Bands of schoolboys in the agricultural lands of the insects. The number of locusts of the Karst mountains, Austria, was converted from a pest into a valuable commodity to keep down the plague of locusts food for farm stock is estimated at 45,000,000.

## INSISTS ON REAL ROAD FOR VALLEY

Hon. Mr. Pugsley Puts Case Squarely—Must Be Through Line Operated By I. C. R. and in Connection With Transcontinental Road

Ottawa, May 19.—Correspondence respecting the St. John Valley railroad was tabled in the commons today. It indicates a desire on the part of the New Brunswick government, to obtain liberty to depart from the proposal to have the line run down the valley of the St. John from Grand Falls to St. John.

It also indicates a determination on the part of Hon. Dr. Pugsley to have the line, as its name implies, a thoroughly practical railroad down the whole river valley and giving a connection for St. John with the National Transcontinental at Grand Falls, and at the same time providing a railway service for that populous part of the upper St. John, which is now without adequate railway service.

The return consists of letters exchanged between the New Brunswick government and Hon. Dr. Pugsley, and a letter from Mr. Gould setting out the alleged plans of his proposed company.

The correspondence begins with a letter written in Ottawa on April 28, to Dr. Pugsley, and signed by Messrs. Fleming, McLeod, Morrisey and Maxwell, who were in Ottawa at the time negotiating for a change in the terms of federal aid. The letter says it is written in compliance to a request by Dr. Pugsley, and gives the change wanted in the act granting a subsidy for a railway in the St. John Valley. It quotes the New Brunswick act, one for the guarantee of bonds for a railroad from Grand Falls to St. John or at point on the C. P. R. near Westfield, on condition that it be leased to the Intercolonial; the other for a line from Andover or some other point in Victoria county by Centreville and Lakeville to Woodstock by the St. John valley to the same objective point.

From the interview they inferred that a subsidy would not be granted if a contract were entered into under the latter proposal. They, therefore, asked that this subsidy act should be amended, so the subsidy would be made payable under either of the plans in the New Brunswick act. They state that if they should make a contract for construction under the last plan it would be with reasonable assurance that the railroad would extend through Maine and Quebec and connect with the Grand Trunk near Quebec.

On May 4, Hon. Dr. Pugsley replied that after discussing the proposal with the minister of railways, he and Hon. Mr. Graham had come to the conclusion that they should have more information. As to the intention of your government with regard to the extent and location of the proposed railway, more especially as to whether it is the intention to build to the town of Andover or merely to a point in the parish of Andover, and whether it is to be built to St. John or to Westfield or Westfield.

He asked for a definite statement of the points it was intended to have the railway constructed, that a location plan be furnished, that the character of the proposed road be stated, and whether it was to be operated by steam or electricity. Some definite information as to the proposal to extend across Maine and Quebec to a connection with the Grand Trunk at Quebec was asked also.

In reply, Mr. Fleming wrote Dr. Pugsley from Hartland on May 16, enclosing a

## A Dress Goods Sale Extraordinary Commencing Monday Morning
