YOUR TEETH—

DR. LEHR, Dentist,
229 Water Street.

PYORRHEA.

Pyorrhoea is the most destructive, the most difficult to treat, yet one of the commonest of all the diseases of the teeth. It is present in the mouths of countless thousands of adults who fondly think their teeth are in perfect condition. It progresses slowly, and in its early stages, painlessly. The gums become soft and bleed easily, then they grow sore and become inflamed. Pus forms at the roots of the teeth and they loosen in their sockets. When the disease reaches this stage it affects the general health and usually extraction is the only remedy.
