

A BOOK TREAT IN STORE FOR EVERY TEACHER

Fascinating books on Popular Science by the most gifted nature writer the world has known in a hundred years.

THE BOOKS OF J. HENRI FABRE

"The Insects' Homer"

THE LIFE OF THE SPIDER. Eighth Edition. Price \$1.50

"The most notable book published during the first quarter of the present year."—*The Literary Digest*.

THE LIFE OF THE FLY. Third edition. Price \$1.50

"In this volume he proves himself not merely a great scientific observer; he proves himself a great writer."—*New York Times*.

THE MASON BEES. Price \$1.50

"The French savant's theories are propounded, as his observations are reported, with an element of the dramatic, strange and new in science."—*New York Sun*.

BRAMBLE BEES, AND OTHERS. Price \$1.50

"Of his standing as a naturalist, it is enough to say that Charles Darwin valued him as an observer of the very first order."—*Indianapolis News*.

THE HUNTING WASPS. Price \$1.50

"One of the most interesting of the Fabre volumes."—*New York Globe*.
"Continues the Fabre tradition of tireless observation, ingenious experiment, eloquent interpretation."—*New York Sun*.

THE LIFE OF THE CATERPILLAR. Price \$1.50

THE LIFE OF THE GRASSHOPPER. Price \$1.50

INSECT ADVENTURES. Price \$2.00

Could any child fail to be interested in nature subjects if he had a chance to learn about them from Fabre, a scientist unequalled in his chosen field of insect life, and a master of the art of appealing to the youthful imagination? His profound knowledge is imparted in terms of fascinating adventure. The caddis worm "pirates", "the insect submarines", "the spider's telegraph wires" are introduced to the child reader. The life stories of the bee, the wasp, the spider, the fly, are told with that whimsical imagery and fanciful twist which make them read like a fairy tale. The charm of the book is completed by the fascinating, quaint sketches, very French in style, which are profusely scattered through it.

THE STORY BOOK OF SCIENCE

By J. HENRI FABRE. Translated from the Nineteenth French Edition by Florence Constance Bicknell. 8 vo. 400 pages. Jacket in colour. Illustrated. Price \$2.00

A book of popular science, about the metals under the earth, the plants and animals on the surface, and the planets in the heavens above, told in story-form by the most gifted nature writer the world has known in a hundred years.

Maeterlinck has called Fabre "The Insects' Homer". In France his popularising handbooks have gone into many editions. Of recent years, too, the entire world that reads has bestowed itself to do honour to the eminent scientist who studied the nature world with the zeal of a medieval monk, whose background of scholarship and innate chivalry and good humour always makes itself felt in his writing, and who expresses himself with the simplicity and fire of a poet.
