

"Mount Pearl Turnip Greens."

Since the canning of Food Products has been commercialized, it is a daily occurrence to eat fruits and vegetables grown 10,000 miles away from Newfoundland; now for the first time one of our local Newfoundland vegetables has been canned, and is offered for sale.

During the past summer about 10,000 lbs. of Turnip Greens were packed in the factory of the UNITED CAN MANUFACTURING CO., LTD., under expert workmen and thoroughly sanitary conditions. These Turnip Greens were purchased mostly from farmers in the Mount Pearl district and are now on the market under the name of "Mount Pearl Turnip Greens." It took 4 1/2 lbs. of fresh turnip greens to fill each can, and as the retail price is 35c., they come really cheaper than early spring greens, in addition to which they are already thoroughly cleaned and only have to be heated for the table.

Those who have already tried some speak very highly of them, and a brisk sale is expected by the following grocers who have them for sale:—

Newfoundland Poultry Association.

12TH ANNUAL REPORT.

Gentlemen.—It gives us great pleasure to present to you the 12th Annual Report of the Newfoundland Poultry Association for the year 1922 which has been one of increasing progress and usefulness generally towards stimulating general interest in poultry culture in this Dominion. Our finances are in a sound condition as you will see by the audited accounts of our highly esteemed and popular Treasurer, Mr. W. R. Butler, who has a substantial balance on hand with all liabilities discharged. During the year there has been a satisfactory increase in membership and increased interest by members in the monthly meetings. During the year three months experimental laying contest was arranged—eleven pens of various breeds started March first but only four pens completed the test—the rest being withdrawn. The birds remained in their owners' care and no official records were made by the Association. The winning pen consisted of two Rhode Island Red Pullets by Judge Stanley White who was awarded the silver cup presented by Hon. President H. W. LeMessurier, Esq., C.M.G. The contest was not a success as far as arrangement goes and the Association looks forward to holding one sooner or later on the same lines as conducted by the Department of Agriculture at Truro, Nova Scotia—as a practical demonstration to the people of Newfoundland as to the producing capabilities of various breeds of poultry kept under modern methods. The Association offered prizes to school children for writing an essay on the Show of 1921. The winners were Alice Rusch, John Noseworthy, and Neil Skinner, who were given their prizes in January. The Propaganda Committee under the Chairmanship of A. J. Bayly, Esq., Secretary of the Board of Agriculture, did splendidly during the year by publishing articles in the press, on poultry raising, visiting Bay Roberts on March 17, and giving there a lecture in the Court House on poultry culture, the speakers being A. J. Bayly Esq., Professor H. A. Butler B.Sc.A., and President Williams. Prizes were offered for essays to be

competed for by the children and were duly awarded and distributed the following month. The donors of the prizes were Messrs. John Duff, W. R. Butler, Dr. Arch Tait and the President. In February the annual dinner of the Association was held in Wood's Restaurant, and duly presided over by Hon. President H. W. LeMessurier, Esq., C.M.G. It was a great success. The Premier Sir R. A. Squires, Hon. Dr. Campbell and Secretary A. J. Bayly of the Department of Agriculture being the speakers of the evening. During this occasion the members had the pleasure of presenting the Hon. President, H. W. LeMessurier with a gold mounted umbrella as a testimonial of esteem—this year being the anniversary of his golden wedding and the members hoped he and his good spouse would enjoy many more happy anniversaries. At the April meeting some hens were placed on exhibition and their various points discussed on the brooding and laying points which was quite an educational feature. During the spring the Association's members jointly advertised the sale of hatching eggs and as a result some 2,500 eggs were distributed around the island from their pens of high grade poultry. Live birds were also sold for breeding purposes—some going to Labrador, St. Anthony, Fogo, Heart's Content, Badger, and various other places. The distribution of pure bred eggs from the best class of birds procurable must result in raising the standard and put new blood into the poultry world of our country. The Association members usually find it unsatisfactory to import eggs for hatching from Canada and the States due to the long and tedious transportation by railway and steamer. The importation of best grade birds is therefore usually done by the Association members to maintain the standard. Hatching eggs distributed from St. John's give undoubtedly more satisfactory results. As an acknowledgment of the assistance given the Association by the Rev. C. Wood of Westport, White Bay, and Mr. James Pike of Crab's Station, West Coast, they have been given honorary members. Both these gentlemen are distributing a large number of hatching eggs from these centres yearly. During the year several discussions as to Model Poultry houses, suitable

