HEART PALPITATION.

A Quebec Lady Released From Great Suffering.

She Had Tried Many Medicines Without Avail, But Ultimately Found a Cure Through the Use of Dr.

Few bodily afflictions are terrible than disease of the heart. To live in constant dread and expectation of death, sudden and with last farewells unspoken, is for most people more awful to contemplat than the most serious lingering illness. The slightest excitement brings suffering and danger to such people. For several years Mrs. Gravel, wife of P. H. A. Gravel, foreman in

while of P. H. A. Gravel, foreman in Barry's cigar factory, St. John's su-burb, Quebec, was such a sufferer, but thanks to Dr. Williams' Pink Pils she is again in the enjoyment of good health. Mrs. Gravel says; "My general health was bad for

my general nearth was bad for several years, my appetite was poor, and I was easily tired, but it was the frequent sharp pains and violent palpitation of my heart which caused me the greatest alarm. I tried many medicines, and was treated by several doctors, but in vain. Finally I became so poorly that I was not able to do my household work, and was frequently confined to my bed. At the suggestion of one of At the suggestion of one of my friends I decided to try Dr. Williams' fr'ends I decided to try Dr. Williams' Pink Pills. After taking a few boxes I began to gain new strength and vigor. The pains in my heart were less frequent and less severe, and in every way my health was improving. I continued using the pills until I had taken eight boxes, when I had completely recovered my health. I have gained in flesh; my appetite is good, and I am able to do all my household work without feeling the awful fatigue I was before subject to. awful fatigue I was before subject to I am very thankful to Dr. Williams' Pink Pills, for they have truly released me from much suffering, and I hope that others may be induced to try this wonderful medicine."

Dr. Williams' Pink Pills cure by going to the root of the disease. They

or. Williams' Pins Pins cury by going to the root of the disease. They renew and build up the blood, and strengthen the nerves, thus driving disease from the system. Avoid intations by insisting that every box you purchase is enclosed in a wrapyou purchase is enclosed in a wrap-per bearing the full trade mark. Dr. Williams' Pink Pills for Pale People. If your dealer does not keep them they will be sent postpaid at 50 cents a box, or six boxes for \$2.50, by addressing the Dr. Williams' Medicine Co., Brockville, Ont.

Wheat Experiments:

••••••

KANSAS WINTER WHEAT AT THE ONTARIO AGRICULTURAL COLLEGE

In 1893 the Ontario Agricultural College imported eleven varieties of whater wheat from Kansas, four from Indiana, one from Iowas, six from Dinio, etc. The Turkish, or Turkey red, regarding which we are hearing so much at the present time, was one of the varieties imported that year, and has therefore been grown at the college in each of the past seven years. We again imported from the machine at the college in each of the past seven years. We again imported from the machine at the college in each of the past seven years. We again imported from the machine at the college in each of the past seven years. We again imported from the machine at the college in each of the past seven years. We again imported from the machine at the college in each of the past seven years. We again imported from the machine at the college in each of the autumn of that year. The results from the swestern grown seed in the autumn of that year. The results from the two crops in 1897 were slightly in the yield of grain per acre.

The annual report of the Ontario Agricultural College for 1898 gives the average of five years' results of tests with each of forty-eight varieties in strength of straw, weight of grain per acre. It also gives the comparative hardness of the grain of each varieties there given in cluding the turkey red, the Dawson's goden chaff, and the early red clawson. Rather than recommend any one variety of wheat wheat for Ontario, the college publishes from time to time the exact results of practical exact results of pra variety of whater wheat for Ontario, the college publishes from time to time the exact results of practical experiments, and then allows those interested to make their own selection. The report closes with the following remarks: "The varieties which the farmers are likely to grow are those which they can usually harvest with the least amount of labor, and that will produce the greatest financial returns for their time and labor in growing the crop. The requirements of the market, however, should be closely watched, and the aim should be to grow those varieties

aim should be to grow those varieties which will give the best results, and which will give the best results, and at the same time furnish that quality of grain for which there is the greatest demand. A careful study of the results of our experiments with winter wheat will greatly aid in this selection. Work is now being done in the Experimental Department with the object of improving the best varieties of winter wheat by means of careful selection and by cross fertilization." The college reports are printed by the Ontario Department of Agriculture, Toronto, Ont., and are distributed from there to all who apply for them. In the winter of 1898-9, from 85 to 90 per cent. of both the Dawson's golden chaff and the turkey red varieties were winter turkey red varieties were winter killed. Both varieties, however, came through the following winter in good

The College Report. The College Report.

The College Report for 1898 states that the grain of the Turkey Red was harder than that of any other variety in the crop of 1896, and that the grain of the Turkey Red and the Pride of Genesee was the hardest of the varieties mentioned hardest of the varieties mentioned was referred to as a softer wheat, and the Early Med Clawson as being the softest of the red varieties. Mr. Robert Harcourt, of the Chemical Department of the College, has been doing some work within the past two years in determining the gluten con-tent and the bread-yleiding power of some of the varieties of winter wheat grown in Ontario, and as the work ontinues the results are becoming o nereased value.

increased value.

