

SCENE FROM THE BIG UNIVERSAL JEWEL PRODUCTION "THE RIGHT TO HAPPINESS" STARRING DOROTHY PHILLIPS

GRAND, FIVE-DAYS COMING TU ESDAY, JAN. 13TH, DAILY MATINEE.

The Ontario Branch of the O. A. U. of C. has cancelled the certificate issued to William James Speck of Haileybury.

The Canadian exchanges closed the week with an active day, in which Sugar and Dominion Steel led.

Kirkland Lake mining shares reached a new level on the Standard Exchange, selling up to 74 1/2 in the most active two hour session for several weeks.

Thick, Tender Savory Meat

or chops—the kind you know, that make your guests praise your hospitality, your cooking, your entertainment. Why not this kind of meat instead of the doubtful cuts and inferior meats? We want you to know our meats. A sirloin or porterhouse steak, a roast, chops from the loin, etc., will enable you to judge quality.

LOCAL NEWS

The smallpox cases are becoming fewer daily.

We buy everything you want to sell. McGuire & Co.

The Council will meet tonight to make appointments.

The Journal would like to get a young man or young lady to assist with reporting, proof reading, etc.

Choice cut flowers, potted plants and floral designs, at all times at Walker's Florist, 104 St. Paul Street, Phone 763. J. H.

The local members of the University of Toronto association has decided to raise \$10,000 to establish a local memorial scholarship in memory of all University of Toronto men who fell in the war. This amount will create a \$500 City of St. Catharines scholarship, which will be open to children of all University of Toronto men who went overseas.

The Great War Veterans' association have turned down the invitation of the Independent Labor Party to assist in re-establishing the open forum in this city.

The first importation of whiskey through the frontier port of Bridgeburg, since the new regulations went into effect allowing the importation of whiskey from outside countries, occurred Friday when a Suffoltonian brought a supply into Canada with him that he had been cherishing for five years, so he said. The reverse of the former rule, however, is now the custom, Americans coming across the line to secure a supply of the precious fluid.

The Victory Loan canvassers of Niagara on the Lake are in receipt of a check for \$2500, half of their share of the percentage on their Victory Loan sales and expect the balance will be forthcoming in a few days. The money will be held pending a decision regarding what form the proposed Soldiers' Memorial will take, as it is to be devoted to that purpose. A meeting of the memorial committees will be called in a few days to ascertain the popular wishes regarding the memorial. At present it seems to have narrowed down to two proposals, a monument with a clock tower and a memorial library.

"Maytime" is the big attraction at the Grand tonight and there will be another big audience to enjoy it as there has been a large seat sale. The Company is a splendid aggregation and "Maytime" is one of the best musical shows of the season.

Joseph Reid, an old resident of Port Adelaide, died in Toronto yesterday and the remains were brought to McIntyre's today. Two brothers, Captains Joseph and John Reid survive. The deceased was unmarried.

Memorial For The Men of St. Paul St. Who Fell

A memorial service coupled with the unveiling of a Shield in memory of the dead heroes of St. Paul St. Church was held on Sunday. The following were the men honored.

- Private Thomas Letty. Private W. R. Gill. Private W. G. Ryckman. Sergeant H. P. Wolhauser. Signaller G. Fairfield. Private J. H. Hawke. Private W. Mitchell. Private C. E. Ryan. Driver A. C. Longley. Private W. Larch. Private J. Uppier. Sergeant J. Tamblingson. 1st Ward Officer K. Rowdon. Private R. Gough. Private W. B. Wells. Sergeant T. Goodley. Sergeant Major H. Stapleford. Following which the Pastor gave a short address and the service closed with the National Anthem.

Cincinnati Man Discovers Drug That Loosens Corns so They Lift Out

Local druggists are having a tremendous call for freezone, the drug which is said to shrivel a corn root and all, without any pain.

A few drops applied directly upon a tender, aching corn relieves the soreness at once and shortly the entire corn, root and all, lifts right out with the fingers.

This new drug is being dispensed at small cost in quarter ounce bottles, which is sufficient to take off every hard or soft corn from one's feet. It is a sticky substance which dries at once and does not inflame or even irritate the surrounding tissue or skin. There is no excuse for anyone inviting death by infection or lockjaw from cutting their corns now.

BIG LOSS IN GRANARIES

Bad Weather and Mice Destroy Much Grain.

Concrete Structures Best — How to Make Old Granary Efficient — Finish Ewes to Increase 1919 Lamb Crop — Great Shortage of Fall Wheat Seed.

(Contributed by Ontario Department of Agriculture, Toronto.)

