

castings, standard fasteners, cam rings, starters, alternators, rubber hose, stampings, drive and front axles, and air conditioning bearings. While some of the specific products being requested do not relate to the product categories covered by the report, they are included since they may be of interest to more diversified Canadian auto parts firms.

Information on companies wishing to source these specific products is found in Appendix 1. A list of those companies which are interested in knowing more about Canadian sources of supply of automotive products in general has been compiled in Appendix 2.

The Department of External Affairs recommends that Canadian firms should consult the Canadian Trade Commissioner located closest to each company being considered for contact prior to doing so in order to obtain advice, assistance and further company information. Canadian government contacts in Canada and the United States are provided in Appendix 11.
