

## FOLLOWING A VERY BUSY SEASON A Final Clean-up AT J. N. CURRIE & CO.'S

Cost price forgotten to make a quick clearing of broken lines. All good goods. All this season's goods. All good, desirable lines. It's simply following our pre-

wartime rule never to carry over goods where style changes depreciate values. We're commencing clearing early, when goods are yet wanted.

**Straw Sailors**  
Men's Hats, reg. \$2.50, for \$1.25.  
Men's Hats, reg. \$2.00, for \$1.00.  
Boys' Hats, reg. \$1.50, for 75c.  
Reg. \$1.00, for 50c. Reg. 75c, for 35c.

**A few Men's Summer Tweed Suits**  
clearing at about \$4 to \$5 under value.

**Boys' Summer Tweed Suits**  
at about one-quarter off price, including newest belted and pinched styles. \$2 and \$3 saved on each suit.

**Men's Felt Hats at exactly half price**  
English Fur Felt, reg. \$2.50, for \$1.25.

**Clearing Men's Linen Collars, 5c each**  
Some odd sizes and broken lines, but may be exactly what you want—at 5c instead of 20c.

**Final Clearing of Shoes at exactly half price**  
Sizes 2 1/2, 3, 3 1/2 and 4, in patent and victor oxfords and pumps. All desirable styles and qualities. Only small sizes left after a very heavy season.

**Piles of Cool Underwear**  
From best manufacturers, in combination and separate garments, for men, women and children.

In many lines our present prices are lower than today's mill prices. Compare our values at 35c, 50c, 75c and \$1 with anything offered. You will see the great saving, besides the advantage in quality and style.

**Shipment of Voile Waists**  
Very desirable styles, moderately priced—\$2.50 to \$5.00.

**Georgette Waists, \$4.50 to \$6.50**  
Neatly trimmed, smart styles, crisp quality. In white, maize, peach, flesh and sand shades.

**Kayser Silk Gloves, \$1.25**  
The well-known make, quality always dependable. All sizes and colors.

**Holeproof, Luxite and Adanac Silk and Lisle Hosiery**  
Where "quality" counts—50c, 75c, \$1.00, \$1.25 and \$1.50.

**Busy farmers appreciate our good phone order service. Phone 17 for accurate and prompt service.**

### Reading and Morality

Adults do not seriously enough recognize the harmful character of the books they permit the young people to read. Obviously there is a direct connection between reading and morals. The testimony of Juvenile Courts is ample evidence. But recently in the States, young violators of the law confessed that they owed the inspiration to evil in books of the "Yellowback" type. Again we refer our readers to the excellent collection of young people's books which we have in the public library. A good plan which is followed out in many homes is that one of the parents read the book chosen before it is put into the hand of the child. Should this not be possible the librarian, we are sure, would be pleased to give a list of safe books. Guard well the thoughts that are implanted in the young mind. It has been well said by another:—"Sow a thought, reap an act; sow an act, reap a habit; sow a habit, reap a character; sow a character, reap a destiny."

### Book-keeping For Farmers

### What Germany Has Lost

She has lost her high seas commerce.  
She has, therefore, lost her foreign trade.  
She has lost her colony, with the successful conclusion of the East African campaign.  
She has lost the respect and confidence of most of the nations.  
She has lost her former leadership in many realms.  
She has lost her monopoly of the dye trade.  
She has lost many of her patent rights, that were once a source of great wealth.  
She has lost her supply sources of many raw materials that are essential to her industrial life.  
She has lost millions of her sons.  
She has lost her soul.

### Fall Fairs Have a Place

Toronto Globe:—Agricultural societies, under the auspices of which local fall fairs are held, are the oldest form of farm organization in the province. They are, where properly conducted, still among the most useful of agricultural organizations. The annual meetings of these societies, early in the year, bring the most progressive farmers in the community together for an exchange of ideas. The meetings of directors elected at the annual meeting bring a selected few together at frequent intervals during the year. The fall fair provides for an assembly of the whole community under the most favorable auspices. The competition in live stock and in the produce of the field helps to fix proper ideals as to types and quality, and an improvement in standard must necessarily follow.

The local agricultural society with its fall fair accompaniment fills a place that the great exhibitions cannot fill. It performs a local service that no other existing organization can perform. The men who keep these organizations in vigorous life, often at great personal inconvenience, render a very real service to their fellow community and to the country as a whole.

### Write a Letter

Write a letter to a soldier when you haven't much to do; it will brace some homesick fellow who is feeling pretty blue. Oh, our boys are lion-hearted, and they'll whip their weight in snakes, but they have their lonesome moments when their hearts are full of aches; there are hours when they are longing for the home, so far away, and the girls they left behind them; and the parents old and gray; and a letter full of sunshine makes their melancholy shrink—therefore get your pen in action, with a demijohn of ink.

Write a letter to a soldier, full of cheerfulness and joy; let the sob stuff go to thunder—it won't help a lonesome boy. Tell the soldier you are betting he will make the Dayton fly, tell him all is hunky-dory and the goose is hanging high. Tell him all his friends are banking on the big things he'll achieve, let him know he's not forgotten since he took his final leave. Write a letter to a soldier, ere you go to bed tonight; some poor chap is tired of waiting for the letter you don't write. It will take you fifteen minutes such a letter to compose, and you'll hearten up a soldier when he's billed to face the foe. Make it bright and brave and breezy, full of courage, smiles and snap, show the confidence you're telling in the outcome of the scrap, and some soldier boy will bless you as he takes his little gun and prepares to shoot the gizzard from a lewd, immoral Hun—Walt Mason.

