

Guidboard Corners.

In the Spring a fuller crimson Comes upon the robins breast. In the spring a livier lres changes on the barnished dove.

Mrs Ettie Eaton of the staff of the Brockville business College, has temporarily resigned her position, to spend the summer with her parents, Mr and Mrs Erastus Livingstone.

Miss Hazel Yates and her friend Mr Everett Reid were recently afternoon visitors of Miss Dorthea Wight.

Mr Wallace Darling is able to walk about with the aid of cane and crutch We will be glad when he is able to cast them aside. He has very patiently suffered for over three months.

Voting day has passed after much being said and done, yet leaving very much more to be said and done before the grand objective of the good Temperance people is reached. Our little hamlet cast its vote according to the light" resulting in a good majority for the "Yes" The polling booth was at the residence of James Sheldon. Mr A. Henderson presided over the ballot-box, assisted by Mr L. Ki borne, and Mr Collins. Mr E Robeson, ably performed the duties of outside guard.

It was a pleasure to all his old neighbors to see Mr Sam Hollings worth among the voters, greeting old friends with his well-remembered easy grace.

Did all the people feast their eyes on the millions of ice-diamonds glittering in the sunlight about the tender green leaf-buds of the trees and shrubberies on Monday morning. The sight was indeed one of old mother Nature's nearest treats.

Frankville

Mr and Mrs Bryan of Lyndhurst, spent last week with there sons Wm. and Edgar and son Don.

Mrs Ada Eaton from Winnipeg are visiting among their many friends.

Mr Jas. Gallagher is in very poor state of health, his daughter Mrs W. Adams and husband of Moosejaw arrived to-day.

Mrs Ennis went to Jasper to day to visit her granddaughter Mrs A. Leacock Mr Mort Brown of Carleton Place was driving through to Brockville and stopped to visit with his cousin Charles Church.

A Local resident was fined \$300.00 for violation of the O. T. A. act.

Ray Kilborn traveller spent the week end with his parents, Mr and Mrs Milton Kilborn.

The ladies turned out in large numbers to vote.

State of Ohio, City of Toledo, Lucas County, s.s.

Frank J. Cheney makes oath that he is the senior partner in the firm of F. J. Cheney & Co., doing business in the City of Toledo, County and State aforesaid, and that said firm will pay ONE HUNDRED DOLLARS for each and every case of Catarrh that cannot be cured by the use of HALL'S CATARRH MEDICINE.

FRANK J. CHENEY.

Sworn to before me and subscribed in my presence, this 6th day of December, A.D. 1886.

A. W. GLEASON, Notary Public.

Hall's Catarrh Medicine is taken internally and acts through the Blood on the Mucous Surfaces of the System. Send for testimonials, free.

F. J. CHENEY & CO., Toledo, O. Sold by all druggists, 75c. Hall's Family Pills for constipation.

Morton

Miss Winfred Kenny, Jones Falls is the guest of Miss Peryline York.

G. B. Somerville is preparing to move his family this week to his factory.

Mrs H. G. Dean is on the sick list

Miss Mildred Moulton spent last week with friends in Gananoque.

George Martin and family are moving back to their farm

HOW TO GROW CABBAGE

Advice on the Culture of This Favorite Vegetable.

Early and Late Varieties Require Different Treatment—Good Counsel as to Storing the Crop—Growing Cauliflower.

(Contributed by Ontario Department of Agriculture, Toronto.)

Early cabbage seed is generally started from the 1st to the 15th of March in a hotbed or house window. When the second set of leaves is showing, the seedlings are transplanted into flats in rows two inches apart each way, or into the small dirt band. This will give good, sturdy plants ready for the cold frame the last week in April. If these plants are then properly hardened off, they should be ready to transplant into the field by the 8th to 10th of May. The soil for early cabbage should be a warm, sandy loam in a good state of cultivation. The plants are generally set 30 inches between the rows and 18 inches in the row. They are given careful cultivation during the growing season.

The late crop is generally started about the 15th of May in an open seed-bed or cold frame. The rows in the seed-bed are 4-6 inches apart, the seed being scattered quite thickly in the row. Where the cabbage maggot is troublesome it will be necessary to grow the plants under cheese-cloth frames. These plants should be ready to set in the field from June 15th to July 1st. When we are setting plants which have little soil on their roots, as often happens in the late crop, we carry the plants to be set out in a pall which is partly filled with a batter made of cow manure, loam and water. This gives some moisture to the plant and a certain amount of readily available food. The plants are set 24 inches in the row and 30 inches between the row. As this crop does best under cool conditions, it should, if possible, be put in the moister part of the garden. Both crops must have sufficient moisture if they are to grow quickly. Nitrate of soda may be used to advantage around the plants at the rate of 150-200 pounds per acre, or what could be put on a ten-cent piece to each plant. On account of the solubility of nitrate of soda in water, better results are obtained by making two applications of 75-100 pounds, first when the plants are beginning to grow after transplanting, and, secondly, when the head is beginning to form.

Cabbages are generally cut off so as to leave 3 or 4 of the outer leaves to protect the head. This should be done before too severe freezing weather injures the cabbage. They will not keep so well if they have been severely frozen.

