

THE TORIES MAD AT GLADSTONE.

Loss of Prestige in Conceding to Russia Her Ultimatum.

A STEP THAT MANY REGARD AS AN OTHER BRITISH BACKDOWN.

London is Needed in London to Help in the Peace Negotiations.

LONDON, May 5.—The intensity of the Tory rage over the outcome of the Afghan muddle is almost ludicrous. It is now evident that the Opposition has been as completely outmanoeuvred by the Government as the latter has been outmanoeuvred by Russia.

Despite the forced colour that the Ministers endeavor to give the recent transactions with Russia, the press of London almost unanimously regard it as a diplomatic defeat.

Itching Piles—Symptoms and Cure. The symptoms are moisture, like perspiration, intense itching, increased by scratching, very distressing, particularly at night, seems if pin-worms were crawling in and about the rectum.

A REPLY TO "IRISH BOY."

To the Editor of the Daily Telegraph: I have just read in your paper a very well written article headed "Mr. Faucher de Saint Maurice, M.P., and the Irish in America" and signed "An Irish Boy."

Your correspondent attributes to me an idea which is none of mine, and which, moreover, I never upheld or defended, I only quoted from Mr. Chamberlain. It was he who emitted the opinion ascribed to me by "An Irish Boy."

After stating what I frankly thought of Sir Napier Broome's views with respect to the French Canadians, it was hardly likely that the very next day I should wheel around in my turn and play the same insidious role towards the Irish people.

I am acquainted with Ireland's past history, and I not only admit it, but I happily count many intimate friends among the members of the Irish race.

When I had the pleasure of celebrating St. Patrick's Day this year with Hon. Mr. Lynch and the Quebec press, was not my language on the occasion very much to the following effect?—"In listening to your national songs, I recalled an old Irish ballad, which I formerly heard, and whose refrain was—

"Tell them there is a poor boy in Ireland That is breaking his heart for thee."

It was sung by an Irish orphan who had been picked up by one of our French Canadian parish priests. For I must tell you that we are connected by more than international ties. The Irish are bound to us by gratitude. In 1848, when the Irish people were decimated by the typhoid fever, the French Canadians showed them more than hospitality. They tenderly cared for them in their hour of trial, and more than one of our priests shed their last sleep, victims to their heroic devotion to the Irish race.

The old Irish ballad just now recalled was sung on a roadside in Lochinvar by one of the many orphans whom my uncle, the curé Faucher de Saint Maurice, took and provided for, and I never think of them since but that poor child and his touching melody have been for me the personification of broken-hearted Ireland.

Those lines came back to my memory yesterday, Mr. Crown Lands Commissioner, the moment I received the card of invitation with its harp and beautiful lettering of green, as the waves which leave the shores of the Emerald Isle, green as the hope cherished that Ireland will one day be free.

May that day come soon! Then the ballad will no longer have a *raison d'être* and Irish orphans will no more be heard exhaling their sorrows on the roadside to the refrain:—"Tell them there is a poor boy in Ireland That is breaking his heart for thee."

Such was my language on St. Patrick's Day, and therein lies all the difference between me and Sir F. Napier Broome.

Be good enough, my dear President and confere, to give insertion to the foregoing for the information of your readers, and believe me to be

Yours very truly, FAUCHER DE SAINT MAURICE. Quebec, 4th May, 1885.

Young Men—Read This.

THE VOLTAIC BELT Co., of Marshall, Mich., offer to send their celebrated ELECTRO-VOLTAIC BELT and other ELECTRIC APPLIANCES on trial for thirty days, to men (young or old) afflicted with nervous debility, loss of vitality and manhood, and all kindred troubles. Also for rheumatism, neuralgia, paralysis, and many other diseases. Complete restoration to health, vigor, and manhood guaranteed. No risk is incurred as thirty days trial is allowed. Write them at no cost for illustrated pamphlet free. 22c.

AN LARMING DISEASE AFFLICTING A NUMEROUS CLASS.

