

## 5. Energy and the Economy .....

### INTRODUCTION .....

### ENERGY PRICING .....

1. Energy Pricing in the Past .....
2. Future Energy Prices and Their Implications .....

### THE ECONOMICS OF ENERGY SUPPLY, DEMAND AND CONSERVATION .....

1. Conservation Defined .....
2. What Factors Affect Conservation? .....
3. Conservation Objectives, Decisions and Policies .....
4. Pricing Criteria for Alternative Energy and Oil Substitutes .....
5. Demand, Conservation and Prices .....
6. Delays in Adopting Alternatives .....

### ENERGY AND GROWTH .....

1. Energy Consumption and the Gross Domestic Product .....
2. Energy Consumption by Producers .....
3. The Role of New Energy Sources and Technological Change .....

### BALANCE OF PAYMENTS, ENERGY TRADE AND INVESTMENT .....

### ENERGY AND EMPLOYMENT .....

### INCENTIVES .....

## 6. Alternative Energy Sources, Currencies and Technologies .....

### INTRODUCTION .....

### CONSERVATION AS AN ENERGY SOURCE .....

### BIOMASS ENERGY .....

1. Alcohol Fuels .....
2. Biogas .....
3. Wood .....
4. Peat .....

### COAL TECHNOLOGIES .....

1. Combustion Technologies .....
2. Conversion Technologies .....

### DISTRICT HEATING .....

### ELECTRICAL GENERATION .....

1. Combined-cycle Generation .....
2. Low-head and Small-scale Hydro-electric Generation .....

### FUEL CELLS .....

1. Fuel Cell Technology .....
2. Advantages and Difficulties in Using Fuel Cells .....
3. International and Canadian Development .....

### FUSION ENERGY .....

1. The Nature of Fusion Energy .....
2. Advantages and Difficulties in Using Fusion Energy .....
3. International and Canadian Development .....
