London Markets Steady. New York, June 30.—The Evening Post's London cable says:

The stock markets here, including Americans, were steady, but without business. There was no special feature.

The reduction in the Bank of England discount rate has come a week sooner than expected. It was good policy of the directors, however, to make the movement, for they have done a much larger loan business today than they would have done otherwise. Probably \$2,000,000 was lent today, the money being wanted for the customary failf yearly requirements.

The weekly statement of the Bank of England shows that the coin and buillon increased \$44,000, but the reserve is £890,000 less, owing to the demand for notes to meet half yearly payments.

The net gold received for the week was £60,000, the details showing the receipt of £90,000 from Australia, and £5000 from South Africa, while £20,000 went to the Continent, £10,000 to Hong Kong and £5000 to Gibraltar.
