

Quebec Southern Power

1-2 p.c. Bonds
Due May 1st, 1945.

This Corporation serves light and power to 30 municipalities in the Laurentian district under generally exclusive franchises. The territory served has an area of 10,000 square miles, is prospective, and has a present population of approximately 100,000 which is showing a steady increase.

I recommend these bonds as an investment and will forward descriptive circular on request.

Price: 100 and interest to yield 6½ p.c. on common stock with each \$1,000 bond.

SOUTHERN PACIFIC.

Statement of Net Earnings for July Disappointing.

Rise in Expenses Has Been a Disquieting Feature of Statements for Several Months—Traffic Less—Dividend Increase Unlikely.

With an insignificant gain in gross revenues for July after a June increase of 10%, and a shrinkage of nearly \$1,000,000 in net operating income after some little upturn in that item in June and a loss of less than half as much in May, Southern Pacific's latest statement may fairly be called disappointing.

The gain in gross of \$206,300 to \$242,525,900 was less than 1%. Freight earnings were up nearly 2% while passenger earnings were almost stationary. Considering that the seven months show a decline in passenger receipts of \$2,341,000, the slight gain in June and the slight loss in July apparently indicates that long distance travel is at last offsetting the desertion of local passengers to buses. But the July revenues in general little more than held their own with the previous July and were substantially below those of June of this year. For the seven months the decrease of \$2,435,042 or 1.5% in gross was almost entirely in passenger revenues. A

R. S. White, Editor-in-Chief of the Gazette, was nominated as Conservative candidate in the forthcoming General Elections for the newly created Federal division of Mt. Royal at the convention here last night.

SPANISH ADVANCE.

MADRID, Sept. 12. The latest official communication issued by the War Office dealing with the operations in Morocco says that the Spanish forces fighting the rebels in the Tetuan region have been reinforced and have won an advantageous position and thus have diminished the enemy's resistance. The Spanish casualties were 35 killed, and the rebels have 500 killed.

REFUSES TO ASSOCIATE WITH COMMUNIST DELEGATE.

LONDON, Sept. 12. Another member of the House of Commons, Capt. Peter D. MacDonald, a Conservative, from the Isle of Wight, has withdrawn as a delegate to the Inter-Parliamentary Union Conference at Ottawa and Washington, as a protest against the inclusion in the Delegation of S. Saklatvala, Communist. Captain MacDonald was born in Nova Scotia and is descended from Sir John MacDonald, the first Premier of Canada.

Newest Umbrella Folds Into Thin Inch Roll

When the shower is over, you roll up the umbrella and put it in your pocket. The roll is only 10 inches long and 2½ inches in diameter.

Frank J. Pugel, of Pueblo, Colo., the inventor of this ingenious device, is a true friend of the man who hates to carry an umbrella. The ribs of the umbrella are hinged in the middle so that the outer half of the top folds back, while the inner half folds in like the ordinary umbrella. The handle telescopes.

Opening and closing the umbrella is done by screwing or unscrewing the handle a few turns.

Life in Herschell Island

Edmonton, Alta, Sept. (By Canadian Press).—"For over five months she had seen no darkness." So a reporter on the local press wrote of Mrs. M. Lyman, who has spent the last two years at Akavik and Herschell Island. Mrs. Lyman signed up in 1923 to go north in the employ of

There's a 'Nugget' shade for every shoe made

the Hudson Bay Company. She was on board the a.s. Arctic Distributor when Judge Dubuc and party went up for the purpose of holding court at Akavik. Mrs. Lyman received a radio message from Edmonton which had been sent Dec. 28, 1924, on April 7, 1925. It had been picked up at Fort Good Hope by wireless and from there was relayed on by dog team. She received her Christmas presents by mail, July 4.

Strange as it may seem, ice is in great demand at Herschell Island. This of course is necessitated by the fact the sea water is unfit for either drinking or cooking purposes. In summer it is necessary to take a schooner and go out and chip pieces of the icebergs floating in the Arctic Ocean, and then melt it down for domestic use.

The Eskimos are very imitative and in customs, manners and dress are rapidly becoming more and more like the people to the south of them. During the time she was on Herschell Island, Mrs. Lyman made some 20 dresses for Eskimo women, all of the finest silk available. She never once saw a father whip his child, but the children are well brought up and obedient.

Parrot on the Cathedral Roof.

Defying all attempts to re-capture it, a parrot, which it is presumed is the bird advertised as lost yesterday, has remained all the morning perched on the apex of the roof of the Anglican Cathedral. The Telegram is glad to have located the lost property, but regrets that under the circumstances it is unable to restore it to the owner.

Napoleonic Wars

BUILT ON BIG CANADIAN PAPER COMPANY.

The origin of the great business of Price Brothers & Company dates back to the Napoleonic War. At that time, Britain was urgently in need of material and sent a representative to this country to purchase wooden masts for the ships which the Admiralty required. The representative was William Price, then a young man of twenty-one. He came from Elstree, Hertfordshire.

When young Price had accomplished his job for the Admiralty, he went into the lumbering business in 1817. From that has developed the great company of to-day with many thousands of miles of timber limits and thousands of employees.

The original Price of Price Brothers had fourteen children. Three of these, William, David and John, he took into the business as partners. Another son, Henry, was something of a rover and spent part of his time in South America. This is the reason why Sir William Price, who was a son of Henry, was born in Chile.

Will Einstein Theory Fall?

The Einstein theory of relativity soon may fall, and we may have to look for another explanation regarding the mysterious movements of the universe. Professor Einstein himself has just admitted it. It results obtained recently by Prof. Dayton C. Miller at Mount Wilson Observatory are confirmed, he says, it means that the relativity theory does not hold.

For Professor Miller's results indicate the earth's motion through the ether. According to the relativity theory, it should never be possible for any one on earth to detect this motion. If all things in the whole universe—planets, stars, and other—are moving at the same rate and in the same direction, the results of experiments on earth would be exactly the same as if all were standing still.

But if the earth and other bodies were moving through stationary ether, or at different rates, then there should be a drifting of the ether in their paths that could be observed from earth.

Professor Miller first made his experiments from an underground chamber, just as Professor Michelson and Professor Gale of the University of Chicago have been doing in tests of the Einstein theory. Like them, he could detect no motion—evidence substantiating the Einstein theory.

Their results, however, possibly might be explained by "ether drag." That is, in some way heavy bodies, such as the earth, drag along a certain amount of ether in their motion,