Late cabbage may be stored in cellars, pits, or any like place. The temperature should be held at about 34 deg. F. and provision made for air circulation so that no moisture collect on walls or ceilings. Where one is storing in cellars, the cabbages are best placed on slatted shelves made one above the other about 2 feet apart. The cabbage may be laid on these, one or two layers deep. Where there is no good cellar storage, a pit may be made outside in a place which is well drained. The ground is covered with a layer of straw and the cabbage placed on this face down in layers of first five cabbages side by side, four on top of this, then three, then two, and finally one, thus forming an "A" shape. Tuck in the outer leaves of the first layer under the heads. The outer leaves of each layer are allowed to hang over the layer below to form a roof. The pile is then covered with six inches of straw and about six inches of soil. Every 10 or 15 feet a tile should be placed in the pile to come up through the soil and straw, thus forming a ventilator. All plants give off moisture, and unless we had an opening for it to escape the cabbage would soon begin to rot. If severe weather comes, these can be stuffed with straw and opened again when the weather moderates. The covering of the pit should also be increased by using straw manure as the weather becomes more severe. Cabbage can be taken from the pit on warm days. Cabbages which are not quite fully grown may be dug with the roots attached. These can then make a certain amount of growth.

Cauliflower is handled in the same way as cabbage. If cauliflower gets a severe setback in transplanting to the field, it will tend to cause it to go to seed instead of to form a good head. More especially is this so with the early crop in the warm summer weather. In many small gardens it is generally grown as a fall crop. The plants are slower growers than cabbage and will do better if started about two weeks earlier if we wish a maximum number of good heads. When the cauliflower shows a head about two inches in diameter the outer leaves should be drawn together and tied so as to exclude the light, thus giving a pure white head. Cauliflowers that have not fully developed may be dug up, roots and all, and hung in a cool cellar. There they will continue to grow, giving a delicious head after the ordinary season of cauliflower is over. Fully developed heads may be cut off, wrapped in oil paper and stored in a cold room at 32 deg. F. to 34 deg. F. Here they will keep well till Christmas-time.—A. H. MacLennan, Vegetable Specialist, Toronto.

The trees in the apple orchard may be scraped down so as to make more effective the later spraying of the trunk and main branches. Egg masses of the Tussock Moth, conspicuously white against the dark bark, may be removed by means of a wire brush or hook on a pole.

Long-tailed lambs are unsightly, and are apt to become very filthy.

The Lost City

The most thrilling event projected on screen. Thrilling and Educating. Jungle Scenery and is one of the best Serials on the bookings. Don't miss the opening episode on Thursday April 28th: Town Hall Athens. We present first-class famous player pictures.

Charleston

The farmers have started to work on the land, some have grain sown but the growth is rather slow at present.

Mr and Mrs Prichard, Ellisville and Mr and Mrs Kylene, Smith's Falls were recent visitors at E. Websters.

T. Hudson has gone to Taylor to make cheese and W. Latimer to Brier Hill, G. Wing, Brockville, has rented the lower floor of the Charleston Lake inn from R. Foster. Mr Wing who is well known here will conduct a barber shop and ice cream parlor.

Mrs Mulvena and daughter Miss Hattie returned home last week after spending a couple of months away.

The whooping cough patients are all getting better.

Mrs S. Kelsey was taken ill on Friday but is better.

D. Young and D. Covey have each had telephones placed in their homes.

The roads are in a bad condition after the storm since Saturday.

Mr and Mrs R. Foster are nicely settled in their new home, Cedar Park, and have quite a number of guests among them, are R. A. Montgomery, Lambertville, N. J., who has been here for over two weeks, Wm. Harkins New Brunswick, N. J. Drs Lew and Harry Williams, Philadelphia and many others.

Mrs Ford Moulton, Newboro, is spending a few days at her old home here.

George Stevens, Glen Morris, has rented Mrs Slack's house. He will make cheese this season for J. A. Flood.

Mr and Mrs W. Halliday and Mr and Mrs L. Halliday were in Brockville on Tuesday and spent the day with Mr and Mrs Harry Halliday.

Lawrence Botsford was married last week to Miss Brown, Bedford Mills.

One of the practical advantages of co-ordination of Canadian National and Grand Trunk lines of railway, is shown by a recent order which enables the use of mileage books issued by one road on the trains of the other company if desired.

Previously, if a business man were travelling, from Toronto to Ottawa for example, his Canadian National "book" would be valid to that point. But if he wished to continue his journey to Montreal over the Grand Trunk, it would not have been good on the G. T. R. train.

The order just issued wipes out the distinction, in a mileage-book sense, between C. N. R. and G. T. R. Books issued by the Grand Trunk are good over all eastern lines of the Canadian National and, likewise those issued by the G. T. R. One capital outlay takes the place of two which should be a matter of satisfaction to the travelling public.

British Editor's Opinion

The Reporter has just received a booklet entitled "What British Editors Say about Canada," which has just been issued by the Canadian Department of Immigration and Colonization. It contains brief comments on Canada made by members of the Imperial Press Association who visited this country last summer. The booklet has been issued mainly for circulation in the Old Country, and readers of this paper may have copies forwarded to any friends in the Old Country who are interested in Canada by sending the names and addresses to the Director of Publicity, Department of Immigration and Colonization, of Ottawa. No charge is made for the booklet or for postage on it.

The Child's Aptitude

The average child at the age of seven will learn to play the piano easier than at any future time in its life. This fact has been learned from thousands of cases. The younger the child the more retentive is its mind, the more supple its fingers, hence they will learn while young with far less trouble to themselves and expense to the parent. After the first few lessons are over they start to produce simple harmony—become fascinated with music they are producing and scarcely any case has been recorded where children have reached the point where they are producing but simple melody and then failed to really enjoy playing and practising.
