SERGT. FOWLER ARRESTED
ON A CHARGE OF PERJURY
NIAGARA FALLS, N. Y., March 16.—Sergeant Robert J. Fowler, 44 years old, of the New York Central railroad special police, was arrested late yesterday afternoon on a warrant issued by Police Judge Piper, charging perjury. Solomon Mokhiber is the complainant.
Last June Mokhiber and Herman Geese, who were employed by the New York Central, were arrested on charges of petit larceny. Fowler testified that they were connected with a theft of underwear from freight cars in the north end yards. They were discharged by Police Judge Piper, but lost their positions with the railroad and were unable to get their back.
An organization of railroadmen took up the cudgels in behalf of the two men in an effort to have them reinstated. A week ago William Strohm, a former detective under Fowler, and

Herman Geese, a special policeman, testified at a John Doe proceeding before Judge Piper that Fowler had framed Mokhiber and Shear. Judge Piper reserved decision in the case and in the meantime, Mokhiber obtained a warrant for Fowler's arrest.
Fowler was admitted to bail last evening by Justice Alonzo G. Hinkley at Buffalo on application of John Maloney, the Central's police chief, and Inspector Smith of Albany. He was released and ordered to appear for a hearing in police court here this morning.
Following a protracted illness, Mr. William Banks, Sr. died at the Wellesly Hospital, Toronto, at noon yesterday. Recently gangrene poisoning set in in the right leg and on Saturday he was removed from his home, 70 Dewson street, to the hospital, where this limb was amputated at the knee. In his weakened condition he never rallied, and passed peacefully away about the noon hour. He had been connected with Toronto newspapers for many years.

QUALITY HARDWARE
GOLD MEDAL
What Makes a Good Hardware Store?
Not alone the large plate glass windows on the main street, nor the fine showcases inside, nor even the genial, friendly proprietor.
The **QUALITY OF THE GOODS** sold is what really tells, and brings you back again next time.
That's just the case with the famous Hobbs Gold Medal Lines. The store that carries goods bearing this mark is a good store to trade at.
Look for the Gold Medal label on Harvest Tools, Garden Tools, Lawn Mowers, Sewing Machines, Washers and Wringers, Refrigerators, Cutlery, Binder Twine, Roofing, Safes, Sporting Goods, etc.