Men of long experience in handling wheat differ greatly in their judgment of the value of the Dawson's Golden Chaff variety. Within the past week, the writer invited leading millers of Guelph, Gall, Treston Berlin and Bridgeport to pass judgment upon the comparative value of two varieties of Bridgeport to pass judgment upon the comparative value of two varieties of win'er wheat for milling purposes. These were the Dawson's Golden Chaff and the Treadwell, both of which were grown at the College this year. The judgments were made separately and resulted in three of the millers selectresulted in three of the resulted in three of the miners selecting the Dawson's Golden Chaff as the best and the other three selecting the Treadwell as the best wheat. The Treadwell sample must have been representative of the old-time Treadwell wheat, as Mr. S. J. Cherry. of Preston, when here is the military has been as the selection. wheat, as Mr. S. J. Cherry, of Preston, who has been in the miling business for many years, stated that he never saw, a better sample of the Treadwell wheat than the one shown him, and the Goldie Brothers, of Guelph, considered it to be of extra good quality and, in fact, the very best of the 36 varieties of white wheats grown at the College this year.

the College this year.

Mr. Shirk's Tests. In the autumn of 1898, Mr. Peter Shirk, of Waterloo county, imported a carload of seed of the Turkey Red variety of winter wheat from the State of Kansas, but as the wheat did not reach Ontario until very late, only not reach Ontario until very late, only a small amount was sown that autumn. A somewhat larger amount, however, was sown in the fall of 1899. In order to ascertain the results from growing this wheat on different farms, the writer recently went to Mr. Shirk's place at Bridgeport and was given the names of the persons residing near Bridgeport and Berlin who had grown at least a few aeres of the and grown at least a few acres of the had grown at least a few acres of the Turkey Red wheat this year. Six growers were called upon, and the following gives the report made by each: Peter Shirk-Four acres, very rich land, crop badly lodged, 25 bushels per acre, about 64 lbs. per measured bushel.

Richard Quekfa b-Four acres, killed with budy. In spate last winter.

Influence of Season.

We have found from our experimental work with winter wheat that very frequently the season has a much greater influence than the variety in determining the quality of the grain. For instance, the weight per measured bushel of the Turkey red was 64.5 lbs. in 1898, and 55.1 lbs. in 1897, and that of the Dawson's Golden Chaff was 61.6 lbs. in 1898 and 53.5 lbs. in 1897. It will be remembered that in 1897 there was an exceptionally wet harvest, and that a large amount of wheat throughout Ontario was sprouted that year. I understand that there was a large export trade from Ontario of flour made from the wheat grown in 1897, and this might have something to do with the reputation of our flour in the foreign market.

the reputation of our flour in the foreign market.
Within the past ten years, a good many varieties of winter wheat have been distributed to farmers throughout Ontario, who applied for them for testing upon their own farms. Great care has been taken in the selection of the varieties for distribution and some kinds such as Jones Winter Fife, Bulgarian or Democrat, Pride of Genesee, Diamond Grit, etc., have been sent out owing to their quality rather than owing to their quality rather than their yield of grain. Farmers have found, however, that all varieties would sell for about the same price per bushel, and therefore have grown those kinds from which they could secure the greatest profit, hence the great popularity of the Dawson's Golden Chaff with the far-

This Year's Seed. The varieties to be distributed this year have again been carefully selected, and two sets will be sent free by mail to farmers applying free by mail to farmers applying for them who will carefully test the three kinds in each set which they choose and will report the results after harvest next year. The seed will be sent out in the order in which the applications are received, as long as the supply lasts:

St 1.—Dawson's Golden Chaff, Early Genesee Giant, and Stowart's Course Giant, and Stowart's Course of the second set of the second sec Set 1.—Dawson's Golden Chaff, Early Genesee Giant and Stewart's Champlon Red. Set 2.—Dawson's Golden Chaff, Turkey Red and Diamond Grit. Each person withing one of these sets should apply as early as possible, mentioning which set he devires; and the grain, with instructions for testing, and the blank form on which to report, will be furnished free of cost to his address, until the supply of grain for distribution is exhausted.

Much additional information regarding the value of the Turkey Red winter wheat for Ontario will undoubtedly be secured this year. Not only

edly be secured this year. Not only will it be tested in the co-operative experiments throughout the province but as several millers are importing seed from Kansas an opportunity will be afforded the farmers of western Ontario to grow it in large quantities, and the millers can then grind the variety by itself, and thus be better enabled to determine its value for both the home and the foreign trade. The results will be watched with interest by both the millers and the foreign trade.

MOST NOVEL OF ALL DUELS.

Preacher Chose Potatoes as Weapon and Vanquished Euemy.

One way of combating an evil practice is to make it look ridiculous. It

One way of compating an evil practice is to make the look ridiculous. It was by this means that duelling was stopped in a certain district in Kentucky. A travelling preacher named Bowman—a strong, muscular fellow—was conducting services in Kentucky. At one of his meetings a well-known desperate character created a disturbance, and, being publicly rebuked by Bowman, sent him a challenge by fight. Bowman, as the challenged party, had the choice of weapons. He selected a half bushel of Irlsh potatoes, as big as his fist, for each man, and stipulated that his opponent must stand fifteen paces distant, and that only one pointo at a time should be taken from the measure.