## MACHINES FOR MILKING

Farmers Will Find That They Are Very Profitable.

TO MEET LABOR SHORTAGE

How to Prevent Bees Swarming—Hints for the Gardener and Dairyman in June—Methods by Which to Destroy Troublesome Weeds.

(Contributed by Ontario Department of Agriculture, Toronto.)

THE statement that the milking machine has now become a practical proposition can now be made with considerable confidence. Practically all the standard makes of machines sold in this province, the cheaper ones as well as the more expensive, are giving good satisfaction in the hands of a great many dairymen. But all machines are somewhat complicated, and somewhat delicate of adjustment, so that to be successful the operator must exercise some mechanical ability, and strict care and attention to the needs of individual cows. Without these the milking machine has always proved a failure. It can hardly be said that the machine will get as much milk from the cows as good hand milking, but properly handled, it will give better results than the average hand milking, and there is no doubt of its being a great economy of labor and time. The machine has its place on the farms of dairymen who milk more than ten cows, it being doubtful economy to invest so much money for a smaller herd. It may also be doubtful economy to install the machine in a herd of pure breeds where much official test work, involving milking three or more times per day, is being done.—A. Letich, B.S.A., Ontario Agricultural College, Guelph.

### To Prevent Bees Swarming.

June is the swarming month and time of supering for the main honey flow which begins between the 10th and the 20th of the month, depending on the season and the latitude. Bees sure to give supers enough to avoid any crowding which may cause the bees to become discouraged, quit work and swarm excessively. It should be the beekeeper's aim to prevent swarming as much as possible. This is done by keeping young queens, giving plenty of room and a systematic examination of brood-chambers to detect colonies which are preparing to swarm. When queen cells are found far advanced they should all be destroyed and the queen herself removed. After the colony has been queenless one week the combs should again be examined and all cells except one removed. This one will provide them with a queen and if only one is left they will not swarm again. Where an improvement of stock is desired the new queen may be given instead of leaving one queen cell.

Natural swarms should be hived on the old stand after removing the parent colony to one side. The swarms should be given the supers from the old colony. New swarms work with great vigor because they have no brood to care for during the first week. Colonies held together without swarming gather more honey than those which swarm. It is the beekeeper's patriotic duty to reduce the cost of honey production and thus increase the quantity he is called to produce as greatly as possible. This also causes the beekeeper less trouble at unexpected times. This may be done more by swarm prevention than in any other way. Bulletin 233 (Ontario Department of Agriculture) takes this matter up thoroughly and should be carefully studied by all beekeepers.—Provincial Apiarist, Ontario Agricultural College, Guelph.

### Hints For the Gardener.

Thorough cultivation of the soil must be practiced in the garden. The common hoe, wheel hoe and the garden cultivator should be kept going immediately after each rain. The seed sown in the field should be thinned carefully, giving each plant the amount of space required for good growth. Use poison bran mash to kill the cut worm, which will be active in the garden. The asparagus bed should have the second application of 100 lbs. per acre of nitrate of soda. All stocks should be carefully cut even if they cannot be used. Early celery, tomatoes and other tender plants should be set out the first of this month, while citrons, cucumbers, pumpkins and melons should be planted. A small amount of nitrate of soda around celery and tomato plants four or five days after setting out, will aid in their growth. The latter part of this month and the beginning of next, late celery, cabbage, cauliflower and kale are transplanted into the field. Sowing of corn and beans should be made every week during this month.

### To Eradicate Bad Weeds.

If troubled with mustard in grain crops, spray with the 20 p.c. solution of iron sulphate, (2 lbs. of iron sulphate to each gallon of water). If such spraying is to be effective it must be done early just when the first mustard plants in the field are coming into flower.

Good cultivation followed by rape sown about the middle of June in drills about 26 inches apart at the rate of 1 1/2 pounds per acre, provides a means of eradicating perennial sow thistle and twitch grass.

### Dairy Pointers for June.

Cows in clover or good June-grass pasture require very little attention. This is the ideal month for dairy operations. If there are any hot days, be careful to cool both milk and cream, by setting in ice water, or cold well water. So much cream is too frequently sent to the factory. Don't forget to wash the cream separator and strainer daily, or after each time of using.

## ASA WAR MEASURE, SAVE THE SUGAR

ONE TEASPOONFUL OF SUGAR WASTED BY EACH PERSON IN CANADA EVERY DAY

MEANS 55 TONS WASTED PER DAY

19,925 TONS PER YEAR

VALUED AT 10¢ PER LB. THIS EQUALS \$3,985,000.

A FIGHTING AIRPLANE IS WORTH \$15,000

THIS WASTE WOULD PURCHASE A FLEET OF 265 AIRPLANES

## Sending Money to Soldiers

Those who have friends or relatives at the front, may wish to send money, but possibly do not know the best way to do so. If time permits, the safest and most convenient method of making remittances abroad is the Bank Money Order or Draft, as issued by The Merchants Bank. If, however, it is necessary to send money without delay, the Bank will arrange this by Cable Transfer.