The disease commences with a slight derangement of the stomach, but, if neglected, it in time involves the whole frame, embracing the kidneys, liver, pancreas, and, in fact, the entire glandular system, and the afflicted drags out a miserable existence until death gives relief from suffering. The disease is often mistaken for other complaints; but if the reader will ask himself the following questions, he will be able to determine whether he himself is one of the afflicted:—

Have I distress, pain, or difficulty in breathing after eating? Is there a dull, heavy feeling attended by drowsiness? Have the eyes a yellow tinge? Does a thick, sticky, mucous matter gather about the gums and teeth in the morning, accompanied by a disagreeable taste? Is the tongue coated? Is there pain in the side and back? Is there a fullness about the right side as if the liver were enlarging? Is there costiveness? Is there vertigo or dizziness when rising suddenly from a horizontal position? Are the secretions from the kidneys scanty and highly colored, with a deposit after standing? Does food ferment soon after eating, accompanied by flatulence or a belching of gas from the stomach? Is there frequent palpitation of the heart? These various symptoms may not be present at one time, but they torment the sufferer in turn as the dread disease progresses. If the case be one of long standing, there will be a dry, hacking cough, attended after a time by expectoration. In very advanced stages the skin assumes a grayish brown appearance, and the hands and feet are covered by a cold, sticky perspiration. As the liver and kidneys become more and more diseased, rheumatic pains appear, and the usual treatment proves entirely unavailing against this latter agonising disorder. The origin of this malady is indigestion or dyspepsia, and a small quantity of the proper medicine will remove the disease if taken in its incipient stage. It is most important that the disease should be promptly and properly treated in its first stages, when a little medicine will effect a cure, and even when it has obtained a strong hold the correct remedy should be persevered in until every vestige of the disease is eradicated, until the appetite has returned, and the digestive organs restored to a healthy condition. The surest and most effectual remedy for this distressing complaint is "Seigel's Curative Syrup," a vegetable preparation sold by all Chemists and Medicine Vendors throughout the world, and by the proprietors, A. J. White, Limited, 17 Farringdon Road, London, E.C. This Syrup strikes at the very foundation of the disease, and drives it, root and branch, out of the system.

Market Place, Fockington, York, October 2nd, 1882.

Sir,—Being a sufferer for years with dyspepsia in all its worst forms, and after spending pounds in medicines, I was at last persuaded to try Mother Seigel's Curative Syrup, and am thankful to say have derived more benefit from it than any other medicine I ever took, and would advise anyone suffering from the same complaint to give it a trial, the results they would soon find out for themselves. If you like to make use of this testimonial you are quite at liberty to do so.

Yours respectfully, R. TURNER. Seigel's Operating Pills are the best family physic that has ever been discovered. They cleanse the bowels from all irritating accumulations, and leave them in a healthy condition. They cure costiveness.

St. Mary street, Peterborough, November 29th, 1881.

Sir,—It gives me great pleasure to inform you of the benefit I have received from Seigel's Syrup. I have been troubled for years with dyspepsia; but after a few doses of the Syrup, I found relief, and after taking two bottles of it I feel quite cured.

I am, Sir, yours truly, Mr. A. J. White. William Brent. Hensingham, Whitehaven, Oct. 16th, 1882.

Mr. A. J. White.—Dear Sir—I was for some time afflicted with piles, and was advised to give Mother Seigel's Syrup a trial, which I did. I am now happy to state that it has restored me to complete health.—I remain, yours respectfully, John H. Lightfoot. 15th August, 1883.

Dear Sir,—I write to tell you that Mr. Henry Hillier, of Vancouver, W. I., informs me that he suffered from a severe form of indigestion for upwards of four years, and took no end of doctor's medicine without the slightest benefit, and declares Mother Seigel's Syrup which he got from me has saved his life.

Yours truly, Mr. White. Chemist, Calne. September 8th, 1883.

Dear Sir,—I find the sale of Seigel's Syrup steadily increasing. All who have tried it speak very highly of its medicinal virtues; one customer describes it as a "Godsend to dyspeptic people." I always recommend it with confidence.

Faithfully yours, Vincent A. Wills. Chemist-Dentist. To Mr. A. J. White. Merthyr Tydvil. Preston, Sept. 21st, 1883.

My Dear Sir,—Your Syrup and Pills are still very popular with my customers, many saying they are the best family medicines possible.

The other day a customer came for two bottles of Syrup and said "Mother Seigel" had saved the life of his wife, and he added, "one of these bottles I am sending fifteen miles away to a friend who is very ill. I have much faith in it."

