HOME CIRCLE COLUMN

Pleasant Evening Reveries dedicated to tired Mothers as they Join the Home Circle at Evening Tide.

As good health on Sunday as during

This is our recipe for home happiness.
Who will give us a better one? Love, peppered with patience, salted with exception, crowded with cheerfulness, showered with sunshine, tinctured with trust, flavored with forgiveness, freighted with frinkness, charged with confidence, complete with contentment, heroic and happeful.

The person who wantonly puts a thorn in the loving heart of a little child will feel the rankling of that thorn in his or heart some day, in a wound no later repentance can ever heak

tiste of the bliss of heaven. One can not get too much love into one's home making, but easily too little.

as good health on Sunday as during the rest of the week; the same ability the attend religious services as to engage the usual active duties of life.

As great care in listening to religious instructions as is given to scrutinizing each new dress, cloak, bonnet, etc., worn those in attenda: ee.

As great ability in learning our own faults as those of our neighbors. With the supply of this want the world will be we made a change and turned ont the total want the world will the world will be we made a change and turned on

Weather to suit all, or, better still, people who are disposed to be suited by the weather.

Young man, there is one thing you cannot do. You cannot make a success is life unless you work. Older men than you have tried it and failed. You cannot loaf around the street corner, make, tell stories and sponge on some case else without making a failure of life. You must learn a trade or get into some honest business. If you don't you will become a chronic loafer, and there is no place in the world for loafers. The ripe fruit is at the top of the tree and you must climb if you get it or something no matter how small, or haw low the wages, it will be a starter. The yourself and others will help you. There is no royal road to success; will, grit and endurance are the qualities that lead to it.

This is our recipe for home happiness. Who will give us a better one? Love, peppered with patience, salted with savity, dampened with discretion,

Let us all remember that the higher and happier our home life, the more wisely and better we may hope to do the work that lies waiting for us beyond it. A pleasant place to come home to is the greatest energizer a man can have. Then let us strive with an earnest and constant nurpose to more age keep the constant purpose to make and keep the home cheerful, inviting and pleasant.

Man can build the house and roof it in, a resistance against the storms and elements; but the man with all h's Love is the great homemaker, that makes even the drudgery of house-keeping a pleasure, and home life a fore-

C.P.R. TO MOBILIZE SCIENTISTS FOR RESEARCH WORK

Arranges With Arthur D. Little to Establish Central Organization at Montreal

for the Scientific Research

tric equipment equal to anything of the continent. These are, however, local activities, and the time has come, in the opinion of Lord Shaughnessy, when a Dominion-wide organization should be formed for the scientific research of Canada's vast mineral, metal, hydro-electric and chemical resources, which will result in the practical application to industry of many minerals heretofore neglected or exported for manufacture to other countries, of by-products in existing industries and of other natural resources which were neglected or insufficiently exploited. The waste of straw, for instance, in our wheat fields, of flax fibre, of lumber, seventy-five per cent. of the product of which has been wasted in the forcest ty-five per cent. of the product of which has been wasted in the forest or at the mill, while in tungsten, molybdenite graphite, oil shale, mica, manganese, magnetite, talc, felspar and other minerals there is a field for the profitable investment of much

for the Scientific Research
of the Country's Vast
Resources

Although the potential wealth of Canada's natural resources is known to be marvellous, only a small portion of thete have been exploited, and apart from the work done by the Government Geological Survey, the scientific investigation of Canada's resources with a view to practical development.

research work in all parts of the Domition of the chark been exploited, and apart from the work done by the Government Geological Survey, the scientific investigation of Canada's resources with a view to practical development has been fragmentary and almost immaterial.

The lesson of the litanic conflict now making in Europe has brought home thow much the Dominion has to learn from some of the European countries with which she is at war, as for instance, the pre-eminence of Germany and alcetrical development, due pre-eminently to the thoroughness with which chemical research was pursued in that country, a pre-eminence which resulted in the treatment of the Institute of Technology. Indeed, Mr. Little has been placed in the treatment of the Institute of Technology. Indeed, Mr. Little same as a chemist and a chemical and broad to every branch of industrial activities and production.

When peace is restored there will be a strong effort to provide the requirements of the British Empire and her lAllies from friendly sources, and if the war were, unhappily, to be long drawn out, the production of Canadian resources might become more essential its success in peace and war than armies of heroes.

The Canadian Pacific Ry, Co. has a chemical schools attached to its great shops, and at Trail the company has seveloped a great chemical and metalogue and the canadian Pacific shops, and at Trail the company has seveloped a great chemical and metalogue and the canadian Pacific shops, and at Trail the company has seveloped a great chemical and metalogue and the canadian Pacific shops, and at Trail the company has seveloped a great chemical and metalogue and the professors and others of the Dominion charter has been obtained and the canadian Pacific shops, and at Trail the company has seveloped a great chemical and metalogue and the professors and others of the Dominion charter has been obtained and the canadian Pacific shools attached to its great shops, and at Trail the company has seveloped a great chemical and metalogue and

A DASHING MODEL.

One of the First Spring Turbans Yet Pictured.

Brimless, high, springy, this new tur-ban combines much of style. The piquant wing is of helio cerise velvet, a deeper shade than the five floppy roses at its base. The straw itself is a novelty in one of the new tan shades. Please observe the net veil with its attractive border in triangles and dots.

THE ART OF DRESS.

THE ART OF DRESS.

How Clothes Influence Character and Even Destinies.

