1. Civil Engineering ; 2. Mining Engineering ; 3. Mechanical and Electrical Engineering ; 4. Architecture ; 5. Analytical and Applied Chemistry ; *University of Toronto. (a) First Term. (b) Second Term. Subjects not numbered are common to all the departments. In the departments of Analytical and Applied Chemistry all hours not otherwise allotted are to be spent in the laboratories. The work in the Physical Department is completed on November 11, and for department 1 on March 17, after which the students in these departments are expected to take drafting during the summer months. The work in the department of Physics, and in the department of Metallurgy, is completed on November 11, and for department 1 on March 17, after which the students in these departments are expected to take drafting during the summer months. Saturdays from 9-12 will be devoted to Field Work during the months of October and November and to drafting during the balance of the session.

FOURTH OR POST-GRADUATE YEAR.

There is no regular time table for the work of this year. The time of the students is spent almost wholly in the engineering, chemical and assaying laboratories. The hours are from 9 a.m. to 5 p.m., every working day during the session. Lectures are given at such intervals as suit the laboratory work.