The sale keeps up wonderfully, in fact, one would fancy almost that the people were beginning to breakfast, dine, and sup on Mother Seigel's Syrup, the demand is so constant and the satisfaction so great.—I am, dear Sir, yours faithfully, W. BOWKER. To A. J. WHITE, Esq. A. J. WHITE, (limited) 67 St James street, Montreal.

For sale by all druggists and by A. J. White (limited), 67 St. James street, city.

QUEBEC AND THE C. P. R. TERMINUS.

A MASS MEETING DISCUSSES THE SITUATION.

QUEBEC, May 6.—There was another largely attended meeting of the citizens' executive committee yesterday afternoon to disapprove of the joint arrangement in the selling of the North Shore railway. Mr. John J. Foote read the following extract of a letter received by him that morning from Hon. Thomas McGreevy, M.P.:—"The Government resolutions, which are now preparing, will be before the House on Monday. The Government undertakes to acquire from the Grand Trunk Railway the North Shore, by purchase or otherwise, and hand it over to the Canadian Pacific Railway, failing that they will get authority at the same time to give one million and a half of dollars to the Pacific, for which they will undertake to construct a new line to be commenced within sixty days after the rising of the house. The Government will not only be empowered to

construct a new line, but they will be bound to do it by law.

All the speakers spoke in an encouraging tone. The following is a list of resolutions prepared by the Board of Trade and sent to Sir John A. Macdonald and Sir Hector L. Langevin:—"This council disapproves entirely of the proposed arrangement for the extension of the Canadian Pacific Railway to Quebec by the joint ownership of the North Shore Railway between the Canadian Pacific Railway and the Grand Trunk Railway.

"That this Council will view with dissatisfaction all arrangements that will not be considered by this council as the complete control of the Canadian Pacific railway over the North Shore railway.

"That any such arrangement as that which is contemplated will not be the carrying out of the promise made by the Government that the extension to Quebec would be over a line owned and controlled by the Canadian Pacific railway.

That any scheme not involving such an expressed condition will be a source of great dissatisfaction to all classes and will be considered by this council as the sacrifice of the just claims of this city and district to a bona fide extension to the Canadian Pacific Railway to the port of Quebec, claims that have been recognized by the Government as just and right by the law passed during the last session, but more especially in the reply of the honorable the premier to the Citizens' delegation at Ottawa, which implied that the rights of Quebec would be protected and that the extension of the Canada Pacific Railway would be a bona fide one.

(Signed), JOSEPH SHERBYN, "President Quebec Board of Trade."

A MONSTER WAR BALLOON.

PHILADELPHIA, May 7.—The Ordnance Board of the United States Army has recommended the construction of a monster war balloon for the use of the Government, and General Russell Thayer, the inventor, has received instructions to begin the work. The Board recommends that a balloon of 7 tons ascending force be constructed and that trials be made with it. It will cost \$10,000, and will be the largest balloon ever constructed, with a diameter of 60 feet and length 185 feet. The "Dirigible war balloon," as it is called, is a cigar-shaped machine, pointed at both ends, and sails through the air longitudinally. The balloon is said to be the most destructive implement of war known to modern science. Gen. Thayer claims he can lay a city in ashes with it in a night.

GETTING EVEN WITH THE GARNET.

NEW YORK, May 7.—Tuesday night Paul Boynton took a large torpedo shell in which he placed a brick and approaching the British man-of-war Garnet, he fastened it to her hull. He was discovered while leaving the vessel and shouted to the British officer on deck that there was a torpedo on the bottom of his ship. The British tars became terribly excited, and pursued Boynton in a steam launch, capturing him and several friends who accompanied him in small boats. The party was taken on board the Garnet as prisoners, but were released when an explanation had been made and the torpedo shell examined. Boynton says the British admiral had once made fun of his rubber dress and he wanted to get even with them.

WORKING UP EVIDENCE.

WANTED, AN INFORMER—STEPHEN J. MEANY TO LECTURE IN ENGLISH TOWNS.

LONDON, May 5.—Mr. Stephen J. Meany, of New York, counsel for Cunningham and Burton, now under indictment for treason, is making the dynamite explosion at the Tower of London, is to start next week on a lecture tour in aid of the fund for the defence of the prisoners. The cities and towns of Lancashire, where Irishmen are numerous, will comprise the principal part of the tour. The lectures are deemed necessary because of the meagrely subscriptions obtained in America for the defence. It is believed here that the smallness of the donations in America, where heretofore Irishmen have been remarkably generous in all such cases as the present, is due to a belief on the part of Irish-Americans that Burton has been prevailed upon to turn informer, and has already been coached as to the evidence he is expected to give at the trial, which is to take place on May 11.

