries from the Atlantic to the Pacific with Dr. N. W. Hoyle, K. C., as president, Rev. Dean Davis and Rev. Dr. W. D. Armstrong as vice-presidents, Elias Rogers as treasurer and Rev. R. E. Walsh as general secretary.

The Governor General the Earl Grey speaking at the close of the public meeting in Ottawa after addresses by Archbishop Armitage, of Halifax, and Dr. Cameron, of Toronto, said he had come as the patron of the Society to show his sympathy with its objects.

When he heard of the six millions of copies circulated every year, and of the 200 millions issued since the Society was founded, he thought how the output must be the largest output of all the publishing houses in the world. And when he heard how these had been issued not in one, but in four hundred languages, he thought of the complicated work which reflected the greatest credit on the gentlemen who had given their brains to the task.

It was a privilege to belong to a Society which knew no denominational divisions and had a platform broad enough to include all.

THE CANADIAN BIBLE SOCIETY

The Canadian Bible Society at its annual meeting just closed at Ottawa, reported an income exceeding that of the previous year by \$10,000. It has remitted to the British and Foreign Bible Society \$30,000 being \$12,000 more than former contributions.

At the same time the cost of the work in Canada had been met and a much larger balance of \$10,000 is kept to carry on operations on an extended scale throughout the Dominion. Nearly 90,000 copies of Scripture were circulated in Canada and Newfoundland during the year, many thousands of them among the polyglot immigrants in their many tongues at Quebec, St. John and Halifax as they arrived, and at Winnipeg before they scattered over the prairies.

PRINCE OF WALES COLLEGE TO JOIN

The Montreal Star, referring to the affiliation of Prince of Wales College with McGill, says: "The college, instead of trying to branch out into mining, metallurgy and other higher forms of education, will limit its curriculum to a thorough training in the first two years of arts or science. These two foundation years will then be accepted by McGill in exactly the same manner as a very important factor in the educational development of Canada, and covers in a way which no other action could, the idea of unification which eventually must lead to the higher education of coming generations."

This affiliation is looked upon as a very important factor in the educational development of Canada, and covers in a way which no other action could, the idea of unification which eventually must lead to the higher education of coming generations.
