ney a soft Irish green of the emerald type.

HONOR HOSPITAL AT CAMPBELLTON
Campbellton, April 20—The Hotel Dieu here has been placed on the roll of honor for hospitals in Canada and the United States. The secretary of the National Hospital commission recently inspected the local institution and was highly pleased with its work, equipment and facilities.

A man about to be married wonders if two can live as cheaply as one and after the first baby comes he wonders some more. But this time it's if three can live as cheaply as two.

SLAIN BY BANDIT
Winchester, Mass., April 20—Ralph W. Brewster, night ticket agent at the Boston and Maine station here, was found dead late tonight in his office at the station. He had been shot through the head by a bandit.

We must take many things for granted and accept much on faith as we go along. Otherwise we shall be miserably discontented.

CHICAGO IS SWEEP BY WIND STORM

Chicago, April 19—Several persons were killed and scores injured by a sixty mile wind that swept Chicago today and uprooted trees, unroofed many buildings and destroyed hundreds of windows and signs. Snow flurries and freezing temperatures followed in the wake of the gales which lashed Lake Michigan into fury. In the downtown district all buildings acted as giant wind scoops, shooting the gale into the streets with such force that pedestrians were swept from their feet.

A mounted policeman was blown from his horse. At one downtown corner seven wagons were overturned in less than two hours. Many automobile tops were ripped from machines.

Tonight the fire department was busy in many outlying sections clearing the streets of trees snapped off or uprooted fallen signs and electric wires.

Scores of persons attending a meeting in the Emmanuel Baptist church on Michigan Boulevard narrowly escaped injury when the top of the spire fell through the roof of the auditorium.

Several persons were injured when the roof of the north side Turner hall was loosened sending bricks into the streets. During the height of the gale the coast guards began a hard tussle to rescue the Uncle Sam, a fishing craft with four men on board which became disabled near the mouth of the Chicago river. The boat was badly pounded by the waves before the men were taken off. The snow flurries and cold were due according to the weather bureau, to a storm in Wisconsin which travelled from Manitoba yesterday and is now moving east across the lakes.

Victims of the storm were struck by flying debris. Little Evelyn Jacobson was struck by a piece of cornice and instantly killed. A man's arm was burned off when it came into contact with a high tension electrical wire blown down by the storm.

Spring And Summer Forest Fires

There are usually two periods of fire hazard in the Canadian forests, in early spring just after the snow disappears, and in late summer, when the vegetation has begun to get dry. Exceptional seasons vary these periods but the two classes of "spring fires" and "summer fires" remain. Many people understand why the dry, hot period of late summer is likely to be favourable to the starting of forest fires but they think that after the heavy snowfall of winter, the woods ought to be safe till early summer at least. A little reflection, however, will show why the early spring period is particularly dangerous. In early spring there is often a short period of hot, bright days. The leaves have not yet come out and the sun shines down through the leafless branches directly on the forest floor. The snow disappears as if by magic and the dead twigs and last year's leaves become dry as tinder. If a glowing match or cigarette stub is dropped among this material the forest floor is ablaze over a space of many yards in a moment. A few days at this period are always most critical. After the first spring rain the ground vegetation becomes green and damp, and the leaves come out and shade the forest floor. The worst danger is then over, until the hot days of late summer cause the vegetation to dry out, when a danger period ensues which lasts till the first autumn rains. The moral of it all is that Canadians ought always to be careful with fires in the forest and doubly careful during these danger periods.

ONTARIO MOTHER HELPS DAUGHTER

Mother—watch your daughter's health. From the time she reaches the age of twelve until womanhood is established she needs your care and advice. Many women have suffered years of ill-health through lack of such care during this time.

Lydia E. Pinkham's Vegetable Compound is a splendid medicine for girls and women. For nearly fifty years it has been helping mothers and daughters. Let it help you and your daughter.

Hamilton, Ontario.—"When my daughter was thirteen and until she was fifteen she suffered every month so that she could hardly move around the house and when she would have the pains in school she would have to be carried home. Besides the pains and the irregularity she also had headache, dizzy and faint spells, and soreness in her back. I saw your advertisement in the 'Hamilton Spectator' and got Lydia E. Pinkham's Vegetable Compound for her. She does not have the least bit of trouble now, and we both recommend your medicine. She works in a candy-shop now and seems well and strong. I give you permission to publish this letter as a testimonial."—Mrs. I. P. CLAUDE, 76 Walnut St., South, Hamilton, Ontario.

Tree-Line Advancing Westward

What has happened in the United States middle west is also happening on the Canadian prairies, namely, the tree-line, which fifty years ago was located a comparatively short distance west of the Mississippi and Red rivers, has advanced several hundred miles into what was formerly the bald prairie. The line has not moved forward bodily but "islands and groves of trees are today to be found like outposts in districts, where there were formerly no trees. This is believed to be due to the fact that the progress of settlement has stopped, more or less completely, prairie fires and given the trees a chance. Progress westward has been slow because the prevailing winds are from the west, and tree seeds are carried largely by wind. In the last fifteen years, however, the rate of advance has been more rapid largely because of the more determined fight against prairie fires. Trees are now spreading southward from the well established forest along the Saskatchewan. In addition to this natural process of forest growth individuals and communities have planted groves all over the West. The Dominion forest nursery station at Indian Head has sent out over sixty million trees to forty thousand farmers in the last twenty years, and this with civic and school planting is helping to change the appearance of the prairies.

SERIOUS FLOODS

Washington, April 20—Four million sand bags were shipped by special train from Schenectady, (N. Y.), today to points along the Mississippi river where the water, reaching an unprecedented high stage, has caused serious damage to property.

How's Business?

Advertising, backed up by the right spirit, the right goods and the right service, can rescue a sinking business and will make a prosperous business more masterful in its own community.

When John Wanamaker, the Prince of Merchants, began business, he resolved to force matters. He was not content to WAIT to be found out—he DETERMINED TO BE found out. In short, he advertised. He threw on his business, small as it was, the light of publicity, and the public of Philadelphia entered the shop on which the light shone.

In this community the public is entering those shops on which the light of advertising is falling.

A Word to the Public

Be sure of this: those who are using our columns week after week do not give you poorer goods or service, or have higher prices.

Shops which are illuminated by advertising court with full confidence your favor.
