When Your Cold Gatches You

JUST THERE

There is no Time to Wait

It is not a "little thing." It's a deadly thing. It will not "get well by itself" if you let it alone. Whiskey and quinine and such things brace you up for the time, but they don't cure you. Ask any intelligent doctor why you catch cold so easily. He will say "You are a bit run He means that the force which nature placed in your body to keep out disease germs—the resistive force—is weaken-ed. The door is open a little way toward disease. Cures a Cold in a night A cold should not be beaten back or drugged over—it should be cured, and the general health should be built up. Dr. Shiloh's Consumption Cure should be taken at the first symptom of cold. This is not merely a consumption cure: it is a tonic for the whole body, a specific for sudden colds, coughs or sore throats. It doesn't matter where the cold is or how it got there, we know that Dr. Shiloh's Consumption Cure will reach it and cure it. It is sold on a positive guarantee. No cure;

If you have a cold-no matter how slight-it means something. Take Dr. Shiloh's Consumption Cure at once. Keep it in the house. If it does not relieve you almost instantly, go to your druggist and get your money back. Mrs. R. B. Prout, of Phoenixville, Pa., says:—
"Every one should know of Shiloh's Cure. We have used it in our family for over six years. It is our doctor and medicine combined."

Shiloh's Consumption Cure is sold by all druggists on a positive guarantee that the purchase money will be returned in case of failure.

CATARRH

Its Nature and Frightful Ending -- How to Conquer Catarrh

Catarrh is an ulderation of the mucous lining of the nose and throat, which begins with "cold in the head," and is marked by such characteristics as:-choking up of the air passages of the head, difficult breathing, droppings in the throat, hawking and spitting, headache, sore eyes, red nose foul breath and deafness. It is a disease most distressing in itself, and, if neglected, leads to consumption or catarrh of the stomach. The mucous lining of the stomach

the nose and throat. Catarrh begins with small ulcers in the nose at A. These uccers spread to the throat at C. and so follow the mucous lining along the oesophagus H and D into the stomach, or advance along the larynx F, and the bronchial pipes S, into the lung J. In the former case the result is catarrh of the stomach, and in the latter, catarrh of the lungs, or consumption.

Neglected catarrh almost always ends fatally. The only hope is to conouer the disease before it reaches the lungs or stomach and this can be done with certainty by following the in-

successful as Dr. Chase's Catarrh cure. Its action is prompt and effective. It clears the air passages, makes breathing free and easy, relieves the pressure which causes the makes headaches, heals the ulcers, counteracts foul breath and positively conquers and cures catarrh.
