Missing, beliewed killed in action-Chas, Farr, England. Salonica as friends of both Greece and Serbia, he said. Their sole desire was to prevent Greece from becoming enmeshed in the Germanic net and to save her from internal strife. Whatever apparently drastic measures had been taken were dictated solely by the necessity of preventing Athens from becoming the centre of German propaganda and intrigue. Declaring that the entente allies

were in hearty sympathy with Eleutherios Venizelos, former premier, Mr. Asquith asked how Greece could possibly stand aloof from a war for the emancipation of smaller states. "Greece;" Mr. Asquith continued. "Greece," Mr. Asquitti liberty in "first lit the torch of liberty in of

Europe and withstood the inrush eastern barbarism and tyranny. May Greece rekindle her lamp and show herself worthy of her immortal past." Germans Fine Fighters.

Dealing with the general situation. Mr. Asquith said: "Let there be no illusion about our enemies. They are great organizers and fine fighters in he field. They are also if not skilful yet indefatigable workers in the sphere of propaganda, where they have double motive-to divide the allies and capture neutral opinion." In this connection Mr. Asquith

WAR SUMMARY

THE DAY'S EVENTS REVIEWED

(Continued From Page 1.)

German artillery violently bombarded the Douaumont-Vaux sector and the French guns made adequate reply. 朱

Excepting the discharge of gas against the Germans in the region of Armentieres, the British had nothing unusual to report on their front in France yesterday. Twenty-two tons of explosives were taken from a dugout captured by the Canadians in a recent advance, according to the British war office. At twenty-two tons of explosives per dugout the Germans should not be so short of munitions.

* * * *

The Germans are said by some persons, not admiralty officials, to have sent many submarines thru the English Channel during the recent raid on the sea communications of the British transport to the continent. These have been sniping ships off the southern coast of France and in the channel. The admiralty has greatly strengthened its patrol fleet and hopes to capture all of these. It is possible, however, that with the long cruising qualfties of these craft, many of these have sailed round the coast of Ireland.

By putting the torch to Hirsova before withdrawing, Von Mackensen shows his belief that he will not come back in the Dobrudja. The allies are now within 25 miles of Cernavoda and presumably about the same distance from Constanza, and it is yet uncertain whether Von Mackensen will defend these points and their connecting railway or whether he will continue his retirement until he arrives in Bulgaria again. It is to be expected that he will attempt a stand in the near future, if only to test the strength of the allied advance. Across Roumania from the Dobrudja, the Russians are becoming heavily engaged south of Dorna Watra. The Roumanians have won a success in the Buzeu Valley. On the rest of the Transylvanian front they continue to withstand the German attack.

We know other Machines! Autos Engines, etc Why not our own

We study and admire the machinery invented by man, and too often overlook and neglect that most marvellous machine-the human body.

Body

chino?

To understand and take care of the heart, lungs and liver; the arteries and veins, the skin, the teeth, the eyes and all the intricate machinery of the body, is no small task.

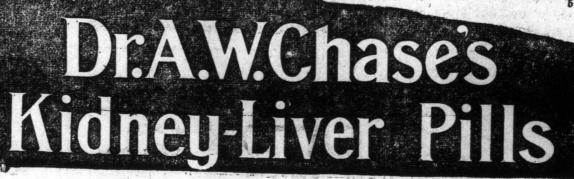

But, unlike any other machine, the body replaces its own wear and waste, and, consequently, the most attention required is that which has to do with the organs of digestion and excretion.

So long as proper food is supplied for nourishment and the liver, kidneys and bowels are regular in their work of eliminating poisonous waste matter from the system, the great majority of human ills are avoided.

In this connection Dr. Chase's Kidney-Liver Pills are appreciated on account of their promptness and efficiency in arousing the action of these filtering and excretory organs, and thereby removing such disorders as liver complaint, biliousness, constipation, indigestion, kidney disease and backache. With these organs in healthful action there is no such thing as Bright's disease, hardening of the arteries and rheumatism

Dr. Chase's Kidney-Liver Pills, one pill a dose, 25 cents a box, all dealers, or Edmanson, Bates & Co., Limited, Toronto.

