13" A young minister in Souland was about to preach a probationary sermon in a church for the ministry of which he was a candidate. Being a stranger, he was housed and entertained by a parishioner, who invited many of his fellows to sup with the candidate on the Saturday night. The elders had quietly saturated themselves with toddy and smoke, when the unlucky probationer in his innocence, proposed, before they parted, "Honest men and bonnle lassies." The unco right-sous looked through the smoke and overthe glasses with orthodox horror, and the most solemn tippler present rose and said that no minister would have their sympathy who could not stick quietly to his ilquor, and prevent his thoughts from running on the lasses so near the Sabath. The company assented, and the candidate had to forego the honour he bath. The company assented, and candidate had to forego the honour

GENTLENES, 4 have no hesitation in saying that I believe the great majority of Locomotive Engineers have found by experience that Walham Watches are the most satisfactory of any for their uses. They run with the greatest accuracy and steadiness, notwithstanding the rough iding of an engine, and as I have never known me to wear out, they must be durable. I hope to see the time when Railway Companies will cenerally adopt your watches, and furnish them oall engineers and conductors. In my opinion would greatly tend to promote regularity and aftery.