Rumors to the effect that the Crown would use Burton as a witness to secure the conviction of Cunningham have been current in London for several weeks past, and are probably true, judging from the official precautions which have been taken to prevent Cunningham or any of his friends from having any communication with Burton. Special care has also been taken to keep the prisoners from coming together in the court during the trial. Selected and well-armed constables have been detailed to guard them within the precincts of the court, the Crown prosecutor having intimated that Cunningham would probably attempt to assault Burton while in the dock unless means were taken to prevent such an outrage. The lawyer alleged that he had learned that Cunningham had said to a fellow prisoner that he suspected Burton would be used as a witness against him.

The general opinion among the English people is that the Government has secured enough evidence to convict both men. This opinion is, however, based on the assertions repeatedly made by Mr. Pollard, the Crown Solicitor, during the preliminary examinations. Many persons, in view of the same assertions, think it strange that the Government should at this late date accept Burton as an informer.

Costiveness is the primary cause of much disease. Dr. Henry Baxter's Mandrake Bitters will permanently cure costiveness. Every bottle warranted.

"A stitch in time" often saves consumption. Down's Elixir used in time saves life.

In Henry & Johnson's Arnica and Oil Liniment is combined the curative properties of the different oils, with the healing qualities of Arnica. Good for man and animal. Every bottle guaranteed.

The annual income of Amherst College is \$70,000.

Holloway's Ointment and Pills.—As spring approaches the most favorable opportunity offers for rectifying irregularities, removing impurities, and erasing blemishes which have arisen from the presence of matters formed by winter from being transported through the pores. This searching Ointment, well rubbed upon the skin, penetrates to the deeply-seated organs, upon which it exerts a most wholesome and beneficial influence. Well nigh all the indigestions give way to this simple treatment, aided by purifying and aperitive doses of Holloway's Pills, round each box of which plain "instructions" are folded. "Bilious disorders," loss of appetite, fulness after eating, lassitude, gout and rheumatism may be effectively checked in their painful progress, and the seeds of long suffering eradicated by these remedies.

A HEROIC DEED.

SURPASSING EVEN THE DEEDS OF PROWESS OF EVERY-DAY LIFE.

A few months ago the country was thrilled with the account of a girl who, at the risk of her life, when the whirling flood of the swollen rivers was wrecking great bridges from their foundations, skipped along the ties of a western railway, lantern in hand, and saved a train from certain destruction. The state of Iowa awarded her a suitable medal for her bravery. In this instance it was a child who saved the lives of many adults, but as a rule, the life of the child is in the hands of other persons.

In November, 1883, a little eight-year-old son of Danish parents was suffering with diphtheria. The attack was not severe, but he did not seem to rally after the throat appeared perfectly well. Nausea, headache and low fever succeeded the sore throat, and two or three days afterwards his limbs began to swell mysteriously. The skin became very dry, vomiting was frequent, nose-bleed was persistent, and nothing would stay in his stomach. "It was evident to our minds," says Mrs. Thomas Schmidt, wife of the vice-consul of Denmark, residing at Netherwood, N. J., "that some mysterious malady was working ruin in his system. Our physician said he had the terrible bright's disease. To our suggestion that a certain preparation be tried, he made no objection. We gave him six doses a day, two teaspoonfuls at a dose, in sweetened water. It remained upon his stomach, and within a week there was marked improvement. The bowels became regular without the use of cathartics, and the nausea diminished; in three weeks there was a subsidence of the dropsy, and by the middle of May the limbs were perfectly normal. He had a good appetite, and could take three pints of milk daily. By the first of May he was up, and though he had spent six months in bed, he did not feel particularly weak. In June he weighed eight pounds more than he did before he was taken sick. To-day there is only a slight unfavorable condition in his system, and the physicians say we have every reason to believe the child will be perfectly well."

Mrs. Schmidt is certainly to be congratulated on the good results which followed the use of Warner's safe cure, and she says: "We feel bound to make this truly wonderful result known, and are perfectly willing to have this letter published." Gratifying as is the result wrought, it is by no means singular, for thousands of children, who seemed weak and puny, have had their entire nature changed and their future assured by a prompt use of the same preparation. Such disorders are transmitted by inheritance, or arise from children's epidemic diseases, the evil effects of which often prove fatal in later life. The secret of the ill-health of many children is that their kidneys and liver are not performing their natural work.

