

Tubulars Stand Great Test

We insist upon truth in Tubular advertisements. We prove Tubulars will do what we claim before we claim it. Tubulars are more durable than all other Separators. We guarantee this. Back of this guarantee is absolute knowledge of Tubular quality. Actual tests of Tubulars surprise the doubters every time. Here is a

hard test. On Aug. 2, 1904, we attached a No. 9 Dairy Tubular to a mechanical driving apparatus that turns the machine as a man would. This Tubular was not specially selected, but was taken at random from the many finished Tubulars in our warehouse. This Tubular, at date of writing, has been in constant operation, every working day, for three and one-half months. It has run fifty hours a week for fifteen weeks—and is still running. Below we give facts and figures of the test, up to Nov. 15, showing what wonderful work this Tubular has done, and how easily it has done it.

Dairy Tubular Separator

Dairy Tubular Bowl

Machine under test	No. 9 Tubular.
Capacity	900 lbs. per hour.
Hours in operation	750.
Total time adjusting	Not any.
Total time oiling	Not over three minutes.
Total repairs	Not any.
Total oil used	Not over two quarts.
Revolutions of crank	1,972,575.
Revolutions of bowl	720,000,000.
Number pounds separated	675,000.

675,000 lbs. of milk is about equal to the yield of ten average cows for a period of 14 years, 6 months and 25 days. This test is unequalled. It confirms all we claim for the Tubular—is positive guarantee of quality. It shows that Tubulars are capable of doing work equal to at least eleven years service in a ten cow dairy, with no expense for repairs and with the use of not over two quarts of oil. The test still continues. This Tubular will greatly surpass its performance up to the present. At time of writing (Nov. 15) it shows almost six years. We will keep you informed about the doings of this machine.
