Geologists calculate that the amount of solid matter worn away annually from the earth and carried down towards the sea level represents about fifteen cubic miles. If this action worked mathematically it would require 4,000,000 years for the earth to be worn below the level of the ocean. But as the matter disintegrated finds its way into the ocean the level of the water rises inexorably, diminishing the mass of earth remaining for destruction, and it is calculated that 3,500,000 years would suffice for the enguling of the earth by the waters.

According to the professional boxer, who has seen much of gangsters and their ways, "Left Louis" is an accomplished crook and would go almost any route to obtain money.

If the man whom Greenwood most positively states is "Lefty Louis" was that. Home Rule must not be enacted because a section of Ulster was poposed to it, and threatened violence and revolution if the government attempted to carry out the will of the majority. It was ridiculous to say that Ulster was against Home Rule, only four counties out of nine were against it.

As for the talk of revolution, history would repeat itself. There was nothing in the shape of violent utterances and threats of revolution which they are of the New York crook.

Asked by a Capital reporter, Greenwood said.
