THE death is announced of an old Winnipegger, Dr. J. A. Greig, at North Yakimo, Washington, U.S.A. Dr. Greig was a native of Kincardine, Ont.

THERE were 570 patients treated in the Toronto General Hospital during February. Twenty-one died and there were ten births in the lying-in department.

DR. J. D. LAFFERTY, Registrar of the College of Physicians and Surgeons of the North-West Territories, is spoken of as a likely Lieutenant-Governor of Alberta, once that province is created. Dr. Lafferty practises at Calgary.

THE Canadian Association for the Prevention of Tuberculosis, which meets at Ottawa on the 15th of March, has petitioned the Hygiene Committee of Montreal, asking to co-operate with Montreal City Council in the establishment of a sanatorium in the Province of Quebec.

A NEW wing was opened in connection with the Woodstock, Ont., Hospital, on the afternoon of the 14th of February. Amongst those present from Toronto were Dr. Charles O'Reilly, superintendent of the Toronto General Hospital; Dr. H. A. Bruce, Dr. L. L. Palmer, and Dr. B. E. McKenzie.

DR. WM. BURT, President of the Ontario Medical Association, recently paid a visit to the city to review the work done by the two main committees in advancing the Association's interests for the year. A considerable number of papers have been promised—these, with the assurance of Dr. Ochsner's presence already guaranteeing the success of the meeting. This will take place Tuesday, Wednesday and Thursday, the 6th, 7th and 8th of June, in the Medical Buildings, Queen's Park. The character of the work done by this parent Association of the province warrants the attendance of every practitioner who can get to hear the papers presented.

OFFICE OF THE PROVINCIAL BOARD OF HEALTH.—Deaths for January, 1905, from all causes as reported by 760 division registrars for the first month of the year are 2,216, and for the same month last year 2,200 were reported from a somewhat similar population. The population represented in these returns is 2,019,590, which makes the mortality rate 13.1 in 1,000, being the same as in 1904. As may be seen by the comparative table the total number of infectious diseases show a slight increase, which is largely due to the more complete return of measles, there being 236 more cases, but it is pleasing to know the deaths