to this climate took place and the plans of the Truro College of Agriculture as submitted by Architect W. D. McCarter, St. John's, were unanimously approved and adopted. Any person requiring plans can secure them from the Secretary at nominal cost. The Association offered the Bell Island Junior Poultry Club a supply of hatching eggs and a special prize to assist in increasing their flocks. In November a deputation of nine members visited Bell Island for the opening of their 3rd Annual Show and were courteously received. We were also pleased to help our sister Association by the loaning of coops etc. to fit up their show in the C.I.B. Armoury there.

This Association's eleventh annual exhibition was held in the C.I.B. Cadets' Armoury, St. John's, Nov. 29th, 30th and December 1st. The official opening ceremony was kindly performed by Chief Justice Sir W. H. Horwood, Administrator of the Colony. We also had the pleasure of having with us his Worship the Mayor and Mrs. Cook, Hon. Dr. Campbell, Minister of Agriculture and Mines and other friends and supporters of the industry. There was a record attendance on the part of the public, some five hundred more persons in excess of the previous year being present as well as a record number of birds on exhibition, over 700 birds being shown. Invitations to all members of the Bell Island Poultry Association to be our guests on this occasion as well as at the dinner in the Armoury were extended. Professor J. P. Landry acted as Judge this year. Mr. Landry has helped the Nfld. Poultry Association ever since its organization and the members extend to him their sincere gratitude. The Association places on record its appreciation of the services of Spencer Club, who catered at the dinner as well as provided teas all during the three show days in an excellent manner. We were glad to see exhibits from Topsail, Kelligrews, Heart's Content, Grand Falls, and Crabbe shown this year and congratulate Mr. W. K. Chassey of Grand Falls winning for the third year the Championship Bar'd Plymouth Rock cup. The fitting up of the showroom was done most efficiently by Contractor W. R. Butler through the courtesy of Messrs. Ayre & Sons, Ltd. Professor Landry was very pleased with the exhibition generally and spoke highly of the quality, saying many of the birds would win prizes in keen competition in Canada—a feature of Professor Landry's visit was his lectures each evening, illustrated by moving picture films, and the public were all eagerly interested and we would recommend these lectures be continued annually.

The Truro plan Model House was built and exhibited at the show and disposed of by lottery with other prizes—the winner of the house being Miss Florence Anderson, daughter of Dr. T. Anderson. At the close the prizes were kindly distributed by Lady Horwood, who was presented with a bouquet of flowers by his Honor the Mayor Hon. Tasker Cook on behalf of the Association. The Administrator Sir William Horwood in his address at the closing of the show kindly presented a prize of ten dollars for the best exhibit of native geese bred from the exhibitor's birds at the next exhibition. As many of the public attending the show made enquiry as to the florist exhibit, as held in 1921, we hope to revive the exhibition of flowers in 1923, which is a popular feature and gives to our friends the florists an opportunity as well, to give a demonstration of what beautiful blooms can be produced in St. John's. We wish to express our thanks to the donors of the Championship cups for their kindly interest in encouraging poultry culture and to many other kind friends for their support during the year now closed. We wish to specially record our high appreciation of the efforts and personal interest displayed by Hon. Dr. Campbell, F.R.C.S., Minister of Agriculture and his department in the work of poultry culture in the Colony generally. Dr. Campbell having been the only Minister of Agriculture to exhibit birds in the Nfld. Shows and to win his Blue Ribbons. We also acknowledge with thanks the annual grant of Four Hundred Dollars towards the expenses of the Exhibition, which costs on an average nine hundred dollars to hold annually, and also the special grant to cover the cost of the illustrating lantern to use in giving lectures in the future on the subjects of Poultry Culture. Our thanks are also due to Lt.-Col. Goodridge of the C.I.B. for his kind offer in storing free of charge the Association's coops and exhibition lumber. In conclusion we take this opportunity to extend a hearty welcome to his Excellency Sir William Allardye, our new Governor and Lady Allardye to England's Oldest Colony. His Excellency is keenly interested in Poultry Culture and has already signified his interest in our work by having voluntarily and spontaneously offered our Association a Silver Cup as a prize for 1923 Show. Thanking the members of the Association for their co-operation and support during the year.

