The move is said to be made necessary by the increased cost of operation, higher wages, etc. Fares are now six a quarter four hours a day.

Many large commission houses switched today to the selling side of the market, and the principal demand came from shorts. Continued torrid weather and the absence of rain were somewhat offset by the possibility that storms from the northwest or from the gulf might penetrate the corn belt, and afford partial relief from the danger of severe crop damage. Besides, the trade showed considerable disposition to await the government weather and crop reports due tomorrow and not to risk exaggerating the prospective curtailment of yield.
