With the Construction of the Screens, Vibrating Motions and Other Attach-ments I Think it Utterly Impossible

Prince Albert, Dec. 18th, 1882.

To the Editor of the Port Perry Standard:

Sir.—I desire to call the attention of the farmers of this vicinity to a new threshing machine made by the Jos. Hall Manufacturing Co., of Oshawa, called the New Model Vibrator. Mr. Joseph Vickery bought one of those threshing machines, and threshed for me four days this winter, and gave me entire satisfaction. With the construction of the screnes, vibrating motions and other attachments, I think it utterly impossible for any grain to be wasted, and am fully convinced, in my own mind, that it has saved me double the price of threshing in the saving of grain this season. It cleans the grain perfectly and threshes very rapidly. It is the most perfect thresher I have ever seen or used. It is a real grain saver: Yours truly, John McDonald.

The Has No Equal in the County of Elgin.

From the Ontario Reformer, September 25th, 1883.

The success of the New Model Thresher has been without precedent in the history of threshing machines. The Hall Co. received this week the following letter from Mr. Jonathan Yorke, who resides near St. Thomas, one of the oldest threshermen in Ontario. Mr. Yorke bought a New Model on trial, and this letter expresses his opinion after having tested the machine to his entire satisfaction.

Yarmouth Centre, Sept. 23rd, 1883.

"Have Been Threshing for the Past 18 Years and the New Model is the Best One I Have Ever Seen or Used."

Ops, January 9th, 1883. To the Editor of the Canadian Post:

SIR,—A short time ago I purchased a new threshing machine called the New Model Vibrator, made at the Jos. Hall Works, in Oshawa, of their agent, James Fleury. It is the only machine of the kind in this vicinity. I bought it upon a guarantee given me by the Company that it would give me entire satisfaction. I have now thoroughly tested the machine and am entirely satisfied with it as a thresher, a separator and a cleaner. It is easy on the team, threshes rapidly, not liable to choke in any kind of grain, separates the grain thoroughly from the straw, and cleans it better than any other machine I have ever seen. I have seen all kinds of machines, and have threshed myself for the past eighteen years, and the "New Model" is the best one I have ever seen or used.

Yours truly, THOMAS WETHERUP.

Ops, January 9th, 1883.

I have been so well pleased with the

I have been so well pleased with the working of the above machine that I have purchased a share in it. W. Curtis.

ESSEX COUNTY

Harrow, Essex Co., August 15th, '82. Messrs. The Joseph Hall Manufac

Gentlemen, — We, the undersigned farmers living in this locality, beg leave to testify to the merits of your "New Model" Vibrator, purchased of your agent, 'Mr. Jackson Quick, and operated by K. M. Manning. We have had it thresh for most of the undersigned, and all of us can speak from experience. Having watched it closely in the wheat and oats, we have much pleasure in stating that for quantity and quality of work done, the "New Model" surpasses any machine we have had to do with. It makes no difference how wet the grain may be, the "New Model" works satisfactorily, never cnoking in the shoe. We have also tested it thoroughly in extreme light oats and never could find a single oat lost. Farmers will gain by getting the "New Model" to do their threshing.

C. A. TAYLOR, WM. MCCORMICK, HENRY WALTERS, M. W. MCCORMICK, JOHN H. POST,

To the Farmers and Threshermen of Canada:

Our "New Model" Vibrating Threshing Machine has now been in use in the United States four seasons, and in Canada three seasons. As a perfect Grain Thresher, Separator and Clean stands without a rival on this continent.

We invite any and all parties who may desire a threshing machine to inspect the New Model Vibrator, or send for our descriptive catalogue, which will give full information. We guarantee that every machine we send out will give entire satisfaction or we will return the notes or cash which may have been given us for the same.

No less than 1200 machines were sold in the United States last season. We have now a very large force of men employed, and can turn out three or four threshing machines per day. Also, en-

gines, horse-powers, clover threshers, &c., &c.
