

PEDLAR'S "PERFECT" CULVERTS

Most Convenient in Handling and Installing

Given strength and durability, an important factor for the engineer's consideration, is the ease with which a culvert can be installed. And in this point, as in the others, everything is in favor of Pedlar's "Perfect"  Metal Culverts. Only ordinary labor is needed—and not much of that. A small gang of unskilled laborers can handle several hundred feet in a day—and they can't make mistakes. Rivetted Culverts are shipped all ready to place in position, in lengths up to 40 feet, coupling bands supplied for longer lengths.

Write for Culvert Booklet M.J.

The Desk that Does a Double Duty

A desk that gives you a big top working-surface—and more, provides a "personalized" filing cabinet where you can keep—*filed just to suit your needs and ready for instant reference*—the papers that require future attention.

The "Office Specialty" Efficiency Desk was built for busy men who want a desk top clear for free and easy thinking; and yet must have access to their important papers—instantly.

So in the Efficiency Desk they find their ideal—a desk-top "cleared for action" and a convenient filing cabinet for the "wanted-in-a-

second" papers they're liable to need at any moment in the day.

If you are interested in knowing how the Efficiency Desk is helping other busy men to a bigger day's work, write to-day for a descriptive folder.
