The News of His Defeat Was Taken Unconcernedly.

Lincoln, Neb., Nov. 6-Mr. Bryan received election returns at his residence in this city. His house was fairly overrun with newspaper men and telegraph

Mr. Bryan took his dinner at a little after 6 o'clock and afterwards spent a few after 6 o'clock and afterwards spent a few minutes in conversation with the newspaper men, referring to the bulletins received and asking some questions about different things, but without venturing any opinion of the fight. The first bulletin was the one announcing that Poughkeepsie, N. Y., had given McKinley a majority of 1,337, and this was quickly followed by another bulltein to the effect that Elmirs had gone in favor of Mr. Bryan to the extent of 1,722 majority.

When shown this message he simply remarked that it was encouraging. The

They will come direct to England where they will be the guests to England where they will be the guests of the mother country. A grand reception awaits them as the gallant conduct of the Canadians has won the admiration of every Englishman. The scenes on the arrival of Col. PREVENTION OF SMOKE.

Upon the bench for the first time, it being understood that after common motions we eneath court would adjourn until after the elections. Very little interest was taken in the proceedings. No member of the bar outside of Fredericton was present.

The following common motions were made: McCarthy, M. P., and an Independent Conservative, says: He had been taunted by Conservatives with trying notices until next Tuesday: Leave granted. receted or adjusted, or were ignorantly landled. Others have proved costly to maintain, or have failed to respond to fluctuating conditions. It is not surprising, therefore, that a large percentage of these so-called smoke preventers have proved to be failures, and that nearly all of them have been thrown out, at great loss to both purchaser and promoter. So discouraging was the outlook a few years ago that most manufacturers, as well as many progressive engineers, despaired of a solution, believing that there remained particularly refractory conditions which no o'e of the devices on the market could fully meet.