The desperado was furious at being thus freshly insulted, and made an indignant protest, but Bowman insisted upon his rights as the challenged man,

upon his rights as the challenged man and threatened to denounce the desperado as a coward if he failed to come to time. As there was no way out of the fix but to fight, the desperado consented. The encounter took place on the outskirts of the town, and place on the outskirts of the town, and almost everybody in the place was on hand to see the fun. The seconds arranged the two men in position, by the side of each being a half bushel measure filled with large, hard, Irlsh potatoes. Bowman threw the first tuber, It struck his opponent and flew into places.

into pieces.

A yell of delight went up from the A yell of delight went up from the crowd, which fluryled the desperado, and his potato flew wide of the mark. Bownian watched his chance, and every time his opponent stooped for a potato another hit him in the short potato another hit him in the short ribs, knocking the wind completely out of him, and doubling him up on the grass. The people were almost crazy with laughter, but Bowman looked as solemn as if he had just been preaching a funeral sermon. The desperado was taken home and put to bed, and stayed there for more than a week before he were very large. the Irish potato duel.—Boston Herald

Toothache Cured in one Minute

One Application of the Old Reliable Polson's Nerviline Always Cures

Toothache at Once. Never before in the history of medicine has such a powerful and pleasant pain remedy as Polson's Nervilline been produced. It is ten times stronger than any other known combination, and death to all pain. It is see invaluable remedy for the household, and when a doctor cannot be had in a case of emergency it is always effectual to administer Nervilline. Try it.

CATARRHOZONE cures Catarrh.

Fast Trains are Profitable.

According to a calculation which has recently been made by German railway officials the expenses of fast trains are 25 per cent less than the expenses of slow trains. The locomotives are not turned to such good account in slow as in fast trains, the cars are so much longer on the way and the servants of the railway after long journeys require longer rests than after journeys with fast trains. The result of these calculations is that the railway, administrations are being advised to run fast trains wherever it is at all possible, instead of the slow trains at present in use for local traffic. cal traffic.

Habit is the beneficial harness routine which enables stilly men to live respectably, and unhappy men to live calmly.—George Elot.

GATARRH

Standing Permanently Cured
by Catarrhozone.

Miss Lizzle Sanford of 353 N. Market
street, Chicago, Ill., whites: "I have been a
constant suncter from catairh for 12 years
and was much bothered by droppings in the
throat and severe headache. I used a great
number of Catarrh snuffs and powders,
but received no benefit from them, some
being worse than useless. A trial size of
Catarrhozone helped me more than anything else I ever tried, and I wish to say
it is the best remedy I ever used. It has
cured me, and I shall recommend it at
every opportunity to my friends."
Catarrhozone, the new medicated air
treatment, is a guaranteed cure for diseas, of
the nasal and respiratory passages caus
ed or maintained by microbic life.
It cures you while you breathe and cannot fall to reach the seat of the disease;
it goes wherever air can go, and no matter
how deep-sented the disease may be in the
lungs or bronchial tubes it always succumbs to the use of Catarrhozone.
Singers and public speakers universally
use Catarrhozone for the alteviation of sore
throat and lacking coughs, and it has
saved thousands of preclous lives from coasumption. What it has done for others it
will do for you. Don't delay longer. Catarrh is such a gradual thing—so painless
at first, but so cruelly relentless, that at
the end of years we awaken to its horrors.
Catarrh—Consumption—Death. That is the
story. Re advised, discard those worthless
sauffs and powders, they never the

A NEW SOLOMON.

His Judgment Was Good in This Cas Anybow.

Anyhow:

The following remarkable incident occurred recently in the Province of Honan, in China: Three men appeared before a Judge there, and each laid claim to the same woman as his wife. Not one of them would retire in favor of the other two, but ear insisted that justice should be done to him. Finally the Judge, remembering, doubtless, how King Soomon had acted in a somewhat similar emergency, exclaimed: "Well, if you three men cannot come to some agreement, nothing remains for me but to order that the woman shall be kiled, as there is no other way in which the matter can be satisfactorily settled." He then called for a large cup of wine and, when it was brought, he poured into it some dark powder and compelled the woman to drink it. Excited as she was, the woman speedily began to feel the effect of the strong liquor. She stammered when she tried to speak and her flushed cheeks were an indication to the observers that the polyson was working and that her end was near at hand.

This was the climax for which the Judge had waited. When he saw that the woman was apparently dying he called one of the three men who claimed her as wife and hade him remove her from the court room. This nan, however, showed no inclination to do so, and the Judge

This nan, however, showed no in-clination to do so, and the Judge thereupon insisted that he renounce all rights to her. This he willingly did, and so did the second man. Only one claimant was now left, and he agreed to remove the woman and to care for her until she fied. Satisfie care for her until she died Satisfied that he was her real husband, the Judge called him and said: "You will not be sorry for acting in this manner. Have no fear for your wife, since she is in no danger of death. The liquor which she has drunk was ordinary wine, and the powder which dinary wine, and the powder will poured into it was nothing
