

ALONE
gent and faithful, and tender and true,
saying and thinking and working for you—
leaving all-mercifully sorrow for years—
Hopefully striving to conquer my fears:
O, did my patience, my tenderness, truth,
Suffice not more than the blight of my youth:
O, did my love, my wild energy, lack,
Give me the peace that I have lost for years:
O, did my love, my wild energy, lack,
Give me the peace that I have lost for years:
You cannot, too lightly you cast me aside,
And for you and all others those feelings have
died.

Yet, though the hopes that I cherished are dead,
Though the light from my spirit forever hath fled,
Though "new doubts in God" which I doubted
in you
As my standard and type of the dead and true;
O'er the wreck of my life I would never repine,
If the peace I have lost were added to mine.

Tax Payers.—Whoever feels disposed to
throw a reproach or slur upon the Printer let
them read the following from the *Proctor* (11),
Journal, in which we find a tribute to "the art
Preservative of art."
"He is only a Printer!" Such was the sneering
remark of a leader in a circle of aristocracy—the
colossal quail. Who was the Earl of Sandwich?
He was only a Printer. What is Prince
Frederick Williams, but married to the Princess
Royal of England? He too is only a Printer.
Who was William Caxton, one of the fathers of
literature? He is only a Printer. What was O. P.
Morris, N. P. Willis, James Gates, Charles
Richardson, James Harper, Horace Greeley, Esq.,
Taylor, Charles Dickens, Thackeray, Douglas
Jerrold, George D. Prentiss, and Senator Dix?
Cameron, Miles, and Bright? They too were
Printers. What was Benjamin Franklin? He
was a Printer. And last, what is James
Buchanan, who occupies the most enviable posi-
tion on earth? Only a Printer! Every one con-
fute a Printer—brains are necessary.

A correspondent asks through the N. Y.
Medical Record, whether "Is it proper for the
congregation to rise and turn round to face
the choir during the singing?" To this ques-
tion Dr. Lowell Mason replies as follows:
"Our own taste, or sense of propriety, says
it is not. It seems to be disrespectful to the
pulpit, from whence comes the offer of life—
It is a sign of forgetfulness of the true design
of singing, and to the mere gratification of the
eye, or ear, or criticism, etc. We think it
much better for the people to rise, face the
pulpit, and join heart and voice in the song."

PHYSIOLOGY IN THE QUEEN'S DOMESTICS.—
Within the past few years much interest has
been manifested in the science of Phrenology
by the good people of New Brunswick and
Nova Scotia. They have read the works on
the subject, and satisfied themselves of its utility
and of its application to the moral and intellec-
tual development and improvement of man.
To carry out this, and to obtain the fullest pos-
sible information, with all the latest discov-
eries they have invited Prof. L. N. Fowler, of
our firm, to visit them professionally, and to
give them the benefit of his extensive research
and experience in this direction. He has, we
believe, concluded to visit those Provinces
some time during the coming months of Aug-
ust and September. Further particulars will
be given in our next.—*New York Life Illus-
trated.*

THE LAND OF BLOOD.—The most disgraceful
fact of the year, in the policy of both Eng-
land and the United States, is the almost in-
cessant they show towards Spain, in every
point of view—from the shameless wanton
on the throne to the brigand on the mountain,
from the corrupt Concha at Havana to the
paranoid Serrano of Madrid—we have yet
the melancholy exhibition of America allow-
ing these brutal, blood-thirsty Spaniards to
murder a hundred and fifty American citizens
in cold blood, and of England permitting
such a miserable Government to carry on the
slave trade with impunity.—*American paper.*

HEAT OF THE SUN.—On Wednesday one of
the trucks on the railroad between Rochester
and Buffalo, N. Y., discovered that the rails
were hot in several places, and an examination
showed that the heat of the sun had expanded
the rail that it had curved each way—It being
the combination rail—fully six inches out of
line. All this expansion must have taken
place within two or three hours, or not more
than that time had elapsed since trains had
passed over the track. The discovery was
made just in season to warn approaching trains
of the danger.—*State of Maine.*

The Paris "Constitutionnel" on the Diffi-
culty between England and Spain.
The Spanish Press and public opinion have
repeated the bitter charges of England in
alluding to the "ille iniquitate" of Spain
which was well calculated to wound the self-
esteem of a generous nation, and which, more-
over, offered a singular contrast with the de-
ference and courtesy to the United States. If
certain planters in Cuba act improperly in
purchasing slaves from the slave-dealers, they
are also all one people, and the same people
guilty parties, namely of those who exploit
slave dealing. How is it, therefore, that the
latter are denounced while the complaints of
the former are recognized as legitimate? How
are we to appreciate this employment of two
weights and two measures with the rules of
justice? Thanks to the possession of Gibraltar,
an enormous quantity of English merchan-
dize is smuggled into Spain, to the preju-
dice of the Spanish customs and the national
industry. Will this abuse be attributable to
the Spanish government? The Bible Societies
inundate the Peninsula with books and
tracts which attack the Catholic religion and
the Pope. There are probably Spaniards
who purchase these books, since there are so
many agents who deal in them. But it will
be said that the Spanish Government makes
common cause with the publishers of Protes-
tant Bibles? Before declaring a country to
be responsible for reprehensible deeds com-
mitted by private individuals in distant colonies,
it is essential that the accusing party should
have entire conviction of his own innocence.—
The Spanish journals have more than once
commented on the fact that England, in spite
of her friendship for Spain, has kept possession
of Gibraltar. They moreover, mention that
under the first Empire, the English troops
pillaged all the fortified places, which they
captured from the French, such as Ciudad
Rodrigo, St. Sebastian, Badajoz, which had
enjoyed peace and protection while occupied
by our troops.

The *Constitutionnel* concludes by recom-
mending the Madrid press not to attack un-
importantly to the language of Lord Malme-
sbury, nor to suppose for one instant that Eng-
land would permit Cuba to be taken from the
Spanish crown.

A MEDICAL REVOLUTION! THE WORLD UNANIMOUS. HOLLOWAY'S OINTMENT.

THE GREAT CENTER IRRITANT!
The virus of disease often makes its way to the
internal organs through the pores of the skin. This
penetrating Ointment, meeting under the hand as
it is rubbed in, is absorbed through the same chan-
nel, and, reaching the seat of inflammation,
promptly and variously subdues it, whether locat-
ed in the kidneys, the liver, the lungs, or any other
important organ. It penetrates the surface of the
interior, through the countless tubes that com-
municate with the skin as summer rain pours into
the earth, earth diffusing its cool and regenerat-
ing influence.
SKIN DISEASES & GLANDULAR SWEL-
LINGS.
Every species of exterior irritation is quickly
relieved by the anti-inflammatory action of this
Ointment. Angry Eruptions, such as RAZOR
BURN, ERYTHEMA, FURUNCLES, BRUISES, OR
SCALDS, &c., die out, to return no more unless its applica-
tion Hospital experience in all parts of the world
proves its infallibility in diseases of the skin, the
members, the joints, the glands, and any other
important organ. It penetrates the surface of the
interior, through the countless tubes that com-
municate with the skin as summer rain pours into
the earth, earth diffusing its cool and regenerat-
ing influence.
