

(An illustration from the *HANDBOOK OF THE TREES OF THE NORTHERN STATES AND CANADA, PHOTO-DESCRIPTIVE*, by Romeyn Beck Hough, B. A.

Two pages facing each other are devoted to a species, and this with its caption and legend comitted here) is one of the two relating to the Chestnut. Observe the background is ruled into square inches to indicate sizes. The other page bears a beautiful picture of the characteristic bark of the species, a photo-micrograph of wood structure, a map indicating distribution, and a carefully prepared text. In this way all of the trees are treated. (See this page in *March issue*.)

"A model in treatment and execution and by far the most convenient book I have ever seen for the ready identification of natural history objects."—C. Hart Merriam.

"The most satisfactory volume I possess out of a total of some 250 on this and kindred subjects."—Dean Alvord.

"With it one wholly unfamiliar with botany can easily identify the trees."—Melville Dewey.

Prospectus and sample pages sent on request; also information concerning our AMERICAN WOODS (a publication illustrated by actual specimens), etc. Address the author and publisher,

ROMEYN B. HOUGH, Lowville, N. Y.

Your courtesy in mentioning the Magazine when writing will be appreciated.
