CANADA'S FUTURE AND THE LIBERAL PARTY

(Continued from first page.) the boys of Ontario, he felt proud of his association with them, but he had never felt his hart as near theirs as it was today. Onation had done well for the Liberal party and he had reason to loope that at the next elections when ever these be called, whether this year or after another season, that the province would do even potter than in 18% and the heart of the province would do even potter than in 18% at the colleages, first Richard Canwright. The people of this country did not know, and the colleages, first Richard Canwright. Ontario and later to pander to the weaknesses of his fellow-countrymen of Quebec. The policy of the Liberal party would be a finote noble policy, to appeal to all classes on the common sentiment of judgment. He ventured to hope that from Quebec would come after the next general election as large a support as was given to the Liberal party in 1896. He did not want to boast, but there were evidences that that party could count on a majority in every province of the dominion. Ontario shackled as it was with the gerginander would give a good account of itself.

Then there is an ingenious contrivance in the way of an iron cleaner water and rest. A shallow box with one alf covered with asbestos, and the other with fine wire constitutes the rest and cleaner. A cake of wax in the other end completes the device. Chamois balls made from burning of chamois skin to use in cleaning windows, mirrors, woodwork and metal, a new style of cake tin with thin knife fastened in the bottom for the purpose of loosening the cake easily, and an anti-tannin tea infuser in the form of a china strainer with cover, are among the other new things in the list.

New York, so the papers say, has gone handkerchief mad, and the fad has reach-ed St. John judging by the appearance of a King street window this week, which showed the notion of the hour. Not that the dainty but necessary little square has suddenly become wildly popular, the hand-kerchiefs referred to are the gay silk suddenly become wildly popular, the hand-kerchiefs referred to are the gay silk squares that are shown in such quantities. They are usually about thirty-two inches each way and it takes two to make a waist. If they are small and sometimes they come about 27 inches, four must be employed. They come in various prices according to the quality of the silk, the color and the border fringe, etc., for often they are fringed on the edges. They also come plain but the fringed variety are decidedly the prettiest. The most fashionable way of making them up is in the form of a bolero, and special prominence is given to the revers in order that the fringe may be seen to advantage, both in the revers and in the bolero as a whole.

Some very beautiful color combinations are brought out in these squares, the one seen on a model in the window of a King street dry goods house being patterned over in Persian design, the bolero and collar of a dark blue. Don't Like Printers' Ink.

Moths have a special aversion for print-ers' ink, and if when closing the house for the summer the upholstered furniture, rugs and loose carpets are wrapped in newspaper then covered with a peice of tar paper used for roofing purposes, an again covered with newspaper, the moth will give a wide berth.

And all Forms of Itching, Scaly Humours Are Instantly Relieved and Speedily Cured by CUTICURA.

The itching and burning I suffered in my feet and limbs for three years were terrible. At night they were worse and would keep me awake a greater part of the night. I consulted doctor after doctor, as I was travelling on the road most of my time, also one of our city doctors. None of the doctors knew what the trouble was. I got a lot of the different samples of the medicines I had been using. I found them of so many different kinds that I concluded that I would have to go to a cincinnati hospital before I would get relief. I had frequently been urged to try CUTICURA REMEDIES, but I had no faith in them. My wife finally prevailed upon me to try them. Presto! What a change! I am now cured, and it is a permanent cure. I feel like kicking some doctor or myself for suffering three years when I could have used CUTICURA REMEDIES.

STRIKE AND RIOT.

Pawtucket, R. I., May 9.-What transpired in front of the Lorraine Mills shortly after 6 o'clock tonight gave every in dication of a riot for the city officials t look after, and while stones and other missels were freely thrown, the affair terminated without any serious injury to any one. The trouble was precipitated by an attempt of the pickets to have a talk with the dozen Italian weavers as they came out of the mill, with an unsuccessful endeavor to induce them to remain away from the mill and not resume operations in the places made vacant by the striking

Deputy Sheriff Blanchard took a hand in the riot, but he was roughly handled and was obliged to pull his revolver to protect himself from assault. Supt. Blade of the Lorraine Mills was also a target for the crowd. Mr. Blade finally made his escape under guard of an officer, and Sheriff Blanchard quelled the disturbance

sufficiently to enable the Italians to proceed to their homes.

At a meeting of the striking payers held too but a vote was passed conducting the payer of those who took part in the assault early in the evening.
