- 92—Mt Pleasant av and Douglass av.
- 93—Backfriars and Wilson av.
- 94—Empress av and St Andrew.
- 95—Wharncliffe rd and Oxford.

DIRECTIONS FOR GIVING FIRE ALARM.

Break the glass which covers the key. Unlock and open outside door. Then listen, and if you do not hear the little gong inside striking, pull down the hook as far as it will go once only and let it go back to its place. If you do hear the gong striking, wait until it is done. Then shut the outside door tight and unlock and open it again and pull the hook down, as above directed. Always shut the outside door tight before you leave the box, and, if possible, wait until the firemen arrive, and direct them to the fire if it is not visible. After pulling down the hook, if you do not hear the little gong striking or the box working, shut the door and go to the nearest telephone and call the fire department.

Be careful to protect your hands from the broken glass while unlocking the door.

Don't open a box unless to give an alarm for a fire. Don't give an alarm for a fire outside the city, or for a chimney fire, or for a fire a long distance away, unless you are on a line with it and the fire stations. Don't try to take the key out of the lock, as it is locked in. Two strokes on the gong, or City Hall bell (after an alarm is given), is a signal that the fire is out.

Parties erecting or moving houses, cutting down or trimming trees, or doing work of any kind on the streets, must not interfere with the fire alarm boxes, wires or poles. By leaving notice at the nearest fire hall, any alterations necessary will be promptly attended to.

Citizens will confer a favor by immediately reporting to the nearest fire hall any damage to the boxes or the fire alarm wires or poles.

How to count the number of the box from the bell.—Suppose box 34 is pulled: you do not get 34 consecutive strokes on the bell or gongs; but first you will get three distinct blows, which represent the tens, or 30; then a pause of four seconds, after which four blows will be struck, representing the units, or four, thus:—1 1 1—1 1 1—34. Box 314 would be struck the same way, thus:—1 1 1—1—1 1 1—314.

Single numbers up to nine are struck consecutively without a break until the whole number is given. The number of the box will be repeated four times with an interval between. After the first alarm, two double blows, thus:—1 1—1 1 followed by the number of the same box on the bell will denote a second alarm for the same fire to which all the apparatus will respond.
