Women and Men not in the best of health are slow in picking up and are prone to catch colds when their energy gets used up trying to be warm. Tiny tots fare poorly unless helped out by a Hot Water Bottle. It is wise to have one in the house for emergencies.

PREDICTS GOOD WINTER SEASON AT SAINT JOHN

C. P. R. Freight Traffic Manager on Visit to Port

That he thought the Port of Saint John would have a very good season in the coming winter was the statement made this morning by E. N. Todd, of Montreal, freight traffic manager of the Canadian Pacific Railway company.

MUCH GRAIN HERE.

Mr. Todd said that business throughout Canada was very good, particularly so in regard to railway business. He said that it looked like a very heavy movement of export grain through West Saint John this year, due to the fact that the crop was late in moving and the usual quantity which left by the ports of Montreal and New York would not go that way, thus leaving a large tonnage to pass through this port during the winter months.

The packing house products business also looked very favorable. Mr. Todd said, and the Port of Saint John should have a very good season.

SAND AND GRAVEL GOOD ON STREETS

Commissioner Frink Doubts if Crushed Rock Will be Used Again

Commissioner Frink said today that after the experience of the department this summer in using sand and gravel for temporary repairs to the macadam streets it was doubtful if crushed rock would ever be used again for this work, as they found the sand and gravel stood up much better under motor traffic and it was to correct this the gravel had been used this year because of lack of money to operate the stone crusher, but given the good satisfaction that its use would be continued.

TO STUDY FLOWERS

Civic Gardener Babcock to Perfect Knowledge

Civic Gardener Babcock of the Department of Public Works, who has had immediate charge of the floriculture in the public squares for several years as chief assistant of the late H. E. Gould, is about to begin advanced studies in his line of work in Upper Canadian and American schools and nurseries. It is due to Mr. Babcock's vigilant care and industry of late years that the plans of Commissioner Frink and the late Mr. Gould were so well carried out. Mr. Babcock moved from the outer districts of East Saint John to quarters near King Square some time ago to facilitate his increased duties after the death of Mr. Gould.

AFTER TWO BREAKS

Water and Sewerage Men Seek Trouble Source

The water and sewerage department ran into a lot of trouble last night and today crews were busy getting ready to make repairs. A part of the wood stove main gave way at Piney Hill and one crew were engaged this morning in digging down to the pipe to see how serious was the leak. The second call came from Douglas avenue where a sewer opposite the Vocational school was reported out of order. At this point the sewer is eleven feet below the street. It is thought, Commissioner Wigmore said this morning, that one of the joints in the terra cotta pipe has been broken by a side movement of the street.