Respectfully submitted,
(Sgd.) GEO. B. WILLIAMS, President.
W. D. McCARTER, Secretary.

Beans and Green Peas!

Overstock of best quality Baking Beans specially reduced to clear.

Best Large White Kidney Beans, 5c lb. 14 lbs. for 60c.

Best Small White Kidney Beans, 5c lb. 14 lbs. for 60c.

HAPPY NEW YEAR.

Happy New Year! That's the wish of the tongue.
Happy New Year! It's so easily flung
On the breeze of the morning to
—friends passing by—
With a smile on the lip and a gleam
In the eye.
Yet wishes are idle, I fancy, to cheer
Unless we can make it a Happy New Year.

Happy New Year! That's the greeting
We fling
As a wish that the future will happily
—bring—
Happy New Year! And we pass right
—along—
With a wish that's bestowed as the
—lilt of a song—
And yet if our wishes are really sincere
For all we must make it a Happy New Year.

Happy New Year! Yet the weeks and
the days
Bring nothing of joy to the world's
troubled ways;
They come and depart, and the joy
that we take
And long shall remember, another
must make.
From us who are living and toiling
down here
Comes much that will make it a
Happy New Year.

It's the smiles that we give and the
help we bestow
That fashion earth's joy as the days
come and go;
It's the laughter we share and the
griefs we console
That memory keeps as the years on
ward roll.
For after the burden and after the
tear,
It is friendship that makes it a
Happy New Year!

Dye Old Skirt Coat, Dress in Diamond Dyes

Each package of "Diamond Dyes" contains directions so simple any woman can dye or tint her worn, shabby dresses, skirts, waists, coats, stockings, sweaters, coverings, draperies, hangings, everything, even if she has never dyed before. Buy "Diamond Dyes"—no other kind—then perfect home dyeing is sure because Diamond Dyes are guaranteed not to spot, fade, streak, or run. Tell your druggist whether the material you wish to dye is wool or silk, or whether it is linen, cotton or mixed goods.

India Building a Convention City.

GAYA, India.—Preparations are being made here on a large scale for entertaining the Indian National Congress at its coming annual session. The great pandal, now in progress of construction, will accommodate 20,000 people. Special arrangements are being made for the entertainment of women delegates. Swarnajuri is the name given to the temporary city in which the Congress will meet. The reception committee is building 48 blocks of houses, each with 24 rooms. Hot and cold water connections and electric lights are being provided for the whole area. The construction work is now nearing completion, and is being inspected daily by crowds of pilgrims who pour in from all parts of the province. This will be the thirty-seventh session of the Congress, which was founded in 1885. Its present object is the attainment of home rule by the people of India by all legitimate and peaceful means. The Congress always has laid special emphasis on non-violence as an integral part of its non-cooperation resolutions.

Never Misses

His Fencing.

ROME.—Premier Mussolini, despite the great amount of work before him, and the long hours he spends each day at his desk, finds time every morning to indulge in his favorite pastime of fencing. For one hour after breakfast he crosses swords with a famous professor, and only a few days ago when his companion, tired from his exertions showed signs of faltering, Mussolini took on two of the professor's assistants for the remainder of the hour. He is one of the best amateur swordsmen of Italy, and has fought innumerable duels in which there is no record of his ever coming out second best.

Frequent Coughs

Many do not realize the significance of the all too frequent cold or cough. Care should be taken to build up the powers of resistance.

Scott's Emulsion

abundant in health-building vitamins factors, helps build up a reserve of strength and resistance. Be sure and ask your druggist for Scott's Emulsion!

Full Speed Ahead

We are getting ready for a bigger business. We find that the public is demanding more for its money than ever before, which makes it necessary for us to eliminate all unnecessary overhead expense and at the same time turn our stocks faster than was before thought possible.
