

## ABSTRACT

This Fourth Update is a follow-on publication from earlier compilations of verification literature. The original was entitled Bibliography on Arms Control Verification: 1962-1991, published by External Affairs and International Trade Canada, and was followed by three updates in 1992, 1993 and 1994. Researchers are advised to consult all these bibliographies for a complete picture of the literature covered within the Verification Literature database.

The Fourth Update lists alphabetically over 400 documents related to verification added to the database after the publication of the Third Update. It generally covers new material received since the summer of 1994. It also covers French language material, particularly that published by the Department of Foreign Affairs and the United Nations Institute for Disarmament Research. As before, the scope of this bibliography encompasses the publications and submissions of governments and international organizations as well as the academic literature on the subject.

Each document has been assigned a number of subject keywords describing its contents. An updated thesaurus of these keywords is included. Subject access to the documents contained in the bibliography is provided through an index of these keywords.
