

## LET US BUILD UP FOREIGN TRADE

All the markets of the world stand wide open to Canadian trade. The greatest opportunity in our national history as a manufacturing and exporting country is ready and waiting.

We must not let this opportunity slip by.

European conditions lead us to believe that on this continent we may lead the world.

Canada will have at least one-half of the wealth and responsibility that follows this leadership.

We must put ourselves in training for these great things to come.

By co-operation; by an appreciation of the fact that the relations of capital and labor have changed for the better for all time, we must make ourselves ready.

This country stands on the threshold of hitherto unimagined greatness.

Let us set our own house in order so that we can be prepared for it.

Bulletin No. 19.