NO hard and fast rules can be laid down for the erection of a convenient and efficient granary. Each problem requires a knowledge of local conditions and requirements. Granaries, in the majority of cases, are built in enclosures on the barn floor, and constructed with too little regard for strength, durability and convenience. These structures should be located immediately over the feed room, each bin having a chute with a controlling slide, or a canvas distributor to convey the grain to the hopper of the grinder; or if the grain is intended for market, to a sack placed on the scales below the chute ready to receive it. To facilitate emptying the grain, the floor of the bins should be sloping.

The important consideration in the construction of granaries and bins for loose grain is to be sure that the structure is designed with sufficient strength to prevent bulging of the sides and springing of the floor, for grain, owing to its enormous outward thrust, corresponding somewhat to that of water, has a tendency to burst the sides unless well braced or supported. Timber construction requires frequent repairs to prevent decay and general depreciation from use. It is always liable to climate conditions. The boards will crack and shrink in the summer when the bins may be empty, and when the new grain is dumped into the bins an enormous quantity promptly disappears into the cracks and crevices and through mice holes, entailing considerable loss to the farmer, to the consumer and to the nation. Thousands of bushels of grain are, in this way, lost to the producers through sheer indifference to the condition of the granary. Yet this preventable waste may be easily remedied and made secure by lining the bins with sheet metal.

The watchword is "Conservation." Every grain is needed to feed the Empire and its Allies. It is, therefore, highly desirable at this time to bend every effort to eliminate all possible leakage and conserve our grain for the need of the Allied nations. While there is an annual depreciation on a timber structure varying from 4 to 6%, concrete construction grows better as it grows old; hence concrete properly reinforced, is the ideal material for granaries, because it is both damp-proof and rat-proof, two very essential factors in the construction of granaries.

Concrete properly made to suit existing conditions, is absolutely impervious to moisture, and can be kept as dry as the structure of wood ever built. The experience of many farmers is that grain, mature enough to be placed in storage, will not spoil on contact with concrete, nor will it mold, provided there is good ventilation and the roof is tight. To get rid of rats and mice destroy their nesting place and to this end concrete is pre-eminently the best material and is recommended for all farm structures.

Under average present day conditions a reinforced concrete granary may represent an additional outlay of about 25% over that required to construct of timber, but the high efficiency distinctive of concrete quickly offsets this increased initial cost. Concrete construction has many in short, important advantages. The contents are safe from the depredations of rodents, is damp-proof, requires neither paint nor repairs, is fireproof, the grain is perfectly preserved under all conditions of climate and temperature, and the resulting structure is practically everlasting. — Prof. John Evans, Ontario Agricultural College, Guelph.

Care of Ewes After Weaning

In order to avoid udder trouble, it is necessary to keep a close watch of the ewes for a few days after they are separated from the lambs. Not a few cases of defective udders can be traced to the want of a little care in this respect. Milk should be drawn enough to keep the udder soft the day after the lambs have been weaned. After two days' time they are again milked out. Some ewes do not need any more attention after the second milking. Such ewes may be marked to indicate that they are dry. Three more days should elapse before the next milking is done and this method followed until it is certain the entire flock is safe. In conjunction with the method outlined above the ewes should be separated some distance from the lambs, and be on scant pastures until all are perfectly dry. This is a good time to go over the flock and cull out all undesirable members. Non-producers and those with broken mouths and poor udders should not be retained. A good deal of the success of the subsequent lamb crop will depend upon the treatment the ewes receive from time of weaning until after they are bred. They should have good pastures and be given an opportunity of putting on flesh. This is what is commonly called "flushing." Nothing better for this purpose than rape pasture. It is usually from six weeks to two months from date of sowing that rape is ready for pasture. If rape pasture is not available new seeding or second crop of clover will serve fairly well. Stock should not be turned on rape or fresh clover for the first time when the leaves are wet from rain or even dew, in order to avoid trouble from bloat.— J. P. Sackville, B.S.A., Ontario Agricultural College, Guelph.

National Hockey League results on Saturday were: Canadiens 14; St. Patrick's 7; Ottawa 7, Quebec 1.

Watch Your Child's Tongue!

Constipated Children Gladly Take "California Syrup of Figs"

For the Liver and Bowels

Tell your druggist you want genuine "California Syrup of Figs." Full directions and dose for babies and children of all ages who are constipated, bilious, feverish, tongue-coated, or full of cold, are plainly printed on the bottle. Look for the name "California" and accept no other "Fig Syrup."—Beware!

SAVING MOULDS CHARACTER

A prominent employer recently said: "The best men working in our shops to-day are the men who save money regularly. The steadiness of purpose and ambition thus displayed is apparent in their work. They are the men to whom advancement and promotions most frequently come and they will be the first to be laid off when dull times come." Open a Savings Account with
