

tion, and the shrewd discussion of several controverted points make the book good reading.

Candida. A story from Ceara. By Mary Hoge Wardlaw. The Presbyterian Committee of Publication, Richmond, Va. 352 pages.

Candida is a Brazilian girl, cast off by her Roman Catholic family for having married a nominal Protestant. First, the husband is converted and becomes an earnest Christian. Then Candida herself, not without long resistance and only after having undergone severe trials, is brought into the light. The development, under the influence of the gospel, of a beautiful character, sweetened and strengthened by many sorrows, and its influence for good upon others, is traced in a story full of interesting incident and bright dialogue. The writer bears an honored name and speaks from personal knowledge of the field.

Called of God. By the late A. B. Davidson, D.D., LL.D., Litt. D. T. and T. Clark, Edinburgh. The Upper Canada Tract Society, Toronto. 336 pages; price \$1.75.

This is a volume of biographical sermons. But before we come to the sermons we have a biographical sketch of their author, the great Professor A. B. Davidson, of the Free Church College, Edinburgh, over which the reader will love to linger. Our interest never flags as we follow the career of the shy, shortsighted, farmer lad, with his strong, stern father, slow of speech but kind of heart, and his mother, so quick of wit and resolute of purpose, who at last reached a college chair, in which he exercised a

unique influence over many successive classes of students. We have called the sermons biographical. This does not mean that they contain a detailed account of the lives of the scripture worthies with whom they deal. The plan followed is to select some critical moment and show how the man's behavior in it revealed his character and influenced his future. The subjects of the sermons are: Abraham, Jacob, Moses, Saul, Elijah, Isaiah, Jeremiah, John the Baptist, Nicodemus, Zaccheus, the Rich Young Ruler, and Thomas.

Memorable Places Among the Holy Hills. By Robert Laird Stewart, D.D., of Lincoln University. Fleming H. Revell Company, Toronto. 250 pages; price \$1.00.

Memorable Places is supplementary to The Land of Israel, Dr. Stewart's admirable book which appeared about three years ago, and which sought to give "the real historic setting to the real historic narrative." It is supplementary, and yet new and fresh. The idea is fine—"to describe the places that come most frequently and prominently into view in connection with the story of redemption," to interlink with its memorable places "the sweetest story ever heard in earth or heaven." And the plan is well carried out: the author is a hard student, a wide reader, and a close observer. There is always room for another book on the Holy Land, and every book that helps us to see with our own eyes the setting of such events as the birth of Jesus, the calling of the disciples, the conversion of Saul of Tarsus, is heartily welcome.

University of Toronto

FACULTY OF MEDICINE

THE regular course of instruction consists of Four Sessions, of eight months each, commencing October 1st. There is a distinct and separate course for each of the four years.

The degrees conferred by the University of Toronto in Medicine are Bachelor of Medicine (M.B.), and Doctor of Medicine (M.D.). Students may take a combined course in Arts and Medicine if they wish to do so. Arts students who are taking the Honor course in Natural Science are able to fulfil the requirements of the primary work in medicine during their final years in Arts, and thus it is possible to obtain the degrees of B.A. and M.B. upon six years' University training.

Attention is directed to the efficient equipment of the University laboratories for instruction in the practical subjects of the Medical curriculum. The new building of the Medical Faculty has just been completed at a cost of \$175,000.00, in the Queen's Park, and affords extensive laboratory accommodation for Pathology and Physiology which is unsurpassed. The lectures in the final subjects are also delivered in the new lecture theatres. Instruction in the other subjects of the medical course are taught in the various science laboratories and lecture rooms of the University.

To meet the requirements of the Ontario Medical Council, a course of instruction is conducted during a Fifth year. This is entirely optional as far as the University of Toronto is concerned.

Clinical teaching is given in the Toronto General Hospital, Burnside Lying-in Hospital, St. Michael's Hospital, Hospital for Sick Children, and other medical charities of Toronto.

There are special research scholarships offered to graduates in Medicine, and every opportunity is now offered for scientific research work in any of the various laboratories of the University, under the direct supervision of the Professor in charge.

The Faculty provide three medals for the graduating class (one gold and two silver). There are also scholarships available for undergraduates in the First and Second years; these are awarded to the candidates on the results of the annual examinations.

Further information regarding scholarships, medals, etc., may be obtained from the Calendar, or on application to the Secretary.