ABOUT THE SEED DRILL
What Is Considered to be the Most Efficient Type.
The Feeding Device Is the Heart of the Drill—Seed Should Be Dropped Directly Under the Axle of the Disc—Give the Bearings Careful Inspection.
(Contributed by Ontario Department of Agriculture, Toronto.)
As the drill sows, so shall the farmer reap, is no fallacy. It is as true in its content as the maxim "As a man sows so shall he reap." Given the right kind of a grain drill, the seed is all planted at a uniform depth, evenly covered; the earth compacted just enough to retain the moisture around it. These conditions mean that the young plants will all come up at the same time, that the grain will be well protected, and that the grain will ripen uniformly. As the grain is planted, so will it grow and ripen. If some of the seed is planted too shallow, and some too deep, the seed that comes up first, ripens first. Thus it is that some of the grain is ready to harvest while other patches are still in the milk stage.
The feeding device is the heart of the grain drill. Upon its reliability depends the accuracy of sowing the seed. The drill scale is computed for the average sized seeds, and therefore cannot always be depended upon when the size of them varies from the normal. If the grain is oversized or undersized the required amount per acre may be sown by setting the feed lever at a point slightly greater or slightly less than shown on the indicator. There are, in common use, two different forms of feeding devices. The fluted-cylinder-force feed, and the double-run-force feed. The amount of seed sown by the fluted-cylinder-force feed may be regulated by a lever which changes the size of the outlet, but it does not always handle all classes of seed without breaking them, as can be done with the double-run-force feed, which necessarily requires driving it at a disc wheel, or a cog wheel with from nine to fifteen sets of cogs that make as many speeds or feeds.
In the most efficient type of grain drills the seed should be deposited as nearly directly under the axle of the disc as possible, as this is the only place where the seed can be dropped directly on the ground from the trench without hindrance. By this method the disc is not run deeper than the seed is deposited, thus the draft is reduced to a minimum. If the seed is deposited in the rear of the centre of the axle, the rotation of the disc tends to carry earth and seed up with it, causing the seed to be unevenly deposited. In operation, a properly angled disc opens a trench about two inches wide. The falling seed strikes the concave side of the shield, and is thus scattered evenly over the entire width of the trench.
Grain seed drills are divided into four kinds, according to the type of furrow opener—the open delivery single disc, and the closed delivery single disc, the double disc, the shoe, and the hoe drills. The open delivery single disc furrow opener deposits the seed between the shield and the convex side of the disc. The space is open from the end of the boot between the disc and shield to the bottom or lower end of the shield. The shield prevents the falling seed from becoming mixed with the loose earth and surface trash and insures its free passage to the bottom of the trench made by the disc. It will also do excellent work in highly cultivated soil that is free from trash.
The closed delivery single disc furrow opener has a closed boot, similar to a hoe furrow opener, which comes down at the rear edge of the disc and deposits the seed about two inches back of the disc. It does not plant the seed at as even a depth as either the open delivery single disc or the double disc, but deposits it at least eight inches in rear of the disc hub, and wherever it meets with an obstruction, rock or hard frozen soil the disc rises up and carries the boot with it, broadcasting the seed on the surface.
There are many styles of double discs, but the one that plants the seed under or slightly back of the disc axle, or hub, is the one to use for that point is the deepest part of the furrow. The furrow opener that shoots the grain forward of this centre is to be avoided for the reason that the seed reaches the ground before the furrow is fully formed, and it is, therefore, mixed with the soil as the seed trench is being made, causing what is termed "chattering." The double disc type of opener tends to spread out the seed more than other kinds, so that each seed has a somewhat greater area from which to draw moisture.
The hoe furrow opener or shovel opener does not penetrate the ground readily and clogs easier than any of the other types. The shoe opener does no better work, and rather than clog will run over trash and thus plant the seed at varying depths.
In selecting a drill the bearings should be given careful inspection. They should be dust proof. The hard oiler must be considered superior to all others for this kind of work, as the oil can be forced into the bearing from the centre, and as it works out it carries all the dirt with it. It should have a well-braced seed box with steel hopper bottom to allow the seed to pass freely into the cups; strong frame and substantial wheels are important features. The distance between the furrow opener varies to some extent but six inches is the usual spacing. The seed tubes may be of rubber or of steel ribbon. The rubber tubes give good satisfaction, but are not durable if exposed to the weather. The steel ribbon tubes serve the purpose well, and if painted will last as long as the drill.—Jno. Evans, O. A. College, Guelph.

Very Simple Cure For Bad Colds
Let your cold gain headway and you can't keep it from running into Catarrh.
Catarrh never stays in the same place—it travels down into the lungs, then it's too late.
Drive colds and catarrh right out of your system while you have the chance.
Easily done by inhaling Catarrhazone, which instantly reaches the true source of the trouble, gets right where the living germs of catarrh are working.
Catarrhazone
A Convenient Inhaler Treatment is the Proper Remedy to Cure.
Hawking and spitting cease, because the discharge is cured. The nostrils are cleared, headache is relieved, breath is purified. Every trace of catarrh, bronchial and throat weakness is permanently cured.
Shun medicines that contain harmful drugs—use a safe remedy that is prescribed by doctors, that is used in hospitals, that is endorsed by thousands Catarrhazone has cured.
For winter ills there's nothing half so good.
Two months' treatment, large size price \$1, and guaranteed. Small size, 50c., trial size 25c., at all dealers everywhere.

JACK JOHNSON NEARS THE BORDER
MEXICO CITY, MEX., March 16.—Jack Johnson, former champion heavyweight, has reached Manzanillo on his way to Tia Juana, which is just this side of the border in Lower California. Before leaving Mexico City Johnson said he had arranged a series of fights to take place in Tia Juana. He announced he was to meet Sam Langford of Boston and Harry Wills of New Orleans, and also made the statement, which sporting men here refused to take seriously, that Jack Dempsey had agreed to box him in Tia Juana.