It was a brave feat of the brave girl who crossed the swollen stream on the bridge to save the lives of the passengers; but it is a braver deed, and one worthy of wider recognition which, seeing the perils awaiting childhood, free from prejudice, with a purpose only to save by any effective means, preserves to us the lives of our children.

A woman who is weak, nervous and sleepless, and who has cold hands and feet, cannot feel and act like a well person. Carter's Iron Pills equalize the circulation, remove nervousness and give strength to the weak.

MUTINY ON A FRENCH SHIP. LONDON, May 7.—St. Vincent, C.V., advices report that while the steamer Ville du Mareuil was on her way to Buenos Ayres the emigrants mutinied on account of the bad food furnished. They were overpowered after a desperate fight, in which the captain and several of the crew were badly wounded. Ten passengers were killed or wounded. The vessel put into St. Vincent, where she is guarded by a French cruiser.

EASILY CAUGHT. It is very easy to catch cold, but not so easy to cure it unless you use Hagar's Pectoral Balm, the best remedy for all throat, bronchial and lung troubles, coughs, colds and consumptive tendencies.

THE CRIMES ACT. To the present complexities of Downing street are soon to be added that of renewing the Coercion and Crimes act, which in its present shape shortly expires. Lord Spencer has plainly said that unless it is renewed in that shape, without modifications, he will resign. But Dilke and Chamberlain are willing to drop the newspapers and secret inquiry clauses. Your correspondent is assured that this coercion matter is likely soon to become another Cabinet worry, with a prolonged, acrimonious debate in the Commons.

A SAD NEGLECT. Neglecting a constipated condition of the bowels is sure to bring ill-health and great suffering. Burdock Blood Bitters regulate the bowels in a natural manner, purifying the blood and promote a healthy action of the stomach, liver, kidneys and bowels.

THE ITALIAN MINISTRY THREATENED. ROME, May 7.—In the Chamber of Deputies to-day vehement attacks were made upon the government. A division on the motion of censure is expected to-morrow. The majority appear to be desirous of ousting Mancini, minister of foreign affairs, and preserving the remainder of the Ministry, but Dupretis will cling to Mancini.

A WIDE SPREAD EVIL. The great source of consumption and of ugly sores is scrofula in the blood. Burdock Blood Bitters purify the entire system and cure scrofula, as well as the more common blood humors.

A VERY CLOSE VOTE. LONDON, May 6.—The House of Commons to-night, by 240 to 237, rejected a conservative amendment to the registry of voters' bill, providing that the cost of registry will be charged to the treasury instead of to the local rates. Sir Stafford Northcote asked Mr. Gladstone whether, in face of the small majority, he would further consider the question. Mr. Gladstone said he would abide by the decision of the House.

A COUNCIL OF ARCHBISHOPS. BALTIMORE, May 6.—Archbishops John J. Williams, of Boston, William Elder, of Cincinnati, and Michael A. Corrigan, of New York, and Bishops J. L. Spaulding, of Peoria, will convene in Baltimore to-morrow evening. The council will be presided over by Archbishop Gibbons as chairman, constitute a committee named in the plenary council of November last, to consider the matter of the establishment of a national American Catholic university. During the council session the magnificent offer of Miss Caldwell, of New York, of a very large sum of money was accepted, and the number referred to the above parlous. Other offers have been made, awaiting the amount to over \$1,000,000, which will be the nucleus of the endowment fund. The question of the most eligible site will probably be determined upon, and other initiative measures for an

JUBILATION OVER THE SURRENDER TO RUSSIA. DUBLIN, May 6.—Much jubilation is being made this evening by the Nationalists over the news just received about England's surrender to France in the Bosphore Egyptian matter and to Russia in the Penjdeh "regrettable incident." England's humiliation makes Ireland's revenge," says a very leading barrister here. A late special in an evening paper contained the taunt of Lord Randolph Churchill as to the government's cowardice. "Begorra, the Castle party can no more smash the White Star than it could the Black Mahdi" was an exultant observation your correspondent overheard from a publican. The same barrister said:—"The government uses in forma pauperis to grant a plebeian arbitration of military ethics."

