

RAYMOND'S
SEWING MACHINES.

THE RAYMOND is one of the most perfect simple, durable, efficient and reliable Double-Thread, Lock Stitch

FAMILY SEWING MACHINES
 EVER INVENTED.

Simplicity has been attained in a remarkable degree, there being only *four working parts* in connection with the Machine; and each part is so admirably adjusted, as to render it impossible, with fair play, for the most inexperienced to do it any injury.

RAYMOND'S
 Improved Family Sewing Machine,

Is recommended for the following reasons:

One of the strongest and simplest Machines made.

The best and most perfectly finished, its movements being speedy and light, and so easy that a child can work it.

It makes the genuine Lock-Stitch, perfectly fair upon both sides. No springing or bending of the Needle in changing from coarse to fine, or *visa versa*, thereby avoiding dropped or missed stitches.

No friction or wearing of the Shuttle

No soiling or oiling of the Thread.

It is capable of sewing the finest and coarsest work with the same comparative ease, and is specially adapted to all kinds of Family Sewing.

Raymond's No. 2 Sewing Machine,
 FOR TAILORS AND SHOEMAKERS,

is very much larger, and stronger than the Family Machine, and capable of doing very heavy Tailoring or Shoemakers' work. For Shoemakers, it uses the Leather-pointed Needles, which makes a hole similar to the Shoemaker's Awl.

Raymond's Family Sewing Machine
 is specially recommended for the use of Families that cannot afford to purchase a Lock-stitch Machine. For the use of Dress Makers it is invaluable, and one of them should be in the hands of each seamstress in the country.

F. W. BOWDEN,
 General Agent for Newfoundland.
