

ARCHITECTS

Do You Know That The

KING RADIATOR

is without question the most perfect steam and hot-water radiator both in design and manufacture on the Canadian Market ?

YOUR new plant has been in operation for some time and we are now in a position to supply a complete line of steam and hot-water radiation.

The patterns of our "King" Radiators will be found to be the most artistic heretofore produced in both plain and ornamental designs. They are handsomely built in asthetic proportions and the relief ornamentations are such as readily lend them to various combinations in color decoration.

The "King" is a screwed nipple radiator and every section we guarantee to have the full amount of rated surface. The superior quality and smoothness in finish of the castings used in the manufacture of the "King" is a feature of great importance.

"Investigate the 'King' and become acquainted with the best Radiator in Canada."