A GOLDEN OPINION. Mrs. Wm. Allan, of Acton, declares that Hagar's Yellow Oil is the best household remedy in the world for colds, cough, sore throat, burns, sores and other painful complaints. Her opinion is well founded.

THE FARM.

early commencement of the important enterprise.

FEVER, colic, unnatural appetite, fretfulness, weakness, and convulsions, are some of the effects of worms in children; destroy the worms with Dr. Low's Worm Syrup.

CONCERNING SIR P. LUMSDEN. Many members of the House of Commons think the recall of General Lumsden forms part of the agreement between England and Russia, the telegram ordering him home having been sent the day after the receipt of Russia's reply. It is stated that the attitude of the government is in part due to the receipt of the report of General Sir Donald Stewart, commander-in-chief of the British forces, that it would be imprudent to undertake an expedition to Herat until the railway has been completed to the Pishan Valley, which will take three years.

A THROAT CURE. A cure for Croup. There is no better remedy for Croup than Hagar's Yellow Oil taken internally and applied according to special directions. This is the great household panacea for rheumatism, stiff joints, pain, inflammation, &c.

REV. PETER CRUDDEN'S ESTATE. LOWELL, Mass., May 5.—Rev. Peter Crudden died here recently leaving an estate valued at half a million. Crudden bequeathed one dollar to each of his four brothers and sisters in Ireland and the remainder of his property to one sister and her heirs.

NATIONAL PILLS are sugar coated, mild but thorough, and are the best Stomach and Liver Pill in use.

A MEXICAN HORROR. TARATAN, Mex., May 5.—A seven year old son of a wealthy resident of this town named Lopez was lately kidnapped, and the father notified that the child would be killed if \$75,000 ransom was not deposited in a certain place within two days. By accident the note of the father was not delivered till too late to negotiate with the criminals. At the expiration of the second day the father found the body of the child in his courtyard, horribly mutilated. A twelve year old sister, on seeing her brother's corpse, fell dead, and the father became a raving maniac. The perpetrators are being sought for, and will be lynched if caught.

THE ILLICIT FLUSH, pale hollow cheeks and precarious appetite, indicate worms. Freeman's Worm Powders will quickly and effectually remove them.

A DRUNKEN MOTHER'S CRIME. NEWARK, May 5.—Lucy Gilchrist, wife of John Gilchrist, this morning, while insane from drink, seized her six months' old baby and placing it on a block chopped its head, neck and body with an axe, killing it instantly. An older child gave the alarm, but too late to save the baby. The woman was evidently mad, and said she did the deed because spirits told her to, and because she must save Ireland. Her husband arrived from distant soon after, and was restrained from attacking his wife with great difficulty. The woman is 38 years old, and has three remaining children. She was taken into custody.

DRIVE IT AWAY. Drive away all poisonous humor from the blood before it develops in scrofula or some chronic form of disease. Burdock Blood Bitters will do it.

A SALE OF NIGGERS. RICHMOND, Ky., May 5.—An immense crowd gathered in front of the court-house yesterday to witness the public sale of negroes into slavery to the highest bidder. One man brought \$38 for twelve months' service, one \$14 for three months, and a woman 25 cents for twelve months. The sales were made under the vagrant laws of the State.

USE PROF. LOW'S SULPHUR SOAP for Prickly Heat, Nettle Rash, Scaly Eruption, Itch, and all diseased conditions of the skin.

Paris is to have a cat show at the Tuileries. Thos. Sabin, of Eglinton, says: "I have removed ten corns from my feet with Holloway's Corn Cure."

Fred Douglas dotes on kid gloves. One trial of Mother Grave's Worm Exterminator will convince you that it has no equal as a worm medicine.

Mice, it is said, are more afraid of women than of men.

Children starving to death on account of their inability to digest food will find a most marvellous food and remedy, in Scott's Emulsion of Pure Cod Liver Oil with Hypophosphites. Very palatable and easily digested.

A new seedless grape has just come into notice in France.

No lady of refinement likes to resort to superficial devices to supply a becoming semblance of her former beauty. It is health alone that lights the countenance and brings back fresh tints to the faded cheek. If anything on earth will do this it is Mrs. Lydia E. Pinkham's Vegetable Compound, which has already brought health to multitudes with whom all other means had failed.