The influence of clothes on human destinies is enormous. We say "it is not the cowl that makes the monk" but that is another erroneous proverb. Its stamp always remains and molds the individual, body and soul, in a certain way. The prestige of the costume has a great deal to do with the sacerdotal or military vocation. Who will ever know how much Mile. de Montijo's dresses had to do with making an empress of her? She ordered her dresses for Complegne from Worth, whose fame was just beginning, and, according to her own expression, they were her "battle horse." On them she won her victory, and we all know the effects of that victory.

"The death of a delightful man of my acquaintance," declares Pierre de Coulevain in one of her sprightly books, "was caused by a hat being worn on one side. One of his mother's friends wanted him to marry a pretty girl she knew, who was very charming and well off. He happened to be staying at her house near Vernon when this young protegee was going through on her way to Rouen.

"Anxious for her guest to see the girl, she persuaded him to go to the station with her. He went, saw the girl; but, alas, she had her hat on one side, in the most comical way possible. It was no doubt one of those odious

girl; but, alas, she had her hat on oneside, in the most comical way possible.
It was no doubt one of those odious
hats, so badly balanced that no pin in
the world could keep them straight.
The harm was done, though. He never dared tell his mother's friend what
his objection to the girl had been. He
owned it to me later on, adding, 'I
should always have seen her like
that.'"
Imagination plays tricks on French.

Imagination plays tricks on French-men as it does on no other men. This one married another girl who wore her hats straight, but whose head was rather turned.

The marriage ended in a divorce and the divorce in sudden death, such sud-den death that it was generally be-lieved to have been suicide.

NEW AGRICULTURAL WAR BOOK.

The Agricultural War Book for 1916, entitled "Production and Thrift," and having for its particular text: IN WAR TIME.

Produce more and save more, Make your labour efficient, Save materials from waste,

Make your labour efficient,
Save materials from waste,
Spend your money wisely,
consists of 250 valuable and instructive
pages. Opening with a brief address to
the Farmers of Canada by Hon. Martin
Burrell, Federal Minister of Agriculture,
under whose direction the book has
been issued, followed by extracts from
the Budget Speech of Sir Thomas
White, Finance Minister of the Dominion, and an article bearing upon the
national income and expenditure of the
United Kingdom, there ensue contributions from over seventy expert authorities on different branches of agriculture,
including the compiler and editor of the
work, the federal Commissioner of
Agriculture and the Commissioner of
Live Stock and Dairy Products of the
Dominion, the Director of Experimental
Farms, chiefs and sub-chiefs of departments of agriculture of all the pro-Dominion, the Director of Experimental Farms, chiefs and sub-chiefs of departments of agriculture of all the previnces and a number of profesors at the different agricultural colleges. A wast deal of general information, statistical and sotherwise, covering various countries as well as Canada, is given along with a large fund of sound advice and counsel bearing in particular upon the subjects embraced in the title. Although primarily devoted to agriculture there is much matter that the general citizen will find of interest. Among other things he will be rather surprised to learn that wheat in 1801 was \$3.47 a bushel in Britain, while last year it was only \$1.61, the latter, however, being nearly twice as much as the lowest point reached, which was in 1891, when the price was down to 68 cents. For the first fifteen years of this century the average price of wheat per bushel in Britain was 98 cents, whereas in the first fifteen years of the nineteenth century the average was something like century the average was something like

entury the average was something liks \$2.66.

While crop production occupies a large space, live stock comes in for a large share of attention, horses, cattle, sheep, swine and poultry all being learnedly dealt with along with dairy products and special crops, such as sugar, sugar beets, honey, maple products, flax, fruit, vegetables and tobacco. In short no branch of agriculture is overlooked. The nutritive and commercial values of different foods are set forth in company with a deal of excellent advice on the practice and results of thrift. Marketing is dealt with, and sections of the book are devoted, among other subjects to Economy in the Home, Patriotic Purchesing, Women and the War, the Call to the Colors, Patriotic Relief Work, and Education and the War.

Below will be found a list of Cana dian patents recently secured through the agency of Messrs. The Monkey Banch.

"During the last campaign," said Senator Heltfield, "I spoke all over Idaho. One day, up in the northern part of the state, a wheel came off the buggy in which I was riding. I walked along the road a piece until I came to a rancher's house. The only person I could find was a big, shock-headed Swede.

Swede.

"'My friend,' I said, 'can you tell
me where I can find a monkey wrench?'

"He looked at me blankly for a
minute and then said:

"'No, this har ben a sheep ranch an'
over than ben a cattle ranch. I don't
know where th' hall's a monkey ranch.'

Sir Percy Lake reports that the British lines on the Tigris have been

extended. The Turks were forced to quit the Quatia district in eastern Egypt after a

The Allan liner Pretorian seached St. John with eighty-four Canadian officers and men and three nursing sisters.

No one ever lost money, temper, character or the esteem of others, by being truly polite at home, in public gatherings, in business, on the street, in school or church. Lowestoft was shelled by German cruisers, which were driven off by local naval forces. Five persons-were killed and some of the British vessels were struck, but nobe was sunk. The material damage was slight.

Home is a magic word, and we seldo Home is a magic word, and we seldom try to analyze it. A little Polish girl in a public school was asked recently to write a definition of home. She wrote, "A home is where people live, and where a man or somebody comes home and finds people there, and then eats!" And then eats! To how many thou-sands of men that is the end and aim of coming home! To how many thoucoming home! To how many thousands of women the preparation of the food to be eaten is the chief business of
