The symptoms of worms depend a great deal on the constitution of the one afflicted with them. Some childred in a strong and healthy condition can stand the irritation without showing any signs of trouble, while others are restless, roll and toss in their sleep, grind their teeth, have bad breath, are feverish, with bloated abdomen. They pick at the nose, are peevish. Some children wet the bed, also take convulsions and fits, waste away and die. My worm cure saved a child pronounced to have brain fever and was only given a few hours to live. This child had all the symptoms of brain fever. Two doses brought a lot of stomach worms in about six hours, which saved the child from an early grave. It also expelled a lizard from Mr. J. L. Thomson. He claimed that he could feel it crawling in his stomach and consulted several physicians, who said it must be imagination. He thought it was stomach worms and purchased my remedy, which expelled a red lizard about five inches long. TAPEWORM. Her Visit a Grand Success-Used

Professor Mulveney's World. Famous Cure. Mrs. M. Metzer, No. 524 Fourth Avenue East, Duluth, Minn., a beautiful young married lady, and her baby boy, have been the guests of her aunt, who has taken great interest in her case, having advised her to come from Duluth, Minnesota, for the purpose of being relieved of a horrible tapeworm, for which she has been treated seven different times without success. Her aunt, who is a highly-respected citizen, telephoned for Prof. Mulveney's Remedy, which was sent to her, and which she used with the most gratifying results, expelling the tapeworm, head and all, without the tapeworm, head and all, without previous starving, and without causing her to be sick. They arrived in Prof. Mulveney's office on the evening of Sept. 6th, their faces all aglow with joy and satisfaction. They had the monster which caused so much trouble, head and all, and the glad tidings of joy to convey to the Professor that the result was a grand success. They left for home half an hour later, wishing the Professor long life and continued success. Two happier people could not be found in Toronto. The tapeworm is added to PROF. MULVENEY'S wonderful collection of parasites at 167 Dundas street, Toronto. Toronto, Dec. 28, 1913.

any bad after-effects. The joy and satisfaction expressed by those relieved of them must certainly bring joy and pleasure to the proprietor of such a valuable remedy and convince all that it is a blessing to humanity from the Most High. The symptoms of tapeworm are many and differ, as some constitutions seem to stand the ravage of this vile parasite without causing much alarm, while others are and waste away to a shadow, a ravenous appetite, pain or distress and sometimes a longing for food. At other times a loathing of food, dizzy spells, gas or wind, nervous feelings headaches, also a feeling as if something was moving in the bowels something was crawling up the throat The only certainty of knowing one is there is when segments or joints come away at almost any time. They are flat and measure from 1-2 to 3-4 of an inch long and have often been mistaken for pin worms by those who do not know the difference. There are many other feelings of distress which would take too long to enumerate Strange to say some people of strong constitutions have very little distress. Tapeworms are bred from a parasite and measure from 9 to 30 or 40 feet long, and sometimes whole colonies of them are expelled. The professor has 13 from a man who was wasted away to a shadow, 7 from a lady who was operated on for internal troubles. 6 from a lady who was treated for rervous prostration and many from cthers who were treated for different diseases and complaints, and quite a number from people whom their doctor tried to persuade to have an operation, when one or more of these yile pests were eating their lives away. The professor has letters from physicians who have used his remedy in their practice. About ten years ago a gentleman came into my office on crutches. The doctors pronounced his trouble to be Consumption, which is known better now as Tuberculosis. He had coughed until he wasted away to a living skeleton, as he was only skin and bones. He had spent \$700 traveling in the West to get dry air, \$300 with specialists in New York City without relief; he was sent to get my remedies, called B'Well and Rheumaticide, by a gentleman whose leg was saved from amputation by using Rheumaticide. He purchased them, and using Rheumaticide on the chest externally and taking B'Well, he was entirely cured in about two weeks, and I think everyone in his neighborhood bought medicine from me. I am told the gentleman is still alive and weighs over 200 pounds. This is only one of many that B'Well and Rheumaticide have cured who were pronounced to have Consumption.