INFRINGING ON RIGHTS TO PASS EIGHT HOUR DAY LAW
OTTAWA, March 16.—The Dominion Parliament, generally speaking has no right to enact an eight-hour day law, in the opinion of Minister of Justice Hon. C. J. Doherty. He gave this as his personal opinion when the subject was under discussion in the house last night as the result of a resolution brought in by J. H. Burnham, (Peterboro). However, the British North America Act, he believed that if Canada entered into some treaty under which it was bound to enact some particular legislation Parliament would have power to legislate for the purpose of giving effect to such an obligation.
Hon. Mr. Doherty said that on the question of legislative jurisdiction there were some very strong opinions held by those who speak for some of the provinces adverse to that which he had expressed. In view of that condition of affairs, he said it might become necessary to have the question authoritatively passed upon.
Explain Treaty Provisions
Both Hon. Mr. Doherty and Hon. Newton W. Rowell, President of the Privy Council, were careful to explain where responsibility of Parliament on the question of the eight-hour day began, and where it ended. "The provisions of the Peace Treaty," Mr. Doherty said, "do not impose upon the nations an obligation to enact laws to carry out the particular conventions adopted. The obligation, as set forth in that the respective governments will bring before the competent authorities a convention for the enactment of legislation or other action."
DR. DEVAN'S FEMALE PILLS is the medicine for all Female Complaints. 25c. a box, or three for \$1.00, at drug stores. Mailed to any address on receipt of price.
PHOSPHONOL FOR MEN increases Vitality; for Nervous and Brain; increases "grey matter"; it tonic—will build you up. 25c. a box, or two for \$1.00, at drug stores, or by mail on receipt of price.

HELPLESS WITH RHEUMATISM
Until He Took "Fruit-a-Lives" The Fruit Medicine
R. R. No. 1, LORNE, Ont.
"For over three years, I was confined to bed with Rheumatism. I treated with doctors, and tried nearly everything without benefit. Finally, I tried "Fruit-a-Lives". Before I had used half a box I saw improvement; the pain was easier and the swelling started to go down. I continued taking this fruit medicine, improving all the time, and now I can walk about two miles and do light chores about the place."
ALEXANDER MUNRO.
50c. a box, 6 for \$2.50, trial size 25c. At all dealers or sent postpaid by Fruit-a-Lives Limited, Ottawa.
It goes no further than that. The convention goes on to point out that if that competent authority does not adopt legislation, or does not act there is no further obligation upon the country.
Thus when the convention entered into officially reaches the Government it will fulfill its obligation if it refers the matter to the Provincial Legislatures; that is providing it still finds that it has no jurisdiction. If the province takes no action the Federal authorities have no further responsibility. However, should the Dominion Government fail to carry out its obligation by submitting the convention to the proper authorities, an economic boycott could be declared against the country, it was explained by M. Rowell.
C. W. Cook left for Little Current Manitoulin Island, where he will spend the summer. Mr. Cook, who is one of Welland's old time hockey fans, was manager of the junior team in the past season and helped the boys to make a very creditable record.

A joint meeting of the Merriton and Thorold councils was held in the Merriton council chamber to discuss the advisability of making representations to the Minister of Highways in an endeavor to have the Provincial Highway to Niagara Falls pass through Merriton and Thorold. The discussion on this important question was brief and to the point, the meeting decided upon the appointment of a deputation to wait upon the Minister and Deputy-Minister of Highways urging that the Provincial Highway be brought from the Queenston and Grimsby road along Hartzel road through Merriton and Thorold and on to Niagara Falls, providing the government pay the same proportion of construction and maintenance costs as to rural municipalities.
Robert Shekelton of Fonthill who has spent the winter at his old home in Ireland has returned home.

Diplomat outcast soul seeker
A GENTLEMAN who had held an important diplomatic post lost his grip and sunk so low that he became an outcast.
ONE night, under the Providence of God, he met a converted fellow countryman in a certain institution. Through him he was brought to know Christ.
HE has since become a worker in the Salvation Army. He has returned to His native land to seek lost souls and to carry on the war against sin.
308 Service Posts in this Territory. Use them!

Ford
WE ARE Ford Dealers in this district and have formed an estimate of the number of cars we will require to meet the needs of this territory. We cannot get enough cars to fill that estimate because there are not enough cars being made to fill all dealers' estimates throughout Canada.
The number of cars we can get depends upon the number of orders we send in and the early date at which we send them in, as the Ford Shipping Department follows the principle, "First Come, First Served."
Cars ordered now will not be delivered until March, and deliveries will be uncertain throughout the year. If you do not want to wait for summer or autumn delivery, come in and reserve your car by signing an order today.
