

THE PATH FORWARD

The challenges of sustainable transportation are immense and will not be solved overnight. Sustainable transportation is a long-term goal, requiring the cooperation of many partners, domestically and internationally, in the search for effective solutions. Progress toward sustainable transportation must be made incrementally. In Canada, the key will be to better integrate economic, social, and environmental considerations into decisions affecting transportation activity.

Canada has already begun to take action. Much has been accomplished, however, much more needs to be done. We will continue to work together with other countries in the pursuit of global sustainable transportation.
