**A RECO DIVIDEND.**

The Reco Mining and Milling Company will pay a dividend of \$50,000 to all stockholders of record at noon today. Hereafter this company will pay quarterly dividends.

This is the fourth dividend paid by the Reco. The first, of \$7,500, was paid in 1895; the second, of \$30,000, in 1896; one dividend of \$100,000 and the present one of \$50,000 have been paid this year, a total of \$187,500.

"The Reco was located in 1892," said J. M. Harris yesterday, "and is now developed by about 6,000 feet in the seven tunnels. Thirty men are now employed in extending all of the tunnels. The concentrator and tramway recently ordered will be finished by September 1, and within ten days the work of preparation will be commenced. The tramway will be a mile and a quarter in length. When the concentrator and tramway are completed we will commence to mine the vein on the original discovery. This vein will average twelve feet in width on clean and concentrating ore."

Mr. Harris will leave today for Sandon.—Spokesman.

**BOUNDARY MINING NEWS.**

Prospectors are beginning to flock into the hills in the neighborhood of Christina lake. Last week, it is stated, about 150 men arrived in the camp.

The contractors sinking on the Republic are making about 1½ feet a day and the ledge has widened to four feet. The shaft is being sunk on the hanging wall.

As was predicted in a former issue, prospectors are already beginning to strike out for the new field up Kettle river. Several parties left this week with supplies.

Messrs. Young and Aspinwall, who hold a bond on the Monarch, in Greenwood camp, are visiting Fairview and are expected to arrive in Boundary next week, when a force of twenty men will be put to work on the properties.—Boundary Creek Times.

Head Office: McKinnon building, Toronto, Canada.

Rosland office: Columbia avenue, near Grand Union Hotel.

Represented by GEO. GURD, Secretary.

**LE ROI'S DIVIDENDS.**

Three hundred and seventy-five thousand dollars—that is the sum the Le Roi mine has paid in dividends since October, 1895. Thirteen dividends have been declared so far by the company, the first on the date named and the last on Thursday. Two of them have been for \$50,000 and the rest for \$25,000.

At a meeting of the Le Roi directors, held on Thursday, the regular monthly dividend was declared. It was for \$25,000, and was payable immediately. The last previous dividend was for a similar sum and was declared March 27.

It was the intention of the company to pay a dividend of \$50,000 this month, but the mud slides and other trouble on the railroads prevented. Delay resulted from these accidents in getting ore to the smelters—"We have cars of ore scattered all along the line in course of shipment," said Colonel W. W. D. Turner, president of the mine.

The dividends paid to date are as follows:

October, 1895.....	\$ 25,000
January, 1896.....	50,000
February, 1896.....	25,000
April, 1896.....	50,000
June, 1896.....	25,000
August, 1896.....	25,000
October, 1896.....	25,000
December, 1896.....	25,000
January, 1897, two dividends.....	50,000
February, 1897.....	25,000
March, 1897.....	25,000
April, 1897.....	25,000

Total.....\$375,000  
—Spokesman-Review.

**Ontario's Producers.**

By their actual output in bullion must the gold fields of any country be judged, and it begins to look as if when put to this practical test the mines of Ontario will make a splendid showing before the world.

For some time past the Mikado, the Regina and the Sultana have been turning out the precious metal, and this month two other properties in Northwestern Ontario have been added to the list of producers.

These are the Foley and the Empress. Bricks valued at \$6200, being the result of the second mill run of fourteen days on the Foley, have been on exhibition at Wyatt & Co.'s offices for the past two days, and yesterday Aemilius Jarvis received a neat brick from the Empress mine. This brick, which weighs 120 ounces, and is worth between \$1800 and \$2000, is the partial result of the first run of a few days of the Empress ten-stamp mill, and in giving the list the Canadian Gold Fields Deloro mine should not be overlooked, for despite the silence of the officials thereof, this property is from week to week producing bullion.

These actual gold producers, if it is to be remembered, represent four distinct and widely separated districts. The Sultana, Mikado, and Regina are located in the Lake of the Woods country; the Foley mines are on the Seine river, the Empress is in the Jack Fish region, and the Deloro property is down in Hastings county.

The fact, therefore, that gold bricks are coming in from the lot may be taken as proving that has at least a quartet of extensive districts capable of directly lining men's pockets with the yellow stuff.

Facts like these are what will bring outside capital into the province, and by the end of the summer, when half a dozen other properties, such as the Saw Bill, Hawk Bay and Hammond Reef are yielding bullion, it should not be difficult to prevail upon Englishmen and Americans to invest their piles in Ontario.—Toronto World.

THE policy of the United States was adopted not to keep aliens out, but to force them into citizenship when they came in. Surely we do not want American citizens to become citizens of Canada. They have made such a glorious hash of their own institutions that the less they meddle with ours the better. Therefore, this legislation must be framed to keep aliens out. O, feeble-minded legislators! Here are our mountains of British Columbia teeming with mines of untold and as yet ungarnered wealth and crying out for the muscle, brains and energy that will redeem them to the uses of civilized humanity, and we debar thousands of experienced men who ask no greater reward for the labor of their lives than the chance of making a few thousand dollars by the discovery and sale of some undeveloped bonanza.

THE location of a mineral claim is not an appropriation of wealth which impoverishes the community to the advantage of the individual, but a discovery which permanently enriches the country in which it is made. And that is the root of the whole question.

WOULD England have been today the seat of the great textile industries they introduced if she had not given the French Huguenots free asylum and opportunity when they fled from oppression at home? Would she today have been the financial centre of the world if she had not afforded to the Jews and Lombards security for life and property and equal opportunity before the law? It has always been our boast that wherever the Union Jack waved there was freedom and equality of opportunity to Jew and Gentile, black man and white. This great democratic ideal has been more nearly fulfilled in the British Empire than among any other people, and has given us a higher and more fervent citizenship than any other nation. And that principle which has made the Empire can alone conserve it. Let us breed good citizenship in aliens by proving that our country's laws are the best for all men to live under.
