INCIDENT AT CARENCY

Quick Firers in Cemetery and in Pastor's House.

[Canadlan Press.]

PARIS, June 1 .- 5:45 p.m. - The official eyewitness today gives supple-mentary details of the capture by French forces of the town of Ablain St. Nazaire,

to the northwest of Arras.

"French troops," the writer says, "on
May 12 occupied most of the position
and on May 28 and 29 succeeded in completing its capture. In the first attack we occupied many houses and important vantage points, but the Germans clung tenaciously to the church and cemetery. It was through the centre of the village and in and around the cemetery, therefore, that the hottest fighting took place. On May 28 the same division which had distinguished itself by the capture of Carency, taking 2,700 prisoners in four days, began the attack. The commander of the French forces knew exactly the enemy's strength—five quick-firers in the ceme-tery and four quick-firers stationed in a priest's house—as well as many other details, including knowledge of the low morale of the troops, to which the German prisoners had attested.

Before the attack was begun a heavy fire was directed on the ground behind the cemetery, thus effectively preventing the enemy from advancing any re-inforcements. Bravely charging over the broken ground, our troops were not long in obtaining their objective, dispersing the Germans before them and quickly attaining the low rise on which the cemetery is situated. Other soldiers executed a flank movement and attacked and routed the Germans.

"Thep osition was being quickly organized when a strange apparition appeared. It was a thick column of the enemy running towards us. We believed at first that it was a counter-attack and we prepared to resist it. But the men were all unarmed and with hands raised above their heads they gave themselves up, racing at full speed across the cemetery in fear of their own

"Complexion Secrets Of An Actress"

In a recently-issued volume bearing the above title, the author says: "Con the above title, the author says: "Continuous use of grease paints, rouge and the like, had ruined my complexion. My skin was colorless, wrinkled, coarse and punctured with large pores. In England I heard of the virtues of mercolized wax; my first experience with this marvelous substance convinced me it was more valuable than all cosmetics combined. Now whenever my complexion begins to go wrong I get an ounce of mercolized wax at the nearest drug store, spread on a thin layer of it before retiring, washing it off next morning. The wax, after a few such treatments, seems literally to absorb the worn-out cuticle, when a brighter, healthier, younger-looking skin appears.

"For the wrinkles and enlarged pores I began using a solution of saxoiite, one ounce, dissolved in a half pint witch one ounce, dissolved in a half pint witch hazel. Bathing the face in this every day for a while soon relieved the condi-tion most wonderfully."

AN EASY WAY TO GET FAT AND BE STRONG

The trouble with most thin folks who wish to gain weight is that they insist on drugging their stomach or stuffing it with greasy foods; rubbing on useless "flesh creams," or following some foolish physical culture stunt, while the real cause of thinness goes untouched. You cannot get fat until your digestive tract assimilates the food you eat. Thanks to a remarkable new scien-You cannot get fat until your digestive tract assimilates the food you eat. Thanks to a remarkable new scientific discovery, it is now possible to combine into simple form the very elements needed by the digestive organs to help them convert food into rich, fat-laden blood. This master-stroke of modern chemistry is called Sargol and has been termed the greatest of flesh-builders. Sargol aims through its regenerative, re-constructive powers to coax the stomach and intestines to literally soak up the fattening elements of your food and pass them into the blood, where they are carried to every starved, broken-down cell and tissue of your body.
