"You must have called me late this morning, Sylvia. It was twelve o'clock when I reached the office. And I had an important appointment for ten o'clock, too."

"Why, I called you at seven-thirty, John!"

"Was the clock right?"

"Yes; I set it last night when you came home. You remember, I called downstairs when you came in and asked you what time it was, and you said it was ten-thirty. The clock in my room said one-forty-five, so I turned it back to agree with your watch, and, of course, I called you by the correct time this morning."

**She Had Such Beautiful Hands**

that it was perfectly evident that she used SNAP, the original hand cleaner, to remove the grime of housework.

Hand cleaners by any other name do not smell as sweet. Avoid rank imitations, and remember the name

**SNAP**

## GOSSIP.

## CATTLE AT THE WINTER FAIR.

Beef cattle at this year's Winter Fair will compete for \$2,500 in prizes. The prize list has been supplemented by \$100 from the Dominion Shorthorn-breeders' Association; \$80 from the Canadian Hereford-breeders' Association, and \$50 from the American Aberdeen-Angus-breeders' Association, in the classes for their respective breeds. In addition to this, the Shorthorn men are offering \$50 in prizes for grade steers, sired by a Shorthorn bull, and an equal amount for grade steers sired by a Shorthorn bull and shown by amateurs. The Hereford Association will supplement all prizes won in the class for grades or crosses of any breed by animals sired by Hereford bulls, and will add \$100 to the grand champion prize if won by an animal sired by a Hereford bull. The Canadian Aberdeen-Angus-breeders' Association is offering \$100 in a special class for Aberdeen-Angus grades. In this class, the sections are for steer or heifer, two years and under three, and for steer or heifer under two years, not one and under two, as stated in the official premium list. This will allow calves to compete for prizes in the latter section. In the section of dairy cattle, the Fair Board has increased all first prizes by five dollars over last year's offering. In the sections for Shorthorns, Ayrshires, and Holsteins, the prizes have been supplemented by \$45, \$200, and \$375, respectively, by their respective breed associations. Special attention is drawn to the fact that the first prizes for Holsteins are: for cow 48 months or over, \$55; cow 36 months and under 48, \$55, and for heifer under 36 months, \$50. Other prizes are given in the official premium list. The Holstein and Ayrshire-breeders' Associations will also supplement the championships in the various classes if won by animals of their respective breeds. The prizes offered for dairy cattle total \$1,700.

## MORE RECORDS BROKEN IN CONNECTION WITH THE CHICAGO STOCK SHOW.

With its \$75,000 offered in prizes, and its entries closed, the International Livestock Exposition, which will be held on the dates of November 30 to December 7, inclusive, at the Union Stock-yards, Chicago, has broken all records in every department in regard to the number of exhibits. Every breed of cattle, sheep, swine and horses, will be represented on a much larger scale, the arrangements for the show have been better provided for, and the great Stock Show of 1912 should go down into history as the most comprehensive, the most complete, the most modern, advanced, and up-to-date of all the exhibitions, wonderful as they have been, which have preceded it. Such a statement of facts as this is positive proof of the importance of the event, and how it is regarded by the stockmen of the country. It not only offers to breeders, feeders, farmers, and others who are interested in the live-stock industry, a school of analysis, but a free and liberal education in everything that a stockman requires, and present to the sons of these men an opportunity for obtaining that information, and insight to the stockman's business so necessary, so indispensable to them in after years.

Breeders, feeders, and farmers, who are developing a business of the kind, or who have already developed one, and who have sons ready to step into their shoes when they shall have cast them off, and put upon them the slippers of ease and restfulness, owe to these young men the privilege of seeing this extraordinary Exposition, and imbibing that knowledge without which they will be sorely handicapped when they come to compete with those who have taken advantage and profited by the opportunities it affords.

Money spent in attending this show is money invested in gilt-edged security that will return interest at the rate of a hundred per cent.

Binks-Tomlin is one who suffers from liver. He has a little canter every morning before breakfast.

Winks—Yes, I know. And he has a pretty big de-canter every night after dinner.

# Buy this DAIN PRESS for Heaviest Work

**B**UILT with particular attention to the needs of the man doing custom baling, it will stand the knocks of transportation and hard wear.

The Dain Belt Power Press has large capacity and combines many time and labor-saving devices, which makes it the most profitable hay press to operate.

One of the greatest advances in hay press construction is the Dain automatic condenser hopper.

The feature of the condenser hopper and self-feed working together increases capacity and decreases cost of operation by requiring less labor than other machines.

Pitman is I-beam steel, rigid and substantial.

tial. Plunger is all iron and steel, therefore not affected by damp weather or wet hay. Gears are large and have strong heavy teeth. Pitman is operated by twin drive gears insuring true, perfect application of power. Long shaft bearings hold shaft in perfect line and insure proper meshing of gears, which lessens friction and saves power. Fly wheel runs smoothly. Is large and heavy so it carries plunger over heavy part of stroke. Friction clutch gives perfect control.

The Dain automatic tucker folds every charge of hay, making smooth, neat and square-ended bales.

Blocks are inserted automatically by self-feeder, and are conveniently located for operator.

Baling case is carefully constructed as it must stand terrific strain in forming bales. Heavy steel angles and plates are used re-inforced with trusses, and all liberally riveted and bolted.
