The 700-Foot Level of the Le Roi Has Some Rich Ore.

SHIPMENTS ARE STEADY

Colonel Peyton, the Manager, Has Gone round, it will be impossible to operate H. B. Smith Appointed City Engineer. to London on a Visit and Perhaps to Sell the Property-Work to Be Commenced on the Royal George.

in the 700-foot level of the Le Roi, and at that point the showing is the finest that has ever been encountered in the the coast towns, and everywhere you mine. The ore shows a considerable increase in values, and an average of about four per cent copper is being obtained, Wrangle, where there are 40 restaurants, while gold values run as high as \$159. although the population is only about The pay streak in which the high grade 3,000, and half of that does its own ore is found is about six feet wide, but the width of the vein has not been ascertained. The fault that was met with at the 600-foot level has disappeared.

The west drift at the 600-foot level is in 455 feet, and the ore body continues very fine. The winze to connect the Black Bear tunnel is down 45 feet.

The shipments continue steadily at the rate of 200 tons per day, and the Le Roi smelter at Northport, under the skillful management of James Breen, is moving along without a hitch. At present only one blast is being used, but about the 15th of the month the second will be started, and the quantity of ore that has accumulated in the roast heaps boys, were playing on the side hill about ages to the furniture and fixtures of his at the smelter will be treated. The a half block north of the track of the private room in the basement of the task will keep both blasts running for Columbia & Western railway, at the cor- postoffic block, caused by an overflow of

Will Operate the Royal George. Arrangements are being made to commence operations at once on the Royal George, lying on the east side of Columbia & Kootenay mountain, about half way between the milk ranch and the Columbia & Kootenay. The property is owned by H. J. Raymer, William Dunn and Mike Sullivan. For the present work will be confined to stripping the claim by surface sluicing, a method but little used heretofore in this camp. Milk creek will be dammed and its waters diverted so as to flow over the claim and by washing away the surface soil expose the mineral formation. There is a promising lead of copper ore on the Royal George, and as soon as the property has been prospected in this manner a shaft will be started to open the ledge.

PARTIALLY DEVELOPED MINES FOR SALE.

TELEPHONE 68

Rossland, B. C., April 14, 1898.

Dear Sir:

For the week ending yesterday the volume of business was light. This is attributable to the Easter holidays; extending from Friday to Tuesday.

The most gratifying feature of this market, and one that will interest holders of Rossland securities, is the fact that what may be termed the 'dead' stocks are coming into demand again. It now looks as if every Rossland stock will again be marketable. As stated in our market letter of April 9 over 400,000 shares of Mugwump have been sold at from 3c to 5c. This stock has been practically valueless for over a year. There was a slight flutter in Big Three and an occasional enquiry is still made for it.

Silverine, Caledonia, Grand Prize, Phoenix, Homestake, Commander, Ivanhoe, Iron Colt, St. Elmo. Monita, Big Three and a number of other stocks which have been practically "off the board" are again coming into demand and will soon be sellers.

The sellers are War Eagle, \$1.45; Le Roi, \$7.35; Deer Park, 13 1/2c; Monte Christo Cons., 20c; and Good Hope, 3 1/2c. These five stocks are the best sellers among all the stocks on the list and therefore from the investors' standpoint are the best 'buys.'' We recommend them as the best and there is certainly sufficient divergence in price to leave plenty of room for selection. Except Good Hope small lots of the stock named can be picked up at prices a shade under quotations.

Ymir, Slocan and Boundary stocks also command a sale here, but the preference is for Rossland stocks.

Our clients should not overlook Rossland real estate when looking about for investment. This city is now a permanent one with a large and ever increasing payroll. Eastern money commanding low interest should be put into Rossland real estate. It is a gilt edge investment. Write us for particulars.

Sincerely Yours,

C. O'BRIEN REDDIN & Co.
