

this bill earlier this year. I would like to quote a couple of paragraphs from it as follows:

The Palliser Wheat Growers are deeply concerned with any farm produce legislation in Canada that attempts to assist the producer by abdicating the role of decision making to non-producers—particularly as it relates to the production and marketing of his product.

Whereas we reject the principle of autocratic type marketing legislation in its entirety, we will not deal with specifics within Bill C-176, but instead we wish to spell out the trend of events that may be expected to follow if the bill is enacted.

*Farm Products Marketing Agencies Bill*

We, the wheat growers, see Bill C-176, in its present wide encompassing form, as a monolithic monster, completely devoid of reality, and totally unnecessary in the prairie region, where we as producers of agricultural products must export to survive.

I could continue, Mr. Speaker—

**The Acting Speaker (Mr. Laniel):** Order, please. It being six o'clock, the House will now adjourn until two o'clock tomorrow afternoon.

At six o'clock the House adjourned, without question put, pursuant to Standing Order.
