

# INGLUVIN

From the *Ventriculus Callosus Gallinaceus*.

Prescribed in the same manner, dose and combination as pepsin  
(5 to 20 grs.) with superior results.

**A Specific for  
Indigestion.**

**Removes the  
Cause.**

**Nature's  
Assistant in  
Dyspepsia.**

**A True Stomachic  
Tonic.**

**Produces Normal  
Digestion,  
Therefore superior  
to Pepsin.**

INGLUVIN is the specific treatment for all forms of gastric and intestinal indigestion, as it not only relieves the symptoms, but removes the cause, by its tonic effect on the stomach and intestines, thus, the motor activity and digestive ferments are sufficiently increased to carry on a normal digestion of both the nitrogenous and starchy food products.

Its exclusive, peculiar, active bitter principle acts directly upon the peptic glands and tones up the digestive reflex nervous mechanism, excites a normal flow of the digestive ferments and an increased blood supply to the glands and mucous membrane of the stomach and bowels, thus, enabling NATURE to carry on a normal digestion instead of a limited artificial process as when Pepsin is administered.

## PILL ANTISEPTIC COMP.

SUGAR COATED ONLY.

ANTI-DYSPEPTIC.

ANTI-RHEUMATIC.

FOR INDIGESTION, MALASSIMILATION OF FOOD, AND  
ALL FORMS OF DYSPEPSIA.

<b>R</b>	Sodium Sulphate,	1 gr.
	Ext. Nux Vomica,	1-8 gr.
	Salicylic Acid,	1 gr.
	Powd. Capsicum,	1-10 gr.
	Pepsin Concentrated,	1 gr.
Dose—1 to 3		

Pill Antiseptic Comp. is serviceable in atonic dyspepsia, nervous dyspepsia—in fact all forms of this disease, because it strengthens the lowered digestive vitality.

The Nux Vomica and Capsicum, besides promoting involuntary contraction of muscular fibre, relieves flatulence and constipation.

The digestive properties of the Pepsin, assisted by the action of the Salicylic Acid and Sulphite of Sodium in addition to the above, make this an effective remedy.
