Bitter Bread.

Complaint is frequently made by those who use baking powders that they leave in bread, biscuit, or cake raised by them a dis-agreeable, bitter taste. This taste fellows the use of all impure baking powders, and is caused either by their containing alum (introduced to make a cheap article), by the im-pure and adulterated character of other ingreients used, or from the ignorance of their manufactures of the proper methods of com-bining them. These baking powders leave i the bread a residuum fermed of lime, earth, alum, or other deleterious matters, not always, though frequently, tastable in the food, and by all physicians classed as injurious to health. The Royal Baking Powder is free from this serious defect. In its use no residuum is left, and the loaf raised by it, is always to the control of the ways aweet, light and wholesome, and notice-ably free from the peculiar taste complained of. The reason of this is because it is composed of nothing but absolutely pure materials. scientifically combined in exactly the proper proportions of acid and alkali to act upon and destroy each other, while producing the largest amount of raising powder. We are justified in this assertion from the unqualified statements made by the Government chemists, who after thorough and exhaustive tests recommended the "Royal" for Governmental use because of its superiority over all others in purity, strength and ty over all others in purity, strength and