Do not be talked into accepting a substitute. Imitations disappoint.

criticize someone else, but to ask our-selves what we were doing. "The young man in the trenches tonight is fighting for the defence of Canada just as if he were fighting on Yonge street in the City of Toronto, declared Hon. George P. Graham, in in opposition to that school of thought whose members believed that no Cana-dian should be asked to fight outside the Dominion of Canada. He declared that the purpose of the war should be further emphasized. The war was the result of a conflict that existed for centuries between two systemsthe one that the people should rule and the other that the people should serve, not rule. The right of the peo-ple to govern themselves had been se-cured by the blood of men who have

lived before us, and we would be less than men if we failed to fight for that which had already been won for us. Sir Sam Hughes was given a splen-did reception when he arose to spoak. He said that he was not pessimistic in regard to recruiting. Canada had risen to the occasion every time. It was just a matter of education, and she would do so again. "We can raise the 500,000 men, but we must educate

the men and women as to the rightcousness of the cause, and the game will be easy." He expressed disappointment what, Quebec had done, but explained their failure by the lack of military

organizations in the province, with their inspiration, there being only three regiments in the whole province prior to the outbreak of war. "I pur-pose," he said, "to visit the Province of Quebec, to meet my fellow-country-men, take the matter up with the au-

thorities and let the people of that province become thoroly acquainted with the situation as it is at the pre sent time, and then let them act ac-

with the situation as it is at the pre-sent time, and then let them act ac-cordingly." The following resolution was drawn up and passed: Moved by Chester D. Massey, se-conded oy Rev. Dr. Jas. Allen: "That this great representative meeting of members and adherents of the Methodist Church in Toronto, call-ed by the army and navy board in response to the recent appeal of Sir Robert Borden, G.C.M.G., desires to assure the prime minister of Canada and Lieut.-General Sir Sam Hughes, K.C.B., minister of militia, that we pledge ourselves to do all we can to so influence the Methodists of Canada that to the last man they will respond to this urgent appeal. "We respectfully submit that while our Toronto enlistment of 6.036 out of a Methodist population of 73,281 may be regarded as creditable, yet we will has been reached. We therefore ur-sider again his or her individual re-sponsibility and duty, and before the

sider again his or her individual re-sponsibility and duty, and before the Divine Ruler of the World, in these days of great national need and this crisis of world progress, to make de-

Henry Long of Merritton, Ont., was brought back to Toronto from St. Catharines yesterday afternoon by Detective McConnell to face a charge of passing a worthless creque for \$252 on Hyman Einhore, 141 West Queen street, last June,

Get Thru Cordon Under Cov of Recent Attack by Destroyers.

ENGLISH CHANN

BY ARTHUR S. DRAPER. pecial Cable to The Toronto World. London, Nov. 10.-German subm have been operating extensively in the English Channel and off the sour coast of France. They broke thru the British blockade and ring of def under cover of the recent raid by Ger warships.

This information came to The oday from reliable sources. The rel arried out by enemy warships in shipping route between the Thames an shipping route between the insules he Holland on November 1, this report says was a blind to get half a dozen or more U-boats thru the channel. That it suc-ceeded is evidenced by the unusual acti-ity of submarines in these waters dur-ing the last few days. Their roll of vie-tims this week has been exceptionally block.

high. The British naval authorities have learned of this fact and are making strenuous efforts to trap some of the raiders, it is said. The channel patrol has been augmented and a watch is been kept night and day for any sign of the submarines reported to be operating of the coast. The few critics who share knowledge of the presence of the enemy submarines express the opinion that by now nosi to their bases. The continued sinking of vessels in this region, however, su-gests that a few raiders are still opena-ing in the channel or slightly to the north. north.
