OCEAN DOCK SURVEY.

The Dominion to Have an Official Report as to Depth of Water.

Will the Canadian Pacific Company's Steamships Run in

It is understood that within the next ortnight there will be an official survey made of that portion of Victoria Harbor known as the Outer Wharf, to ascertain exactly what depth there is at all tides. This survey is to be made by order of the Dominion Government, and the report made will be forwarded at once to Ottawa. Victorians are well acquainted with the steps that have been been taken from time to time to provide at this port a wharf there steamers and steamships weathers and under all conditions to land assengers and freight. The work, he energy and enterprise of Mr. R. P. Rithet was practically completed some time ago, but there was still some work in the way of dredging to be done by the Dominion Government, for which an minion Government, for which an appropriation was voted at the last session of the House of Commons. The Dominion unds so far available have been nearly expended, and in the next week or ten days a report will be made as to the depth of water and other matters.

The outcome of this report will be

awaited with interest, as it will then be found out, through official channels, whether the Canadian Pacific company's steamers, the Empresses of India, Japan, and China, are to come in here or not. The C.P.R. has promised that they will come when there is water enough provided. The report will show officially that there is ough and to spare.
