

LIST OF TABLES (continued)

<u>Table Number</u>		<u>Page Number</u>
4-3	Summary of studies reporting results of SO ₂ exposures under laboratory conditions for various tree species.	4-17
4-4	Effects of long-term controlled ozone exposures on growth, yield and foliar injury to selected plants.	4-27
4-5	The number in 1980 and 1981 that ozone concentrations exceeded the USEPA standard of 0.12 ppm along the U.S./Canada border.	4-33
4-6	Summary of growing season: daylight ozone trends in rural locations in southern Ontario, 1976-81.	4-34
4-7	Summary of growing season: daylight ozone trends in urban locations in eastern Canada, 1976-80.	4-35
4-8	Representative tolerance limits to simulated acid precipitation.	4-41
4-9	Effects of mixtures of SO ₂ and O ₃ on plants.	4-47
4-10	Acidity related reactions influencing availability of several elements.	4-55
4-11	Terrestrial factors and associated criteria limits to assess forest productivity sensitivity.	4-65
4-12	The sensitivity of various soil categories to acidic deposition.	4-66
4-13	Theoretical sensitivities of terrestrial ecosystems to acidic deposition effects.	4-68
4-14	Terrestrial factors and associated data bases utilized for terrain characteristics mapping in eastern Canada and the eastern United States.	4-76
4-15	Soil chemical classes and areas dominated by histosols in the eastern United States.	4-77
4-16	Terrain characteristics of eastern Canada summarized by soil category.	4-79
